Interest In School For Adult Education Increasing Daily

Miss Florence Lewis, teacher in school of Adult Education here reports that interest is increasing daily, though the class is not yet half as large as she would wish. Any citizen of this community who knows of any white adult of the section who is unable to read or write would be helping greatly if they would call Miss Lewis so that she may get in touch with these people and enroll them in her class.

It is staggering to know that in the United States there are more than 12,000,000 men and women who are not functionally illiterate, and thus have a chance to become literate. Since these individuals are still in need of elementary instruction, ranging from primary through seventh grade levels, the work of Adult Education is planned to meet their needs and interests, and is called adult elementary education.

Such a course should make it possible for these men and women to live more abundantly and more effectively in their communities. Teachers of these adults, while drilling on seemingly commonplace "tool" subjects, are inspired by such aims as these: To develop interests and capacities in their students which will help them to shoulder their own responsibilities and meet community problems more intelligently; to develop self confidence by overcoming handicaps and to stand on an equality with their fellows; to stimulate an interest and love of learning, which will not end with formal training but continue through life.

Do you realize that such an individual, who stands so much in need of this assistance, can never become acquainted with this opportunity unless you who can read this message will bring it to his attention and assist him further perhaps by being enrolled.

The class meets in the municipal building from three to five o'clock in the afternoon and from 7:30 to 9:30 each evening.

Do you want to SAVE MONEY?

The Standard Ford V-8, with 60-horsepower engine, gives you a lot of car for a little money. 300,000 new owners acclaimed the "thrifty 60" last year. Hundreds a day are buying it in 1938. Why? Because it is priced low—includes essential equipment without extra charge—and goes farther between filling stations than any Ford car ever built. Owners all over the country report averages of 22 to 27 miles on a single gallon of gasoline. But economy isn't all the story by any means. The Standard "60" is built with the same precision as the De Luxe "65," and has the same 112-inch wheelbase chassis. It is easy to look at and ride in—as well as easy to buy and run. There's a Ford dealer near you.
