Individuals who pay heavy taxes
are rarely pleased with any tax
measure.

It might be well to drive carefully
—more than one hundred persons are
killed in highway accidents every day.

Japan will probably win many bat-
tles in China, but, at least, the Chi-
nese have scored one important vic-
tory.

When a political campaign gets un-
derway, you need not expect much
reason in the discussions that you
hear.

When a salesman offers to sell you
something at a loss to himself, you
can save money by rejecting his gen-
erosity.

You can get a lot of fun out of life
sometimes if you will keep your
mouth shut and listen to what other
people say.

One method of determining whether
you are smart or not, is to find out
whether you read to learn or to con-
firm your previous opinions.

**EXPOSING GRAFT NOT
MUD-SLINGING**

The coming political campaign can
be fought on a high plane and argued
in intelligent speeches, or it can be-
come a mud-slinging effort to be-
smirch opponents.

We do not believe that the people
of Farmville appreciate what some
candidates seem to consider legiti-
mate warfare. There is no use to
regale the crowd with epithets applied
to people who think other than the
speaker and the efforts of many pub-
lic speakers to "be smart" is usual-
ly achieved at the sacrifice of com-
mon sense and good taste.

There is, however, a legitimate field
of criticism in every public campaign.
That revolves around the official acts
of the various candidates. Even this
criticism should be delivered fairly
with moderation and calmness. The
popular reculsion to mud-slinging is
often seized by political crooks as a
foil to stop fair thrusts at vital re-
cords.

The public record of any candidate
is a legitimate target. If a candidate
has violated the law, if he has grafted,
if he has favored his friends, if
his acts are against decent public
policy, if he is the nominee of crooked
associates, and for other reasons, de-
serves condemnation, then he ought
to be denounced. No need for pussy-
footing. Let right-thinking, clean-
minded public men call a spade a
spade; the public ought to have
enough sense not to confuse this with
mud-slinging, personal abuse.

personal income of the stockholders.
In the case of individuals with large
incomes, the loss might be consid-
erable.

Old Tax Rate High.

The reader should not lose sight of
the fact, however, that corporations,
under prior law, paid a normal tax
of from eight to fifteen per cent. of
their earnings, plus a tax ranging
from seven to twenty-seven per cent.
on undistributed profits. It is this
extra tax on undistributed earnings
that the President insisted upon.

Without it, he says, the partner-
ship or individual proprietor is dis-
criminated against as compared to
the corporation. Moreover, without
it, the avoidance of surtaxes through
the use of corporations becomes a
readily available device for those per-
sons in the higher surtax brackets
who seek legally to keep their net
personal incomes down for tax-pay-
ing purposes and to hide their actual
profits by leaving them undistributed
in the corporations they own.

ADMINISTRATOR'S NOTICE

**Health-Wrecking Functional
PAINS**

Severe functional pains of
menstruation, cramping spells
and jangled nerves soon rob a
woman of her natural, youth-
ful freshness. PAIN lines in
a woman's face too often grow
into AGE lines!

Thousands of women have
found it helpful to take Car-
dul. They say it seemed to
ease their pains and they no-
ticed an increase in their ap-
petites and finally a strength-
ened resistance to the dis-
comfort of monthly periods.

Try Cardul. Of course if it doesn't
help you, see your doctor.

BOYS IS PUTTIN' OUT
NATCHEL SODY!

Nothing takes the place of a good side dressing with
Natural Chilean Nitrate of Soda—"Natchel Sody", as
Uncle Natchel calls it.

Like children, crops need lots of food when they really
start to grow. That's why it is so important to side dress
your crop with Natural Chilean Soda—to supply quick
acting nitrogen just when it is needed.

Chilean Nitrate is valuable not only as a source of nitrogen,
but also to furnish or build up a reserve of small amounts
of other plant food elements naturally blended with it.

"Natchel blended . . . dat's
de secret," says Uncle Natchel
