Haleigh, Oct. 6 .- A renewed plea forcentting the costs of cotton proiction and for diversification - of the as the only safe insurance oring from over-production was ture William A. Graham last night. tille he hid not oppose the storing of the prospective cotton surplus, if it could be expeditiously and inexpensively done, he favors a "more farsighted and a more permanent solution." He advocates on this, as well as on previous occasions, the raising more food and feedstuffs, along is that might arise.

Parther, Commissioner Grahan inted that he did not consider its a in design as those built by engineers while policy for farmers to be kept over our biggest rivers, and he can continually in the position of being do it with the material at hand. The Samed to take temporary measures, scout can build a log cabine that will. ich as hasty and expensive storing last for years and will be as snug and of potton, when by diversification and could put themselves in a position of the hardest rain or the bitterest ashent security. If addid a growing wind dans the Commissioner Graham, in his for-
