

America's Future Lies in Its Youth

Scouting trains American youth the American way. The story of Scout training is being told today by 11,000,000 Scouts and Scout trained citizens dating back to February, 1909. Today in America one out of every four boys is a Scout. What does Scouting do for the American way of living?

Scouting builds character: It is better to build boys than to mend men. The fundamental principles making up the Scout Oath and Law, taught and applied right living and right thinking in American youth at its most impressionable age.

Scouting combats delinquency: A large percentage of crime is committed by youths with too much leisure and "nothing else to do." Wisely directed activity in the heart of the Scouting program of character-building and citizenship-training.

Scouting makes leisure productive: Scouting does more than prevent boys from becoming liabilities to society; it develops them into assets of society. In addition to giving them practical training which will help equip them for a useful and profitable life, Scouting develops a spirit of responsibility and cooperation.

Scouting teaches citizenship: The basic truths of liberty and equality upon which this country is founded are integral part of the Scouting plan. Scouting combats the false ideals and insidious propaganda which is corrupting the youth of other nations—seeping even into this country.

Scouting pays dividends: No money you can invest pays larger dividends, or will bring you greater satisfaction, than the money you invest in boyhood. There is nothing more worthwhile in any community than its boy life.

Nine out of twelve boys in this county have stated they would like to be Boy Scouts. With your aid through investment in youth, many of these boys will have Scouting.

Survey of Highway Transportation to Be Made for Defense

All farmers and others who own trucks are to be asked to help the War Department in its transportation planning for national defense, reports John W. Goodman, assistant director of the State College Extension Service. M. L. Wilson, director of Extension work for the U. S. Department of Agriculture, has asked the cooperation of all State Extension Services in the survey to be made.

Each truck owner will receive in the next few days a special National Defense inventory card, Goodman explained. He will be requested to return the card (postage free) with information regarding the make of his truck, kind of body, capacity, time of year the vehicle is most urgently needed in the owner's business, and whether in an emergency he would be willing to hire or lease it to a Government agency.

The purpose in collecting these records, Goodman said, is more effective planning of highway transportation in the assembly of defense industry materials, delivery of military and civilian supplies, relief of dock and terminal congestion, and movement of passenger traffic in emergencies.

"England was forced, in the midst of the war, to make an inventory similar to the one the United States is now about to begin," the Extension leader declared, and he added: "I am sure the farmers of North Carolina will cooperate in this survey since it seems vital to the preparedness of our country for any wartime emergency that might arise."

The North Carolina Highway Traffic Advisory Committee of the War Department will send out the cards. A similar survey will be made of buses.

A Scout Is Reverent

MAINTAINING that no boy can become the best kind of citizen without recognizing his obligation to God, the Boy Scouts of America, in this new Norman Rockwell painting, symbolizes the spirit and meaning of its Twelfth Scout Law: "A Scout is reverent. He is reverent toward God. He is faithful in his religious duties and respects the convictions of others in matters of custom and religion."

WALSTONBURG NEWS

Mr. and Mrs. A. D. McLawhorn, of Winterville, spent Monday with Mr. and Mrs. G. W. Corbett.

Mr. and Mrs. W. Earl Lang and Truett Lang were Raleigh visitors Saturday.

Mrs. Ada Bass, of Wilson, spent the week end with her daughter, Mrs. Jason Shirley.

Mr. and Mrs. Floyd Sutton, of Norfolk, Va., spent Sunday with Mrs. W. I. Shackelford.

Mrs. Esther Craft and son, Donald, spent Sunday at the Methodist Orphanage at Raleigh.

Mr. and Mrs. Paul Craft and Mrs. A. J. Craft were Rocky Mount visitors Tuesday.

Miss Lakne Jenkins, of E. C. T. C., spent Sunday with Mr. and Mrs. Sam Jenkins.

Mr. and Mrs. Lee Jones had as their dinner guests Sunday, Mr. and Mrs. Roscoe Bunn, Miss Addie Lon Albritton, of Snow Hill, Mr. and Mrs. Paul Craft and Mrs. Elmer Hinson.

Ed Taylor, Jr. and S. M. Stroud spent the week end in Chapel Hill.

Mrs. C. H. Morton, Mrs. D. W. Alexander and Emily Jane, of Beaufort and Mr. and Mrs. Chas. Willis, of Morehead, were guests of Mr. and Mrs. R. C. Mann Sunday.

Mr. and Mrs. Lee Jones, Major Jones and Miss Fannie Mae Smith visited Rev. M. A. Woodard in Winterville Tuesday.

The Zone meeting of the Methodist Society of Christian Service was held in the Methodist Church here Thursday.

STATE COLLEGE ANSWERS TIMELY FARM QUESTIONS

QUESTION: What is the minimum size of U. S. No. 1 potatoes?

ANSWER: The answer to this question, as given by H. R. Niswonger, Extension horticulturist of N. C. State College, is: The diameter of a U. S. No. 1 Irish potato shall be not less than 1.7-8 inches, and the diameter of a U. S. No. 1 sweet potato shall be not less than 1.3-4 inches. Also, a sweet potato must not be more than 10 inches in length to meet the No. 1 grade requirement.

QUESTION: What varieties of small grain show resistance to smut diseases?

ANSWER: Through demonstrations conducted by North Carolina farmers, in cooperation with their county agents, it has been found that Leaps 157 wheat; Victorgrain, Stanton, Fullgrain 4, and Lestoria oats; and Iredell and Bearded 15 varieties of barley, are at least partially resistant to smut. Howard B. Garris, Extension plant pathologist, says the 5 per cent ethyl mercury phosphate (New Improved Ceresan) is effective in controlling bunt and smut of wheat, and loose smut of oats.

QUESTION: What is the best equipment for harvesting lespedeza seed under present conditions in North Carolina?

ANSWER: Much of the lespedeza in the State this year made only fair growth because of abnormal weather conditions. Prof. G. W. Giles of the State College Agricultural Engineering Department, says the simple, inexpensive seed pan attached to a mowing machine will do a good job under present conditions. He recommends that the low cut bar, commonly called a "lespedeza bar," be used. It will cut the stalks close to the ground, and since the cutting action is rapid, the plants will not be disturbed very much, thereby eliminating some of the shattering of the dry seed pods.

A man may leave a lot of money for his relatives to spend but the only cash that he takes across the Great Divide is money freely expended for the benefit of other people.

'Uncle Sam' to Visit Every Farmer in State

The man with the stove-pipe hat and the white whiskers—known to Americans as "Uncle Sam"—will visit every farmer in North Carolina between now and about December 1. He will drop around to ask each farmer how much food and feed he can, and will, produce to help "Win the War and Write the Peace."

All of which means, according to Dean I. O. Schaub, director of the N. C. State College Extension Service, that the "Food for Freedom" campaign, recently started on a Nation-wide basis, is aggressively under way in North Carolina. Every farm family will be asked to participate, and to increase production in 1942 to help feed defense forces at home and abroad.

Dean Schaub explained that "Uncle Sam" will be represented on the tour visits by AAA committeemen—other farmers who probably wear overalls and straw hats in many instances, instead of the red, white and blue costume of the legendary National hero.

The details of the house-to-house canvass, by means of which the food and feed production drive will be conducted, are being worked out at regional, county and community meetings of agricultural and rural welfare leaders. The Triple-A committeemen, who are the elected leaders of the farmers, will obtain the pledges necessary to meet the county goals of more food and feed next year.

Regional educational and training meetings are scheduled Monday, October 20, at Elizabeth City, Clinton, Raleigh, Lexington, and Waynesville, and on Tuesday, October 21, at New Bern, Henderson, Rockingham, Shelby and Wilkesboro. County and community meetings will follow as soon thereafter as they can be arranged.

TERRACING

A large number of Johnston County farmers have listed terracing as a means of earning their units under the 1941 conservation program, reports Assistant Farm Agent R. M. Holder.

If every editor, politician and public speaker limited remarks to the truth, as established, there would be much less written and spoken.

HERE'S HOW YOU CAN HELP

BY BUYING U. S. DEFENSE BONDS

you help provide funds to finance America's preparedness program. You enlist in the vast growing army of men and women who are determined to defeat all who seek to destroy our way of life. The Bank of Farmville is cooperating with the government—without profit or remuneration—in making these bonds available. Stamps are available for accumulating smaller sums. See table at right for denominations of both stamps and bonds.

STAMPS	BONDS (SERIES E)	
	Issue Price	Maturity Value*
Denominations		
\$.10	\$ 18.75	\$ 25.00
.25	37.50	50.00
.50	75.00	100.00
1.00	375.00	500.00
5.00	750.00	1,000.00

Climaxing Its Greatest Year, Pontiac Presents Its Greatest Quality Achievement!

INTRODUCING 10 Great New Pontiacs

with the things you've always liked — and 15 new ones too!

- 1. Improved steering—ride—easy entry—improvement in all years—1942
- 2. New Pontiacs—1942—equal in quality—equal in beauty—unequal in any previous Pontiac.
- 3. Wind weather parts are unchanged for 1942
- 4. Travel of the gearshift lever has been reduced 30 per cent.
- 5. Despite increased length and weight—gas and oil economy is the same.
- 6. For 1942, Pontiac front wheel brakes have been increased in size and all are now triple-acted.

AVAILABLE AS A SIX OR AN EIGHT IN ANY MODEL

THE BLUE SIX WITH THE LOW PRICE—GENERAL MOTORS' MAINTENANCE

Proud to Be Doing Our Part

Two complete plants... over 425,000 square feet of floor space... thousands of skilled craftsmen—that's what Pontiac is devoting to National Defense. Pontiac's job is the production of a new type of rapid-fire cannon for the United States Navy—a weapon which anti-aircraft units are the "most effective of its class ever produced." Pontiac is doing its part—and doing it well!

You are in for a mighty pleasant surprise when you see and drive the 1942 Pontiac. In a year when quality and long life mean more than ever to buyers, Pontiac has given you a 1942 model that not only offers you the things you've always liked in the great Pontiacs of the past, but also one that is actually 15 ways better than last year's exceptional success!

Can you understand now why we say these new 1942 Pontiacs represent our greatest quality achievement? And why Pontiac is already the choice of thousands who are buying not for this year alone, but for many years to come, if need be?

See these new Pontiacs today. And don't forget Pontiac is still priced just a few dollars more than lowest-priced cars!
