

Robertson Explains FHA Credit System

There seems to be some misunderstanding about loans on rural property under the Federal Housing Administration, says A. K. Robertson, state rural housing supervisor at State College.

The FHA plan operates solely on funds or credit made available through local institutions, he explained. The government is not making any loans under this plan.

County rural housing committees have been and are being set up to aid farmers secure loans on reasonable terms. The committees are also ready to offer suggestions about rural housing improvements.

Under the FHA plan, loans are made to finance the repairing or improvement of farm homes, buildings, and other permanent equipment. Any responsible farmer may apply for amounts up to \$2,000. Repayments are to be made over a period of one to five years.

The Federal land bank loans, land bank commissioner loans, and production credit association loans do not come within the scope of the FHA program, Robertson pointed out, since they are designed for other purposes.

However, he said, the land bank loans can be secured for the purpose of buying equipment and materials for farm buildings, but these loans must be secured by first mortgages.

The FHA committees and officials have negotiated agreements with large numbers of local institutions to supply loans or credit under the housing program, Robertson added, and all farmers who wish to improve their homes are being urged to take advantage of these facilities.

DELEGATES SELECTED NATIONAL CLUB CAMP

Ruth Kiker, route 2, Polkton, Anson County; Dorothy Lloyd, Durham; Charles Palmer, route 1, Lenoir, Cleveland County, and Wm. Edward Pollock, route 1, Trenton, Jones County, have been selected to represent North Carolina 4-H club members at the 13th annual national club camp to be held in Washington, D. C., June 13 to 19, announces Dean I. O. Schaub, director of the Extension Service at State College.

Miss Kiker is 18 years of age and has been a member of the Anson County poultry club since she was eight. She specializes in R. I. Reds and grows from 600 to 1,000 broilers each spring. She keeps a flock of 100 laying hens. She has done efficient work in room improvement, food conservation, clothing and foods and nutrition. Her club work has profited her \$1,808.27 and has been the means of her attending college during the past year. She is a leader in her local and county organizations and a member of the State 4-H honor club.

Miss Lloyd is 19 and has been a club member for nine years. She has an outstanding record in clothing, home-making, canning, foods and nutrition, recreation and other projects. In the summer of 1933-34 she canned 416 quarts of fruits and vegetables to earn money for school. She is vice-president of the State 4-H club; won a trip to the national club camp; won a trip to the national club congress and has attended the State short course. She has held all the important offices in her county organization and directed the local 4-H club camp in Durham county.

Charles Palmer is 20 and has completed eight years of club work. He is vice-president of the State 4-H council; was king of health in 1932, and has made a notable record in corn, cotton and poultry projects. His interest in club-work has advanced the program in Cleveland County.

Wm. Edward Pollock is 18 and has completed five years of club work. He has won notable success in the corn and pig club projects, is the leader of his local club and represented Jones County at the annual short course.

The Atlantic Coast Line Railroad is cooperating with the Extension Service of State College to send Miss Kiker and Mr. Pollock to the national camp.

SUPERGIANT SNAPDRAGON PLANTS FOR SALE NOW ready for transplanting, 1c each while they last. Mrs. J. FRANK HARPER.

STAYED: — 1 black mare mule, about 7 years old, weight about 1,800 pounds. Left premises of George Jones, on Churchill Farm in Greene County, Sunday night, May 25. Please notify George Jones, Hoshorn, N. C., Box No. 1 or J. R. Tarrance, Ayden, N. C.

SANITARY REPORT MAY, 1935

No. of herds of swine treated having cholera	0
No. of herds of swine treated against cholera to June	287
No. of swine treated against cholera December to June	2,287
No. of dogs vaccinated against rabies	26
No. of dogs vaccinated against rabies, Dec.-June	53
No. of dogs having rabies in May	43
No. of premises visited on sanitation	90
No. of visits to premises on sanitation	90
No. of health talks given	2
No. of dairy farms inspected	25
No. of premises with insanitary excreta disposal system	25
No. of premises with questionable water supply	20
No. of premises properly screened	20
No. of water samples tests	8
No. of Privies built or improved	8
No. of Milk samples examined	7
No. of Milk samples tests	7
No. of Administrative conferences attended	2
No. of Post-mortem examination of carcasses of animals for possible disease communicable to man	15
No. of Demonstrations to promote health work	3
No. of Food handling establishments inspected	10
No. of Fly eradication program in full swing.	10

RECOMMENDATIONS:

1. Authorization by Town Officials of setting and maintenance of at least 20 municipal fly traps.
2. Greater effort to be made by citizens in controlling and eradicating breeding places of flies.
3. Greater effort to be made by citizens to keep papers and tin-cans, etc., picked up to prevent litter from getting into newly cleaned ditches.
4. Early repair by property owners of privies or installation of new ones or sewer connections and repair of same.
5. Greater effort to trap and eradicate the rat population.
6. General change in method of municipal garbage disposal to prevent accumulation and breeding of flies.
7. Greater effort on part of property owners to properly screen both their own and tenants houses.

Respectfully,
DR. H. B. SMITH, Farmville Health Officer.

10 Commandments For Auto Drivers

Charlotte, June 12. — Although fatalities for the nation during the first quarter of 1935 show a decrease over the number for the same period of 1934, deaths in the Carolinas this year show an increase, according to the safety division of Carolina Motor Club.

For the four months ending May 1 there were 480 traffic deaths in North and South Carolina compared with 371 in 1934—an increase of 79. Increase in the size of North Carolina State Highway patrol to 121 men, effective July 1 and the statewide driver's license law which goes into effect November 1 are expected to sharply curb fatalities in North Carolina during the last half of the year.

Ten commandments for safe drivers are listed by the Carolina Motor Club as follows:

1. Thou shalt sound thy horn and make sure that the vehicle operator in front hears the warning signal before attempting to pass.
2. Thou shalt respect the rights of others and show courtesy to thy fellow motorist with all thy ability.
3. Thou shalt not stop or turn without executing a hand signal in keeping with thy intention.
4. Thou shalt not drive thy vehicle into a moving lane of traffic unless it can be done without endangering thyself or others.
5. Thou shalt question and determine the right understanding on any doubtful motor vehicle laws or rules of the road.
6. Thou shalt not allow a minor to operate thy vehicle or allow thy vehicle to be operated by a careless or irresponsible person.
7. Thou shalt determine that thy vehicle is in good mechanical condition before operating this vehicle.
8. Thou shalt not drive at a high dangerous rate of speed, pass on curves or brows of hills unless the

roadway is clearly visible five hundred feet.

Thou shalt have no other object before thee than to create safety for thyself and others in all of thy driving habits.

**BOLL WEevil WARNING
ISSUED BY BRANNON**

A warning that boll weevil infestations in North Carolina may be heavy this year was issued last week by C. H. Brannon, extension entomologist at State College.

Climatic conditions during the winter and this spring have been favorable to boll weevil development, Brannon pointed out, and if cloudy, rainy weather occurs frequently during the cotton growing season, weevils will be numerous.

During the latter part of 1934, he continued, the weevil infestation in this State was heavy enough to leave a large supply of weevils for this season. Winter temperatures were not low enough to kill all the hibernating insects.

The weather so far this spring has been conducive to their development. All cotton growing counties

of the State will probably be affected, Brannon said, and indications are that damage will be heavier than usual in the Piedmont area.

He is urging cotton growers to prepare now for controlling the weevil. "Bill weevil poisoning is recommended by both State and the Federal agricultural agencies, and it should be considered a regular part of making the cotton crop," Brannon said.

"Do not wait until the weevils attack the cotton in great numbers. Get your machines in order now. Lay in a supply of poison. Prepare to fight the boll weevil—and pick all the cotton allowed you under your government contract.

"When the squares begin to form, make weekly examinations of the squares. As soon as weevils are detected, start spraying or dusting. Don't raise your cotton for weevil food."

WHOSE WORD WILL YOU TAKE FOR BLOWOUT PROTECTION?

Low wheels, larger tires, and the high speeds of today make blowout protection in your tires vital to your safety as never before. Are you accepting exaggerated and unsupported advertising and sales claims—or are you accepting the judgment of men who risk their lives on their tires and know from experience the tire that gives them the greatest blowout protection?

Thirty-three race drivers and their mechanics lined up for the dangerous, grueling grind of the 500-Mile Race at the Indianapolis Speedway May 30th. Firestone Tires were purchased and used on every one of the thirty-three cars.

Kelly Petillo won the race at an average speed of 106 miles per hour. Wilbur Shaw was second, flashing across the finish line just behind the winner. Both drivers broke the track record without tire trouble. In fact, not one of the thirty-three drivers had tire trouble of any kind.

For sixteen consecutive years Firestone Tires have been on the winning car. The race this year simply emphasizes again the undisputed evidence that Firestone Gum-Dipped Tires have the greatest stamina and blowout protection.

Gum-Dipping is one of the outstanding reasons why Firestone Tires give such amazing performance. By this process every cotton cord is soaked and every strand is insulated with pure liquid rubber, preventing internal friction and heat, the main cause of blowouts. Gum-Dipping is a patented extra process not used in any other make of tire.

When you consider that there were 882,000 automobile accidents in the United States last year, and of these, 43,000 were caused by blowouts, punctures, and skidding, you will more fully realize how very important it is for you to protect your life and the lives of others by equipping your car with Firestone Gum-Dipped High Speed Tires—the safest tires built.

It will be worth your time to read these three questions and their answers:

QUESTION 1—"Will the tread give me the greatest traction and protection against skidding?"

ANSWER—Leading university tests show Firestone High Speed Tires stop your car 15% quicker than the best of other popular makes of tires.

QUESTION 2—"Are they built to give me the greatest blowout protection?"

ANSWER—Unequaled performance records for sixteen consecutive years prove that Gum-Dipping gives you the greatest blowout protection ever known.

QUESTION 3—"Without sacrificing these two important safety features will they give me longer mileage, thus making them the most economical tires I can buy?"

ANSWER—Thousands of car owners report unequaled mileage records—evidence of the longer wear and greater economy of Firestone High Speed Tires.

- and here's why

With plenty of space to store food, plenty of cold to keep it fresh, you save four ways.

- FIRST, you save what you are wasting by spoilage.
- SECOND, you save by taking better advantage of Saturday food sales.
- THIRD, you save by buying food in larger quantities at better prices.
- FOURTH, you save by making the most thrifty use of left-overs.

Then, in addition to food savings, there is the saving in refrigeration cost because of the extremely economical operation of the Rollator cold-making mechanism. It is a fact that the Rollator uses so little current that you scarcely notice it on your light bills. Norge owners report savings up to \$11 a month in household expense.

Come in and let us give you specific facts and figures. Learn all about Rollator Refrigeration. See the Norge.

THE ROLLATOR COMPRESSOR... smooth, easy, rolling power instead of lurching back-and-forth action. Results—more cold for the cost.
