Wheat Campaign Gets Under Way

The wheat plan, under the Agricultural Adjustment Act, is definitely getting under way, with most of the authority and the work of administering it in the hands of the wheat farmers themselves.

In early August, according to M. L. Wilson, chief of wheat production adjustment, meetings will be held in all wheat growing communities in the State. Every wheat farmer is invited.

At these preliminary community meetings the plan will be discussed and explained fully, literature will be distributed, and farmers may apply for a contract. Three men will be elected at these same meetings to make up a community committee.

The community committee of three will review the applications for contracts, check the reported acreages and production, and make certification to the wheat administration.

The board of directors of the county association will elect three men to serve as the county allotment committee. This committee will check the application-report blanks, publish the lists in the local newspaper, and complete the contract for the grower to sign.

Soon after the middle of September, according to Mr. Wilson, those who have signed contracts with the Secretary of Agriculture to reduce their next plantings according to the requirements, will be paid the first installment of their cash compensation adjustment payment.

Results Being Reported From Canning Program

Northampton county home demonstration club women, operating 18 community canneries from two to five days each week, have already conserved over 10,000 cans of produce for relief causes, reports Miss Daisy Caldwell, home agent.

Producers bring their own products which are canned under the direction of the women in charge of the canneries. The products are marked with the name of the owner and placed in the community store room where they will be kept until next winter.

"The county has been suffering from a severe drought, but recent rains have revived the gardens and production is expected to increase steadily," says Miss Caldwell. At one of the smaller canneries, a day's record of 390 cans was made.

Miss Caldwell's program also includes canning at home where demonstrations have been given in home canning, brining, and kraut making. Glass jars to be filled are given to those who cannot otherwise obtain them.

Mrs. J. A. Flythe, relief worker, is cooperating in putting on the demonstrations with Miss Caldwell.

Commenting on the Northampton County work, Mrs. Jane S. McKimmon, state home demonstration agent at State College, says similar efforts are being made by the home agents in all parts of the State. Emergency home agents have been supplied those counties where no organized work has been under way and three specialists have been on the go constantly aiding the home agents in their canning programs.

Mrs. McKimmon hopes to have from eight to ten million cans of produce conserved at community canneries and in the homes of club women.

Six food-poison vaccination demonstrations were held in Alamance county last week at which time a total of 1,500 pellets were vaccinated.

TO CENTURY OF PROGRESS

(Continued from page one) ceived from this ride was when the cars first left the tower. I had a feeling that we were floating in mid-air and that we might drop any moment. Another attraction that I enjoyed very much was the Baby Ruth Swimming Pool. There were night shirt races and greasy pole races in the pool for the preliminary. The big attraction was Helene Madison, 1932 Olympic winner and Pete Desjardins, 1928 Olympic winner, and the only man ever to take two Olympic records in one year, Helene Madison demonstrated several of her winning strokes and Pete Desjardins did high and low fancy dives.

On the lake shore stands a perfect reproduction of Old Fort Dearborn. Every building except one is made of logs. The barracks and other buildings are furnished in pioneer fashion. Old wooden tables and an antique mantel furnish room for the displaying of old guns, dishes, clocks, a soldier's ration for a day, clothing of the pioneers and many other interesting relics. I considered this a very interesting exhibit and one that is well worth a person's time.

Just as I entered the fair grounds from the 12th street entrance the first thing I observed was the avenue of flags. Large iron poles leaning forward bore the beautiful red flags. When the wind is blowing the flags are flying with all the dignity and splendor that the unusual but marvelous surroundings lend.

Back of the Hall of Science I could see the General Exhibits Group, which is composed of five pavilions with a large tower in the front of each. As these pavilions are very large I could only obtain a general idea of the exhibits in them. One of the five sections is devoted to jewelry and cosmetics. I saw a miniature diamond mine

and the cutting and polishing of a diamond. The petroleum industry has an interesting exhibit showing how and where oil is obtained and the process of refining. In another section I saw a shirt being made. A display of gas ranges, rugs, and demonstrations of products not directly related to the World Fair is what these buildings are used for.

"Believe it or not" Ripley has an attraction at the fair. In his building are some of his "believe it or not people." In there I saw the girl with rubber skin, a man who draw three pictures alike at one time, a negro baby with four legs and 3 arms, a one man band, a mule face lady, a talking pigeon, a human pin cushion, and many other such people. Also he had an exhibit of "believe it or not" inanimate objects.

Appointed Attorney Home Owners' Bank

Greenville, July 27.—Julius Brown, Greenville attorney and former member of the Legislature, was today notified of his appointment as local attorney for the Home Owners Loan Corporation recently set up by the Federal government to give relief to owners of small homes. One of the offices of the association will be in Greenville.

Relieve that Pain

Does pain ruin your temper, spoil your looks, interfere with your business or pleasure? Millions of sufferers from Neuralgic Pains, Functional Pains, Ordinary Headache, Simple Neuralgia have found relief by using DR. MILES' Anti-Pain Pills. Why don't you try them? At all drug stores. 25 for 25 cents. 125 for \$1.00.

Got Over Weak, Painful Condition By Taking Cardui

"I was weak and run-down and suffered quite a bit with pains in my side," writes Mrs. Nick Barranco, of Deamont, Texas. "I was nervous. I did not rest well at night, and my appetite was poor. My mother had used Cardui with beneficial result, so I decided to take it. I surely am glad I did, for it stopped the pain in my side and built up my general health. I took seven bottles in all." For over 50 years, Cardui has been helping women just as this Texas lady describes above. Cardui is sold at all drug stores.

Henry Ford Dearborn, Mich.

IN ANSWER TO A LADY'S LETTER

A lady writes to say that she does not understand why an 8-cylinder car does not cost more to run than a car with fewer cylinders. She refers to my statement that our Ford V-8 develops more power on a gallon of gas than any car we have made.

The use of 8-cylinders does not mean the addition of two or four extra fuel consumers. It is not, for example, a 4-cylinder engine multiplied by two. Our 8-cylinder engine takes the fuel supply of an ordinary 4-cylinder engine and divides it eight ways. And why?

By reducing four larger explosions into eight smaller ones, we get engine smoothness and quietness. Eight-cylinders indicate the way the gas is used, not the amount. It is just the difference between going upstairs in four long jumps or in eight ordinary steps.

Two things use up gas—bad engine design and useless car weight. Besides having an engine that gets a high percentage of power out of the fuel, the Ford V-8 has a light, strong body and chassis so that no power is wasted in moving excess weight.

The only extravagance about the new Ford V-8 engine is in the building of it. The extravagance is ours—the economy is yours.

The whole question of car economy needs clearing up. An economical car gives economy all round. Price, operation, upkeep, all play their part. If what you save on gas you lose elsewhere, that is not economy.

As to upkeep, our dealers say that in recent years the improved quality of Ford cars has cut down their repair business 50 per cent.

As to price with quality,—judge for yourself. As to economy, here is the record of a stock car three weeks out of shop in Oklahoma:

On a run of 10,054 miles at the rate of 1,000 miles a day—the Ford V-8 gave 18.8 miles per gallon of gas. Not a drop of water was added to the radiator. The oil was changed once in 1,000 miles. That should answer a lot of questions.

July 24th, 1933

Henry Ford

You Get Big Car Performance in the New Ford

Eight-cylinder smoothness and flexibility give the New V-8 Ford a distinctive place in the low price field. Speed, power and rapid acceleration are among its outstanding features. Light weight and sturdy design insure economy of operation.

DRIVE THE NEW FORD V-8 AND BE CONVINCED

This is the Roomiest and Most Powerful Ford Car Ever Built
