

"Friendly Enemies," Notable Comedy, at Chautauqua

"Friendly Enemies," an uproarious comedy drama presented by six competent New York actors, will be among the big features of the coming Redpath Chautauqua. Follow the conflicting convictions of two lifelong friends, then "Friendly Enemies" and how their difficulties eventually reconcile, supply the plot with an abundance of available comedy and moments of gripping pathos.

THREE DAYS--Beginning AUG. 10th.

Camping at Lake Waccamaw.

(Continued from page one)
 take from that which we had just heard.
 Elizabethtown is quite an historic place. It is said that during the Revolutionary War there were more Tories in Bladen County than in any other county in the State, and they held out longer. The famous Tory Hole a deep ravine where the Tories made their last stand just prior to the Battle of Moore's Creek, is there and was pointed out to us. Rev. Mr. Brooks, the Baptist minister and Sheriff Clark, were especially nice to us, the Sheriff taking the Scout master in his Henry a part of the way from Elizabethtown toward Lake Waccamaw. We did not see Judge Lyon, whose home is at Elizabethtown.

According to the Sheriff Lake Waccamaw was about 25 miles from Elizabethtown. Old Sol then bade us good bye and tucked his head back of the western hills and night was closing slowly on us. It soon came to be the road with no plunge in the lake as we had planned and no downy pillow to rest our weary heads, but we had enough room in the truck to stretch on the floor and by this time several were asleep. Alternating between the seat and floor was the boon of the trip on the truck. On the big motor crest until about 9:20 someone shouted there is the lake, and sure enough it was Lake Waccamaw right by the side of the road. The big monster heaved a sigh of relief and we all chimed in Amen. The next thing was to find our cottage, but soon the merry voices of Harry Lang and Marion Davis, the vanguard of the party were heard, and we all alighted at once. These voices never sounded sweeter than on that night. They had opened up the cottage and gone to bed. We then began to unload and prepare for supper and bed when we discovered that there were plenty of lamps in the house but that it was formerly occupied by the sea-footish virgins instead of the sea-wise for there was no oil in the lamps. So we dispensed with supper and set to bed, and to tired but pleasant dream.

Regards to all.
 I will write again next week.
 Yours,
 George

For Sale—Field Peas—Hill & Savage, Greenville, N. C.

FOR YOUR CONVENIENCE

We have established this with Smith Grocery Co. 2125 Broadway in the White and skinned Klan and you have the milk at your door with but a few minutes notice. Don't fail to call for the original. It just like the fresh cow's milk. Price the same.

PRACTICAL EDUCATION

The child's brain is susceptible of the highest development, but it should be developed along the line of its inclinations and for practical purposes. If ever there was a time when sanity in education was needed, now is that time. Our schools and colleges are educating the youth of this land away from the natural tendencies and from the human instincts of well developed boys and girls.

The education of today seems to destroy initiative, self-reliance, courage, and a desire for self-support. The educational system of today has apparently destroyed the desire on the part of children to be contributing members of society. They seem to think that the state owes them something because it gives them a free education. There are very few boys wanting to be master mechanics. The majority are trying to find an elevator by which they can rise to the top story of Success. Success was never reached by an elevator. The mechanical part of Success can be reached only by climbing the ladder of industry and diligence.

If the manufacturing plants of the country had to be closed down

American master mechanics, the factories of the land would have to close. The majority of the master mechanics controlling the factories today have been trained in foreign schools. There are very few apprentices. We have permitted the tyrannical labor unions of the country to destroy the school of apprentices. The idea of organizations or institutions arbitrarily saying how many apprentices they will permit to be trained! Such a tyrannical suggestion from an organization should not be permitted. Such a doctrine is a damnable curse to the manufacturing plants of this land.

Men of brains and money should spend their time and money, and their energy in founding, erecting, and directing technological schools for the training of boys and girls in the great industrial trades of life. There should be a great technological school in every city of this land, and our boys should be encouraged to learn trades, to master trades, and to become masters in their trades.

We have too many counter-espies, too many scientists, too many novelists, and too few technicians trained in the practical arts of the country.
