#### FIRST INFANTILE CASE FOUND HERE

It was determined Monday when fluid was drawn from his spine and tested at a Tarboro hospital that the illness of J. W. Harrell was infantile paralysis.

He was taken about three days before the test with severe vomiting and a high fever. Later an aching of the back set in and a stiffness in the neck. He is affected on the left side which is practically lifeless.

J. W. is the ten year old son of Mr. and Mrs. Ernest Harrell of the Carr farm. Mrs. Harrell was before her marriage was Miss Maudie Lee Abrams.

This is the first case of infantile paralysis Dr. S. H. Justa of this place has had. He says that the disease is catching for three weeks, as the patient carries a fever for this period of time.

The recent hail storm in Nash County devastated a section two miles wide and about 15 miles long with cotton being damaged more than tobacco.
