What about a Cotton-Storage Warehouse for Farmville? This is something that would be as much benefit to the farmer as anything we could do.

Is there someone looking after plans and specifications for Farmville's new and modern school building to be erected this summer and fall? If not this important matter should receive prompt attention. There is no need putting this off another year.

FIVE CENTS.

What is a nickel worth? Of and by itself not much, you may think.

Nevertheless, a nickel saved gives you, without waiting, the interest earnings of a whole dollar for a whole year. And a nickel wanted means a dollar put in an old sock, hidden away, and made useless for three hundred and sixty five days at least.

Saving is the foundation of thrift. Thrift stops waste, increases wealth and builds prosperity.

These are some of the things the War Loan Organization of the Fifth Federal Reserve District is trying to impress upon the people of this community. These thoughts make us who have had little respect for nickels, dimes and dollars stop and think. They should make us take a personal inventory and decide if there are not ways in which we can save. They should make us cut out our

wastes and put the results into savings.

It is merely a question of thinking in interest.

For instance, if every person in the United States saved one little, insignificant nickel in one day, it would mean that at night on that day the people would be just five million dollars richer. And then suppose the people kept this up for one month? It would mean that at the end of 30 days they would have saved one hundred and fifty million dollars.

Why not keep it up for the rest of 1919? What would be the result? One billion five hundred million. Sounds like a lot of work for one little nickel to do doesn't it, yet there are scores of industries in the United States which are paying big dividends on the little nickels gathered day by day.

This immense sum if invested in War Savings Stamps would earn for the savers approximately sixty four million dollars in 1920—the work of "old man interest", who never takes a day off and who is continuously on the job.

Just think what the result would be if every individual saving and investment were carried into dollars and hundreds of dollars. This nation must now depend upon its own people to finance its great Government projects and all of its own industrial development. To do this we must learn to produce more, to eliminate waste, to save and invest wisely. Once the lesson of thrift becomes firmly entrenched in the American mind, nothing can stop us.

What is a nickel worth? Learn to think in interest.

No Worms in a Healthy Child
All children crowded with worms have an un-healthy color, which indicates poor blood, and for a time there is mood or loss of stomach disturbance. GROVE'S TASTELESS CHAM TONIC given regularly for two or three weeks will catch the worms, improve the digestion, and act as a general strengthening tonic to the whole system. Nature will then throw off or digest the worms, and the child will be in perfect health. Pleasant to take. Do not bottle.

Notice Discharged Soldiers.

Those desiring information and assistance in filling out papers to get the \$60. bonus allowed by the War Department to discharged soldiers, see R. A. Bynam at the Bank of Farmville or Dr. Paul E. Jones at his office and they will gladly furnish all information and assistance free and without gratuity.
