52,285 Cars Pass Through The Longest Under-Water Highway Tunnel in World First Day It IS Opened For Traffic; Great Engineering Feat.

New York, Nov. 25-Fifty feet beneath the silt and sand of Hudson river bed two menstrous and gigantic east-iron tubes hie today—through which man drives his newest model automobile without wetting a tire.

For seven years those twin "serpents" have been evolving taking their toll of human life and brainuntil now they are finished, and we look upon one of the greatest engineer ing feats of the ages.

These great tubes are the Holland Tunnel-the reatest subaqueous high-Holland, who conceived the great dream-engineered the great featbut did not live to see the great tubes meet in mid-streat, varying but a mere fraction of an inch from his stupendous calculations. Mr. Holland died October 27, 1924—just three days before the "tapping through."

The opening of this new transportation artery makes it possible to drive and to the Conference, to lay aside into New-York City from the west your daily routine for one days time and south wihout being ferried across in order that you may come in conthe great Hudson.
