Mr. Arnolds Says Use of Nitrogen Will Pay Larger Dividends

Money invested in nitrogen for spring application to small grain will pay larger dividends than any other investment made in the production of the grain, declares Mr. E. F. Arnold, County Farm Agent. The North Carolina Experiment Station has conducted a large number of tests to determine the value of various nitrogenous fertilizers, and the best amounts to use. With wheat, 100 pounds of nitrate of soda will give five to eight bushels increase. At present prices, a five bushel increase will give \$3.30 per acre above the cost of nitrate of soda. Wheat will not give as large an increase for the second hundred pounds of nitrogenous fertilizer. For this reason 100 to 150 pounds of nitrate of soda is recommended.
Oats pay well for nitrate of soda up to 200 pounds. Usually the first hundred pounds will give 15 bushels increase and the second hundred from 10 to 15 bushels increase over the first.
To get the best results, top-dressing on small grain should be done early.
The nitrate of soda can be applied broadcast over the small grain without any covering, but it is advisable to run over the small grain after applying the nitrate of soda with a weeder or a drag harrow with the teeth turned back, says Mr. E. F. Arnold.
Any of the winter crops grown for hay will pay good returns for 150 pounds of nitrate of soda per acre. The nitrogenous fertilizer should be applied to the hay crops at the same date as for grain.

Electric Hand standard on Hudson Custom Eight; optional (for small amount extra) on all other Hudsons and Terraplanes.
And the longer motorists drive with the Electric Hand, the better they like it! Faster, easier, smoother shifting, without taking a hand from the wheel! Nothing new to learn!
FIRST ROOFS OF STEEL!—Second "hit feature" of the year! Again Hudson and Terraplane score—with the first steel roof, and the only bodies all of steel.
EASIER RIDING!—Third in point of 1935 interest. With the other things that make cars ride easier, Hud-son and Terraplane combine an exclusive method of springing—to give you the balanced ride.
AND THAT ISN'T ALL!—Greater performance than ever, from "the world's finest and smoothest performing stock cars." Ruggedness—proved in the recent 175,000-mile Ruggedness Runs. And Bendix Rotary-Equalized Brakes—quicker, safer, straight-line stopping.
Before you buy, look at all the new cars—compare them—and let the best car win.
