Report to House Paints Gloomy Relief Outlook

Social Group Describes Annual Meeting Of Desperate Conditions Septaugenarians In Majority of States

Washington, May 30 .- A startling leture of relief conditions, in which one man is portrayed as standing guard at night over his wife and nine hiren in rat-infested rooms, has been pinced before Congressional committees in charge of the WPA appropriation for the coming fiscal year, it was learned tonight.

The survey was made by the American Association of Social Workers and reviews conditions existing in 35 states and in the territories of Puerto Rico and Hawaii It describes persons in many states dependent upon relief as "American refugees with no place to go," and recommends federal grants-in-aid to states as the only means of achieving a uniform and adequate system of relief.

Failure of many local governments to-meet the problems of relief and unemployment, the report stated, is reflected in "shocking human misery." Public officials in many areas have both - indulging in "wishful thinking" and in some instances have been trying to fit a 100-year-old relief machinery to the present day emergency, it was said.
