TOBACCO FARMERS! WATCH YOUR STEP

Farmers who have signed tobacco contracts, will not be allowed to sell leaf tobacco or scrap tobacco and pay the tax. The contract signer is permitted to sell the tobacco over his allotment on the allotment card of another contract signer, who is under his allotment, according to advice coming from the County Agent's Office.

The contract signer is not allowed in any instance to sell tobacco of a non-contracting signer without violating his own contract, which will be sufficient grounds for cancelling his contract, in which he will have to pay back all rental and equalization payments and will have to pay the twenty-five percent tax on all his tobacco in 1934 on all the farms that he owns or operates.

Growers are warned not to sell scrap tobacco to buyers who call at their farms without having same placed on their allotment cards. The Federal Government has men employed to check up on such sales and any violation of the above rules and regulations will forfeit the farmers contract.

Vetch And Clover Build Crop Yields

Last year a piece of bottom land owned by J. B. Echerd of Alexander County produced 110 bushels of corn by actual measure though the land has been in corn continuously for the past 25 years.

"The answer is that, every winter, this soil has been covered with a good crop of vetch and crimson clover," explains Enos C. Blair, extension agronomist at State College, who reported the facts. "The legumes are planted each fall and plowed under the following spring in time for the corn crop to be planted. In spite of the good yields which Mr. Echerd has harvested there is as yet no apparent diminution in the fertility of the soil. Prospects are good for a heavy crop of corn to be harvested from the bottoms this season."

Another farmer in Alexander county, John Sipe, began growing vetch and crimson clover on a piece of bottom land in 1920. At that time, the land was producing an average of about 20 bushels of corn to the acre. Last year it produced 60 bushels and the crop in 1934 looks better than it did in 1933.

But vetch and clover are not the only two legumes which build soils, Mr. Blair points out. On the farm belonging to the Barium Springs Orphanage in Iredell County, alfalfa is the principal crop. This institution has two large fields seeded—one on one field the crop is four years old and on the other, eight years old. Despite this, the alfalfa was free of weeds and crab grass due to regular cultivation with a spring tooth harrow. The two fields have averaged three tons of hay to the acre so far this season and the land is improving in fertility.

Alfalfa hay is selling now for \$30 a ton in North Carolina at farm prices and the average of three tons to the acre being harvested means an income of \$90 an acre. The maintenance cost after the first planting is practically nothing, Mr. Blair says.

Peanut Program Is Planned For Eastern Carolina

North Carolina farmers planted 205,000 acres of peanuts in 1933 but in most counties the acreage was small and of little economic importance. In 13 eastern counties, however, the crop is of tremendous economic importance and growers are concerned over the proposed marketing agreements to be started with the crop this fall and worked into an adjustment program with the crop of 1935.

North Carolina farmers, also will be glad to know that the peanut program is in the hands of J. R. Hutson, who has handled the flu-cured tobacco situation so satisfactorily to this State. Dean I. O. Schaub, head of the extension Service of State College, says the counties most largely affected by the proposed program with peanuts are Halifax, Northampton, Gates, Bertie, Chowan, Pitt, Currituck, Perquimans and Washington. He has not yet designated an extension worker to have charge of the plan in the State but will do so as soon as

Simmons Against New Constitution

Says Many of Its Provisions Are Repugnant to Principles of Popular Rule

New Bern, Sept. 4.—In a letter to Dr. John B. Wright, Raleigh, former U. S. Senator F. M. Simmons today voiced emphatic opposition to the proposed new State Constitution, commended Attorney General Brummitt on his fight against the measure and paid a compliment to Governor Ehringhaus without mentioning him by name. Following is the text of the Simmons letter:

"Replying to your letter of recent date suggesting that I make a statement for publication, of my position with reference to the proposed new Constitution, I wish to say I am most emphatically opposed to the ratification of this measure. Many of its most vitally important provisions are repugnant to the fundamental principles of our hereditary system of government by the people and for the people. To safeguard these principles our pioneer forefathers pledged their fortunes and their lives.

Centralizes Power For government by the people and for the people this document would substitute government for the people by the chief executive of the State in cooperation with certain agencies of the State, counties and municipalities, the members of some of which he would appoint.

"The dangers of these proposed changes in our system of government are greatly increased by the ancillary provisions of the document, practically removing all restrictions upon the amount of indebtedness which these various agencies within their respective jurisdictions may incur, as well as the rate of taxation they may impose upon the property and the heads of the people, without regard to age.

Necessary to Act Now

"If the people would forestall and safeguard themselves against the manifest dangers inherent to these provisions of the proposed Constitution, they must act now by defeating its ratification in the coming election. If they fail and these extraordinary powers are conferred by the Legislature and thus protected against legislative action, it requires only ordinary foresight to forecast that if ratified there will be in all probability sooner or later evolved a State-wide political organization with practical control of the entire election machinery of the State. (In this connection it should be remembered that we may not always have, as we now have, a governor who we know would frown upon such political devices.)

"Manifestly in such a situation only the most heroic action on the part of the people would restore to them the right of self-government and the control of their local affairs.

"Beyond all dispute there are many admirable and desirable provisions in the proposed new Constitution, but their importance pales before the dangers of its obnoxious provisions.

"It is indeed unfortunate that the people, under the act of submission should be required to vote for or against the proposed Constitution as a whole.

"Before concluding I wish to express my admiration of Attorney General Brummitt's brave and able fight against these dangerous innovations."

details are worked out at Washington.

A conference was held at Washington on August 30 for the purpose of determining the details of the marketing agreements to be in force this fall and a public hearing was held the following day, August 31, to determine the rate and scope of the processing tax which will be used with the production adjustment program next year. Full details of the plan will be completed and contracts are expected to be made available to growers before October 1, Mr. Schaub says.

Under the plan proposed benefit payments would be made this season on that portion of the peanut crop diverted into oil which would bring the returns of such a portion in line with the returns from the part of the crop used for shelled goods. This will allow growers to divert, without loss, a part of their crop to oil, depending on the prices being paid for shelled goods, Mr. Schaub said.

Answers Timely Farm Questions At State College

QUESTION: What minerals are necessary for laying birds?

ANSWER: The usual mineral feed are bone meal, oyster shell or ground limestone, salt and grit. These are necessary for growth and repair of the body. Bone meal helps build bone and tissue; oyster shell or ground limestone are used for the calcium content; salt stimulates the appetite, and grit grinds the food. These minerals should be kept before laying birds at all times.

QUESTION: Can peanuts be grown year after year on the same land?

ANSWER: The crop may be grown year after year but not successfully. For best re-

Death Claims C. H. Crawford

Funeral Services For Bell Arthur Community Man Held This Afternoon

Greenville, September 4.—C. H. Crawford, 53, influential farmer of the Bell Arthur community, died last night at 9:45 o'clock, after two days' illness from pneumonia.

Funeral services were conducted from his late home this afternoon at 2 o'clock by Rev. Walter Nobles of Winterville, and burial was made in the Elks graveyard at Ballards.

Mr. Crawford spent all his life in the community where he died and was active in the agricultural and civil life of the section.

He is survived by his wife, formerly Miss Mollie Elks, daughter of the late William Henry and Nancy Elks, a son, W. L. Crawford, and three brothers, James H., John R., and Leon Crawford, all of the Bell Arthur community.

Pall bearers are: John Pilgreen, John Nichols, Charlie Davenport, Kid Tyson, Raymond Tyson, and Leon Tyson.

peanuts should not be grown on the same land more often than once in three years. A crop rotation should be planned with a cover crop, preferably a legume, being turned under the second year of the rotation. Where bacterial wilt, black root rot, and white or brown stem rot appear in the fields such crops as tobacco, Irish potatoes, tomatoes, soybeans, and cowpeas should be left out of the rotation and corn and small grains substituted.

QUESTION: What benefit is secured by plowing under green tobacco stalks?

ANSWER: In addition to affording a certain control over insect pests and diseases, the plowing under of tobacco stalks immediately after harvest also has a beneficial effect on the soil. These stalks contain potash, nitrogen and some phosphorus which is released in the soil through decomposition. These elements run about 100 percent for potash and from three to five percent for nitrogen.

Cadet Turnage Extends Welcome Return of Cadets

More than fifty cadets, members of the Class of 1933, United States Military Academy, West Point, spent the Labor Day week-end in New York, (N. Y.) and made their headquarters at the Hotel Astor. Several of the group were the dinner guests of Edgar W. Wallman, the hotel's Army host, in the roof garden Sunday evening.

On Monday evening, August 27, 125 members of the Class of 1936 and their guests, attended the annual furlough dinner dance in the roof garden of the Astor. Class President Benjamin O. Turnage of Farmville, N. C., welcomed the cadets who returned to their studies at the Academy after a Summer furlough.

Trench Silo Described In New Bulletin

The trench silo has become one of the most popular and inexpensive types of silos to store the feed needed each winter in North Carolina.

During the past year hundreds of mimeographed plans for building trench silos have been distributed to interested farmers but the demand for these plans became so heavy that an extension bulletin, "Silage and the Trench Silo" has been written by John A. Arey, dairy extension specialist, and D. S. Weaver, agricultural engineer at State College, and issued as Extension Circular No. 201.

Corn and sorghum are the foremost crops advised for use as silage and should be cut when they contain maximum feed nutrients and at the same time sufficient moisture to cause the silage to pack well. The amount of silage needed on

Texas Lady Tells How Black-Draught Laxative Helps All Her Family

Here's how Black-Draught fills the needs of a family laxative in the home of Mrs. J. E. Baker, Fort Worth, Texas: "The grown-ups in my family," she writes, "have always taken powdered Theodore's Black-Draught for biliousness, headaches and other ailments (due to constipation) and found it a reliable remedy. I was very pleased when I saw Syrup of Black-Draught advertised. I bought it and gave it to my little daughters, ages 3 and 4. They needed something to cleanse their systems and Syrup of Black-Draught acted well. Your drugist sells this reliable laxative in both forms. Children like the Syrup."

DAVIS HOTEL Rooms—\$1.00 and \$1.50 All Meals—Each 50c Try Our Sunday Dinner

SALESMAN WANTED FOR OUTSIDE work. Must have a high school education and be a hustler. References required. Good pay. Address P. E. E. Moss, Wilson, N. C.

any farm is determined by the number of animals to be fed. The acreage required to produce a given amount of silage depends largely upon the fertility of the soil. Information is contained in the bulletin on the amount of ensilage needed and the acreage to plant. The trench silo is inexpensive to construct and has given thousands of cattle-keeping people of North Carolina excellent results during the past two years. It is recommended as a type that is well adapted to the medium or small-sized herd and among the advantages enumerated in the bulletin are its low cost of construction, and fire and wind proof. The most important factors to be considered in locating the trench silo are: drainage, soil, and convenience. The location must permit good surface drainage. Copies of the circular may be obtained free of charge on application to the Agricultural Editor at State College.

... BUT ISN'T DEFROSTING A NUISANCE? OH, YOU MUST BE THINKING OF OLD-FASHIONED REFRIGERATORS. Ours is a Frigidaire '34' What a hit the Super Series Frigidaire '34 makes with its automatic defrosting! ... it turns itself on when defrosting is completed! But that's only one of its fine features. It has automatic ice tray release, too, and double Hydrator capacity; interior lighting; the Sliding Utility Basket; the new Frigidaire Servashelf; and Lifetime Porcelain—inside and out! These are some of the things you'll hear about if you listen to folks talking about the Super Series Frigidaire '34. Better come in and see these conveniences for yourself! Better still, have them for yourself. We've made it very easy! Here is a Frigidaire that Uses Less Current than one Ordinary Lamp Bulb! FARMVILLE MOTOR CO., Inc. FARMVILLE, N. C.
