All Hog Growers Eligible To Sign

All hog producers, regardless of their past hog production, now are eligible for hog reduction payments under a new ruling on the 1934-35 reduction contract, it was announced by W. W. Shay, swine extension specialist at State College.
 A previous AAA ruling specified that if the 1932-33 hog litter average was less than three, the contracting producer was not required to reduce

hog production in 1934, and in any event was not eligible to receive any hog reduction payments.

Under the new ruling, Shay says all producers will be entitled to reduction payments of \$5 per head on a number of hogs equal to 75 percent of their past average of market hog production, provided their litter average and production of hogs for market is reduced not less than 25 percent. In cases where the litter average is less than four, this means that the contracting producer will

have to reduce by one litter in order to comply with the contract, even though this will constitute more than a 25 percent reduction from the litter average.

The change in ruling was made in consideration of an unexpected interest in the corn-hog program among small hog farmers. These farmers now will have an opportunity to share in the proceeds of the processing tax being collected on the slaughtering of all hogs for market regardless of by whom sold.
