**NO MAGINOT LINE AGAINST
DISEASE**

It is interesting to observe the contrast in the life of Andre Maginot, famed designer of the fortified line which bears his name and protects the French nation from invasion. Sergeant Maginot, who scientifically designed a method to defend his native land from the dangers of invasion, died because of a failure to scientifically protect himself from danger. He died after eating oysters that were tainted and became a victim to typhoid fever.

Medical science has long worked to protect man from the attacks of disease. Typhoid is one disease that is, at least, preventable. The skill and intelligence that developed the plans and guided the construction of the world's greatest fortification could not save Maginot from typhoid.

WAR BOOM IS DANGEROUS

The Federal Reserve Index of Production recently reached its highest point of the past two years.

Apparently, anticipation of war business is already leading to increased production, which can hardly be avoided. Just the same, it is well to recognize that a prosperous period, based upon war orders and emergency demands, cannot last. In fact, it is dangerous to the economy of any nation. In the end, it will exact a penalty.

The troubles of the world, which followed the last World War, have hardly disappeared and here we have a new occasion, about to lead us into the inflation that is certain to follow such an expanded production. We don't know that there is anything that we can do about it but it might be just as well to realize that the bubble is floating and it can be picked, very suddenly, and make our plans accordingly.

**BABSON BUYS JAPANESE
BONDS**

Readers of The Enterprise are familiar with the views of Roger W. Babson, well-known statistician and economist.

Mr. Babson, we are informed by a press dispatch from Manila, told newspapermen in the Philippine Islands that he had sold his holdings of United States government bonds and reinvested the funds in dollar bonds of the Japanese government.

Mr. Babson may believe that the bonds of the Japanese government are intrinsically worth more than those of the United States but with the nation engaged in a war with China and the future of events in the Far East uncertain, we doubt it.

He thinks that "our educational system needs drastic revision to teach youth that life is not a bed of roses but a hard and tedious struggle." He also expresses the opinion future generations may have some difficulty in competing with the people of the Orient.

**ABOUT SAVING SCHOOL
CHILDREN**

The importance of training children to look both ways before crossing streets and to acquiescent with the sound rules of safe conduct on the highways cannot be over-estimated.

Figures gathered by the American Automobile Association show that injuries to children of school age are higher than for any other group of pedestrians. They also show that the largest percentage of child pedestrian fatalities occur on school days, but outside school hours.

School authorities all over the nation should concentrate upon the problem and cooperate in the effort to make children who walk upon streets and highways conscious of the dangers that threaten them and to be reminded with the correct use of the automobile.

The Government approves 150 schools for training civilian pilots, according to news report in week.

President Roosevelt's proclamation of national observance of National Automobile Safety Week is observed.

**Farmville Chamber
Commerce Endorses
Control Program**

At a called session of the Farmville Chamber of Commerce, held in the City Hall yesterday afternoon this organization went on record as wholeheartedly endorsing the Farm Crop Control program and urge the tobacco growers of the south to go to the polls next Thursday and cast their vote for same.

This organization realizes that without such a control program tobacco prices for the remainder of this year's crop will bankrupt not only the farmer himself, but also all businesses that would be inclined to come to his rescue when in position to do so.

Don't bite the hand that's feeding you, but go out and vote for that which will help you as well as others.

**Reynolds Thinks
Trade Secondary
Neutrality Item**

(Continued from page 1)

order of patriotism on the part of those who might enjoy temporary gain from foreign trade. That, more than anything else, will keep America out of war.

"Developments of the last few days indicate that neutrality to keep the United States really neutral is the real objective of Congress and the American people. Regardless of political lines, opinions vary as to the best methods of attaining this neutrality. Free debate will lead to the best of all thought and judgment of the issues involved. Frankness and patriotism should govern all expression and all action.

"But, in the final analysis, selling goods now must not be given first thought if it means sending our sons later. As I have said, the real issue is trade versus neutrality. Let us legislate with a view solely to keep America out of war—because if we become physically involved, we shall pay with the blood of our sons, the tears of our mothers and the dollars of our already over-burdened taxpayers."

LORENA ROUSE

Farmville — Funeral services for Lorena Rouse, 3-year-old daughter of Mr. and Mrs. John Rouse, were held from the home near Farmville on Wednesday by the Rev. H. M. Wilson, Presbyterian pastor of Farmville. Interment was in the Briley burial ground near Ballards.

J. LEE WILKERSON

J. Lee Wilkerson, 78, of Bell Arthur, died at his home Saturday afternoon at 4:10, following three weeks of critical illness. The funeral was held from the late home Sunday afternoon at 3:30, conducted by his pastor, the Rev. E. C. Soper, pastor of Bell Arthur Methodist Church. Burial followed in the cemetery here.

Mr. Wilkerson was born in Granville county and in 1884 was married to Miss Laura Russell, of Person County, who died in 1898.

Surviving this union are W. F. Wilkerson, Pittsburgh; George W. Wilkerson, Wilson; Mrs. S. L. Miles, Bennington, Ind.; Mrs. I. W. Blaylock, Chapel Hill, and Mrs. J. T. Smith of Snow Hill.

After the death of the first wife, Mr. Wilkerson moved to Pitt County; and in 1906 was married to Miss Rosa Erwin, of Bell Arthur. Of this marriage survive two sons and one daughter, John Erwin Wilkerson, of Farmville, and James P. Wilkerson, of the home, and Mrs. W. A. Carter, Jr., of the home; one brother, W. W. Wilkerson, Beas; 17 grandchildren and three great-grandchildren.

FOUNTAIN NEWS

(By MRS. M. D. YELVERTON)

Mrs. B. F. Lewis visited her son, Franklin Lewis, at State College on Saturday.

Mrs. J. W. Redick and Miss Julia Ward Redick are visiting relatives in Montreat.

Mr. and Mrs. Charlie Yelverton of Hagerstown, Md., visited relatives here during the week-end.

Frank Owens, a student of Duke University, was at home for the week-end.

Miss Ann Marie Jefferson, a teacher in the Grimesland School spent the week-end at home.

Mr. and Mrs. Russel Williams and son, Hugh, of Red Oak, spent the week-end with Mr. and Mrs. F. L. Eagles.

James Lane Jefferson, student at State College, has recently been pledged to the Kappa Alpha Tau Social Fraternity.

Mrs. G. W. Jefferson, Misses Ann Marie, Martha Harden and Helen Brown Jefferson visited James Lane Jefferson at State College Saturday.

Mack Smith, Jr., a student of U. N. C., spent the week-end at home.

Mrs. W. E. Lang of Walstonburg visited relatives here during the week-end.

HOSTESS TO BRIDGE CLUB

Mrs. J. M. Horton entertained her bridge club Tuesday afternoon. High score went to Mrs. J. N. Fountain. Cut prizes were won by Mrs. Glen Newton and Miss Nell Owens. Drinks were served at the beginning of the game. At the conclusion a salted course was served.

ENTERTAIN MRS. McCOLLERS

Mrs. G. W. Lane, Jr., entertained at her home Saturday evening, Sept. 23 in honor of her brother and his bride, Mr. and Mrs. J. M. McCollers of Raleigh. Mrs. McCollers is the former Miss Virginia Burkett of Roxobel, N. C.

The guests were received at the door by Mrs. E. B. Besley and introduced to the receiving line which included Mrs. G. W. Lane, Jr., Mrs. J. M. McCollers, Raleigh; Mrs. W. E. McCollers, Garner; Mrs. W. A. Sherman, Port Norris, N. J.; Mrs. Chas. Yelverton, Hagerstown, Md.; Mrs. Russell Williams, Red Oak, N. C.; Mrs. E. J. Schantz, Allentown, Pa.; Mrs. C. L. McCollers, Edenton, and Mrs. A. T. Taylor of Garner.

Mrs. Glen Newton introduced the guests to Mrs. C. M. Smith, who invited them into the dining room, where coffee, mints and canapés were served by Mrs. F. L. Eagles, Mrs. W. E. Lang and the Misses Ethel Collier, Elizabeth Coward and Beryl Green.

The guests were then invited into the living room to play bridge. High score was won by Mrs. Rod Harris and average score was won by Mrs. M. E. Lane of Pinetops, N. C.

The bride was presented a gift of linen. At the conclusion of the bridge games an ice course was served.

**Makers Consider War
In Drafting Program**

Thorough consideration was given to the present European situation and its possible effects on American agriculture when the 1940 AAA program was drafted, according to E. Y. Floyd, AAA executive officer at State College.

The provision of the new program dealing with agricultural conservation measures follow closely those in effect this year and are based on farmer recommendations. Farmers will have plenty of time before planting dates to plan cropping operations in accordance with provisions of the 1940 program.

The wheat allotment of 62,000,000 acres, larger by 7,000,000 acres than the 1939 allotment, has already been announced, as have tentative wheat conservation and price adjustment payments. Acreage goals for other major crops, together with rates of payments, will be established later in view of developing conditions.

An important provision which will encourage further soil conservation measures on small farms insures that as much as \$30 may be earned on every farm participating in the program. Another conservation provision will encourage the planting of forest trees on farms by allowing growers to earn up to \$30 for tree planting. This would be in addition to the regular soil-building allowance for the farm.

Floyd said soil-building practices have been provided to meet more adequately the needs for soil conservation, and special emphasis will be given to wildflowers. In areas where food for the farm family is generally inadequate, a home-garden provision will be available. The new provision also extend the commercial peanut and commercial vegetable programs to small farms in 1939.

1940 FARM PROGRAM

Formal approval of most of the provisions of the 1940 Farm Program, formulated after thorough consideration of the current European situation and its possible effect on American agriculture, has been announced by Secretary of Agriculture Wallace.

The provisions dealing with the agricultural conservation phases of the program follow closely those in effect for 1939 and are based upon farmer recommendations. Acreage goals for major crops other than wheat together with rates of payment will be announced later in view of developing conditions. Provisions of the 1940 AAA Farm Program will also be announced later on. The 1940 wheat acreage allotments and tentative rates of payments were announced previously.

In announcing the 1940 program provisions, Secretary Wallace said:

"The 1940 AAA Farm Program is being announced at a time of world crisis, and its provisions have been formulated in the light of the new situation. The aim of this program is to maintain a production of agricultural commodities in this country that will balance with the demand, whatever that demand may prove to be, and to maintain and improve the fertility of our farm land. Farmers' interests are carefully safeguarded in this program which also serves the public interest.

"Provisions of the 1940 program for wheat have been available to farmers for some time. That program provides for an increase in the national wheat acreage allotment of 7 million acres — from 55 million acres to 62 million acres. There is nothing in the current wheat situation that warrants changing this part of the program. We have domestic wheat supplies of nearly a billion bushels and these are ample for any immediate prospective demand. World supplies are the largest on record. This is in sharp contrast with the situation that prevailed in 1914. World supplies of wheat in 1914 totaled 3.7 billion bushels, while this year they are currently estimated at 5.3 billion bushels or almost one and one-half times as large.

"During the last six years farmers have made nationwide progress in soil conservation. The Nation is potentially better able quickly to meet changes in demand for agricultural commodities than it has ever been. There is an Ever-Normal Granary in the soil. And our current large reserves of our major crops are being held in large part through the loan features of the Ever-Normal Granary. The loans protect farmers against possible price collapse and give them the advantage of any price advances, and the increased fertility of their soil is an assurance for them if there is demand for increased production.

Although the 1940 program is substantially the same as that for 1939, changes have been made which recognize special conditions in certain areas and better adapt the program to farms in all sections of the country. Problems of the small farmer have been given special consideration.

The new provisions extend the commercial peanut and commercial vegetable programs to more counties than in 1939, encourage further conservation measures on small farms by insuring that as much as \$30 may be earned on every farm participating in the program, provide soil-building practices to more adequately meet the needs for soil conservation, encourage wildlife conservation and seek to promote the growing of home gardens in designated areas where food for the farm family is generally inadequate.

As a means of encouraging the planting of forest trees on farms, the 1940 program enables any farmer to earn as much as \$30 by planting forest trees in addition to the regular soil-building allowance computed for each farm.

**Must Present Cards
To Cotton Ginners**

No cotton can be ginned or sold in North Carolina without presentation of a cotton marketing card to the ginner or buyer, it was pointed out by Horace Godfrey of the State AAA office at State College. He said that all marketing cards are either in the hands of growers or are available in the offices of the county farm agents, except in a few cases where farmers overplanted their acreage allotments and it was necessary to re-check their farms.

Godfrey explained that ginners and buyers are subject to a penalty if they do not make proper and prompt reports to the County AAA committee as required under the Agricultural Adjustment Act. "Therefore, all cotton growers are urged to cooperate with buyers and ginners by showing their cards at the time of ginning or selling," the Triple-A officer said.

All growers are required to show their marketing cards to ginners and buyers regardless of whether a red, white or blue card is issued to them. Under no circumstances are marketing cards transferable. No grower should allow cotton to be ginned or sold in his name when the cotton was produced on a farm other than the one for which his particular marketing card was issued. Growers with more than one farm should be careful in reporting to ginners and buyers the cotton produced on each farm, Godfrey advised.

The State AAA Committee has a staff of six auditors working with ginners, buyers, and county offices to assist in checking compliance with cotton marketing regulations.

UPSIDE-DOWN BOY O.K. NOW

Chicago — Richard Kennedy, 9, whose world for some time seemed an upside-down place to him because of faulty vision, can now use both eyes normally, thanks to Dr. Edmund J. Krump, trained him to see normally by using only one eye at a time by switching an opaque lens from one side to another.
