A TIME FOR PATRIOTISM

The present condition of world affairs, with a serious threat to the future peace of the United States, demands that the citizens of this country give a demonstration of the loyalty that we read about in the history books.

The United States is able to take care of itself whenever its people cooperate in the service of their nation. It is not able to defend itself when our people divide upon inconsequential issues or attempt to play politics.

At present, loyal citizens will lend their support to the President in his undertakings in behalf of national defense. Whether an American likes the administration or not is not the issue; the issue is whether one likes America, or not.

Later, in this year, the people will have an opportunity to select a chief executive for the four years, commencing in January. Regardless of which party wins the presidential election the obligation upon good citizens will continue the same, so far as national defense is concerned.

In writing this editorial we are not aware of any failure on the part of people in Pitt County to yield full loyalty to their government at this time but, nevertheless, there should be no misunderstanding about the duty of those who profess patriotic impulses.

Any traitor in any country offers complete loyalty to his crowd. It is only the loyal patriot who cooperates wholeheartedly with his political opponents when necessary for the national defense. When the hour demands the service of patriots, the real patriots does not reply with a counter-proposition.

Vegetable Laxative
With Proved Feature

The punctual, satisfying relief from constipation and its headaches, biliousness, bad breath, so often experienced by users of this laxative, is mainly due to its combination of purely vegetable ingredients.

BLACK-DRAUGHT'S principal ingredient has high medical recognition as an "intestinal tonic-laxative"; helps impart tone to lax bowel muscles.

A little of this spicy, aromatic medicine by simple directions at bedtime, generally allows time for a good night's rest, acts gently and thoroughly next morning.

Next time take time-tested, guaranteed BLACK-DRAUGHT.

WASHINGTON FARM NEWS

(Continued from Page One)

where substantial adjustments are being made by old growers.

Sugar Beets:
That if sugar beet acreage allotments are necessary in 1941, they be on a county basis instead of a factory district basis, as at present.

Crop Classification:
That fall sown oats in areas subject to serious water erosion during the winter months and where there are no logically adapted biennial or perennial winter cover crops, be classified as non-soil-depleting crop.

Orchards:
That three practices be adopted, featuring maintenance of permanent cover in irrigated orchards and vineyards, contour irrigation on sloping vineyards and orchards and contour planting of fruit and nut trees.

That a practice for the removal of diseased and uneconomic apple trees be provided.

Commercial Vegetables:
That, as in 1940, commercial vegetable allotments be established in counties designated as commercial counties. That this designation apply to counties in which more than 400 acres of commercial vegetables are normally grown on farms producing more than three acres. Upon recommendation of the State Committee the allotment may be omitted in the State and a vegetable limit placed on farms having other crop allotments. In such areas no payment would be made directly on vegetables.

That commercial vegetables include perennial as well as annual vegetables, with processed crops classified as vegetables under the program unless it is determined that they are not in competition with fresh vegetables.

Crop Insurance:
That the crop insurance program be extended to other commodities, such as corn, cotton and tobacco, as soon as the necessary actuarial data and legislative authority are available.

Great Plains Area:
That county-wide practice programs for controlling wind erosion where producers favor such action, be extended under the 1941 program. Similar programs are being effectively carried out in 17 Great Plains counties in 1940.

Grant of Aid:
That the grant of aid program be extended to additional areas in 1941 and expanded to include the advancing of other materials where practicable.

Soil-Building Payments:
That the minimum payment of \$20 per farm be continued in 1941. This allowance was first provided in the 1940 program.

That, because of budget limitations, the \$30 tree planting allowance, as provided in the 1940 program, be discontinued.

Commodity Loans:
That in order to assure orderly marketing of wheat the maturity dates of loans be staggered.

That where loans are made on grains other than special crops, such loan rates be set at a lower percentage of parity price than those established for special crops.

That cotton loan price differentials be developed on a zone or area basis rather than on an individual warehouse value basis.

That cotton loans be made on net weight basis, in the belief that such a plan will encourage the use of cotton as bagging.

That cotton loans be made at the highest rate justifiable under existing conditions.
