

WALSTONBURG NEWS

Mr. and Mrs. Wayne Boyt of Lucoma are guests of Dr. and Mrs. W. A. Marlowe Sunday.

Mr. and Mrs. Jesse Gay spent Sunday in Leggett's with Mr. and Mrs. S. O. Bundy.

Mrs. W. V. Riddick, Mrs. C. T. Hicks, Mrs. W. A. Marlowe, Mrs. E. L. Jones, Mrs. G. W. Bailey and Miss Lillian Corbett attended the tulip festival in Washington, Friday.

Mrs. W. P. Edmonds of Raleigh spent a few days here last week with her sister, Mrs. W. Earl Lang.

Friends will be glad to learn that Mrs. I. J. Rouse has sufficiently recovered from a recent illness to have returned to her home here from a Wilson hospital.

ENTERTAINS AT A BARBECUE DINNER Mr. and Mrs. J. C. Gardner entertained the Walstonburg School faculty and several other friends at a barbecue dinner Sunday, April 16.

JUNIOR-SENIOR BANQUET The Junior Class of Walstonburg High School entertained the Seniors at the Annual Junior-Senior Banquet Wednesday evening, April 12, in the Carolina Room of the First Christian Church in Wilson, N. C.

REPORT OF THE CONDITION OF THE BANK OF FOUNTAIN FOUNTAIN, NORTH CAROLINA, At the close of business March 29, 1939

Table with columns for ASSETS, LIABILITIES, CAPITAL ACCOUNT, and MEMORANDA. Includes items like Loans and discounts, Demand deposits, and Capital.

MEMORANDA 34. (a) On date of report the required legal reserve against deposits of this bank was \$12,227.20

Helen Hinson, Marjorie Holloman, Helen Hinson, Marjorie Holloman, Mewborn, Katura Moore, Virginia Moye, Juanita Redick, Lewella Sawyer, Mary Virginia Sugg, Edna Ruth Taylor and Leona Tugwell.

Seniors: Alene Bailey, Mary Elizabeth Beaman, Grace Dildy, Estelle Ellis, Susie Hardison, Evelyn Hardison, Bernice Mewborn, Ruth Carol Nix, Elizabeth Parker, Helen Shelton, Katie Walston, Ida Elizabeth Westbrook, Hattie Mae Whitley, Warner Burch, Richard Gay, Edgar Gay, Ray Goin, William Hinson, Edward Litchworth, W. D. Litchworth, Oliver Moye, Fred Shackelford, Bryon Shirley, Ralph Shirley, Bruten Taylor and Lester Matthews.

Faculty Members: Miss Margaret McKinney, Miss Norma Lee Dawson, Mr. W. V. Nix, Mr. M. C. Moore and Mr. R. W. Allen.

Temporary Grazing Is Used By Dairymen

Planting of soybeans, sudan grass, lespedeza and sweet clover for summer and fall grazing should be in progress now and may be continued until mid-summer, advises John A. Arey, dairy specialist of the State College Extension Service, who says grazing of cultivated crops is an ideal way for dairymen to lower the production cost of milk.

This practice is especially valuable in areas where the soil is sandy, because in regions with clay soil the cows pack the ground when it is wet and it is hard to break for corn and other crops to follow, Arey explained.

Biloxi soybeans planted this month in rows about 24 inches apart and fertilized with about 300 to 400 pounds of a 3-8-6 fertilizer will provide abundant nutritious grazing by June, the specialist said. This variety of beans can be grazed three or four times during the summer at intervals of about 15 days if all the leaves are not removed at any one time.

Sudan grass should be seeded at the rate of 30 pounds per acre on good land and fertilized with 400 pounds of a high grade complete fertilizer. It will furnish excellent grazing within about six weeks after seeding. Sudan grass is drought resistant and therefore will prove valuable in supplementing permanent pasture during the hot, dry period of July and August.

Lespedeza should have been sown on small grain in February or March. The Korean variety is one of the best for grazing. Sweet clover is not as palatable as lespedeza, but it will produce more grazing per acre than any of the crops previously mentioned.

All indications point to this year's Farm and Home Week at State College as the best ever to be held. The event takes place July 31, to August 4.

Washington Farm News

(Hugo S. Sims, Washington Correspondent.)

FARM PRODUCTS PRICES. DOWN FOR 3RD MONTH. ABOVE AVERAGE SUPPLY. OF FEED GRAIN CERTAIN. PROSPECTS FAVOR LARGER EGGS, POULTRY PRODUCTION.

Lowering of the general level of local market prices for farm products by 1 point is reported by the Bureau of Agricultural Economics for the month ending March 15. This, the third consecutive month in which a decline has occurred, brought the index to the lowest point since July 1934.

The mid-March index prices received by farmers was reported by the Bureau as 91 per cent of pre-war compared with 92 per cent in February and with 96 in March 1938.

The index of prices paid by farmers, at 120 per cent of pre-war, was unchanged from the level reported for each of the previous 3 months, but 5 points lower than in March 1938. With the lowering in the index of prices received, however, the exchange value of farm products declined 1 point to 76 per cent of pre-war, or 1 point lower than in March last year.

The index of prices paid by farmers, at 120 per cent of pre-war, was unchanged from the level reported for each of the previous 3 months, but 5 points lower than in March 1938. With the lowering in the index of prices received, however, the exchange value of farm products declined 1 point to 76 per cent of pre-war, or 1 point lower than in March last year.

Except for dairy and poultry products, which usually decline in March, prices for the individual commodities moved with a narrow range during the month. Grain prices were unchanged with fractionally higher prices of corn, oats, and barley offsetting lower prices for wheat, rye, and rice.

Domestic wheat prices averaged only one-fifth of a cent a bushel lower on March 15 than a month earlier despite sharp declines in world markets. Higher wheat prices in some of the eastern areas failed to offset minor declines in the West. Central and Mountain areas. Corn was one-half cent a bushel higher due to slightly higher prices in areas outside of the main corn producing region.

Local market prices of hogs declined 11 cents per 100 pounds, rather sharply in contrast with the usual advance of about 5 per cent for the month. Beef cattle advanced 14 cents per 100 pounds to \$7 per hundred, the highest average for the month since 1930. The advance of 6 cent per 100 pounds in lamb prices was slightly less than the usual increase although the March 15 average was 8 cents above the level a year earlier.

A supply of feed grains per animal unit about the same as the pre-drought average is in prospect for the 1939-40 season, the Bureau of Agricultural Economics reports. The supply is expected to be smaller than last year, however.

This prospect for the 1939-40 feeding period, the Bureau said in its spring outlook issue of the Feed Grain Situation, is based on 1923-32 average yields, normal abandonment on prospective plantings, which an allowance for a considerable increase in the livestock population, particularly in hog and poultry numbers.

It was pointed out that with these assumptions, production of corn, oats, barley, and the grain sorghums this year would be around 91 million tons. This would be about 6 million tons less than in 1938 and 9 million tons below the 1929-32 average. But the prospective large carry-over into the 1939 harvest season probably would bring total supplies of feed grains for 1939-40 to "about the pre-drought average."

The large stocks of corn reported by the Bureau as of January 1 indicate a record carry-over into the 1939-40 marketing year. The carry-over of oats probably will be above the average for the 1929-33 period, but below the carryover on July 1, 1938.

Should yields be as high this year as in the past 2 years, production would be about the same as in 1938 and total supplies would again be above average. High yields in 1937 and 1938 were attributed in part to increased use of corn hybrids and the removal of less fertile land from production—factors which may continue to influence yields in 1939.

The 1938-39 Argentine corn crop is expected to be somewhat larger than last year, although again much below average. European importing countries have somewhat larger supplies than a year ago, and European requirements are reported somewhat smaller.

Prospects continue to favor increased egg production and increased production and marketings of poultry this year compared with last, the Bureau of Agricultural Economics says in a discussion of the poultry and egg situation.

Favorable to larger production are the plentiful supplies of feed at relatively low prices, and farm poultry flocks that in early March were about 5 per cent larger than in March last year. Feed prices, compared with egg prices, usually advance at this time of year. For the past 2 months, however, the feed egg ratio has held relatively constant—an added factor favoring increased production.

The less-than-usual seasonal decline in farm prices of eggs from February 15 to mid-March was in contrast to the sharp drop during January. Farm prices of eggs on March 1 averaged only slightly lower than a year earlier but were 177 per cent below the 10-year average of March 1 prices.

The Bureau pointed out that the heavier production of winter broilers this season largely accounted for the 46 per cent increase this March over last in the receipts of poultry on the New York market. Total storage stocks of frozen poultry in early March also were larger than a year earlier.

More poultry is expected to go to market in the remaining months of 1939 than in those months last year. Farmers have more chickens than a year ago and prospects indicate a material increase in the 1939 hatch compared with the hatch last year. A more favorable outlook factor, however, is the expectation that consumer incomes and demand for poultry will average somewhat higher this year than in 1938.

DOINGS OF MEN Since the time when history first began There has been many, many things done Patriots, Heroes, Heroins, Kings and Queens Have filled volumes with subjects and themes.

Men have worked, tilling of the soil Some have gained fortunes by their toil Wars have been fought among many nations Gospel, Sermons have proclaimed plans of salvation.

Science and research has long since found That knowledge and wisdom has no bound But for hopes the heart would break The deepest snows falls flake by flake.

Man's work begins with the sun His victories are won one by one The rulers of nations give their commands Their servants and subjects, carry out plans.

No commander is greater than what he commands The mighty oceans boundaries are grains of sand Gene rals, give orders one by one They are carried out by men and guns.

Monarchs and martens in days of old Has shared triumphs and agonies untold When nations are trembling in weak despair When Chaos and sorrows seems everywhere.

The bullwarks are stayed by men and steel Who meet each other on battlefield The ones that does all that is done Are the men who fires the gun.

Now many lie beneath the fair blue sky Awaiting for judgement days coming by The pen may be mightier than the sword But the waiver of both must meet their Lord.

Memorials, Epitaphs carved on marble or stone Should not outlast what heroes have done But fond memories should be kept green Of those who fought the battles on war screen.

—WATT PARKER, Spanish War Vet. FEED AND SEED Halifax farmers have begun a plan to grow more small grains, soybeans, lespedeza, vetch, crimson clover and the like and will supply these to a commercial feed mixing plant, seed store and local market to be established at Enfield. The purpose of the movement is to get away from complete dependence upon cotton for cash.

Relief

A new plan of distributing food to relief families by issuing them stamps good for commodities in grocery stores will be tried as an experiment in a limited number of cities.

NOTICE OF SALE OF REAL ESTATE

Under and pursuant to the power of sale contained in a judgment of the Superior Court as decreed by the Hon. Clawson L. Williams, presiding judge of the March term of Superior Court for Pitt County, in that certain action entitled "Farmville Furniture Company vs. Mrs. Lula H. Joyner, et al," the undersigned commissioners will, on Monday, the 1st day of May, 1939, at 12:00 o'clock NOON, offer for sale, to the highest bidder, for cash, the following described real property:

Lying and being in the Town of Farmville, Pitt County, and described as follows: Beginning at a stake on the East side of Main Street, Josie Hearne's Southwest corner and runs with her line Easterly about 190 feet to Mewborn's line; thence Southerly 41-1/3 feet to L. A. Joyner's corner; thence with L. A. Joyner's line Westerly about 190 feet to Main Street; thence with Main Street northerly 41-1/3 feet, to the beginning, and being that certain lot or parcel of land allotted to W. A. Hearne in the divisions of the lands of J. J. Hearne, deceased, reference to said division is hereby made for a more accurate description of the premises hereinbefore described.

And being that same lot or parcel of land conveyed by W. A. Searns and wife, Nannie Hearne, to L. A. Joyner and wife, Lula H. Hearne, which deed is of record in the Register's office of Pitt County, in Book H-13, page 72, which is hereby referred to and made a part of this description.

The successful bidder will be required to deposit with the court 10 per cent of his or her bid pending confirmation of the sale. This the 29th day of March, 1939. JOHN B. LEWIS, J. A. JONES, Commissioners.

1206 Women Say "Yes" to Query

If 98 out of 100 users picked at random declare they were helped by a medicine, would you believe in its merit? Record of the famous Query among women of leading cities in 12 Southern States shows 1206 out of 1297 users queried say CARDUI helped them. That figures 98 out of 100! What a record!

Women all over the South are eager to tell of their experiences with CARDUI. They were weak, rundown, nervous. These are symptoms of functional dysmenorrhea due to malnutrition, which CARDUI helps to relieve by stimulating appetite and digestion and building physical resistance. Try CARDUI!
