With summer primaries over the political band wagon will now be rolled under the shed with the water wagon.

A rooster thinks his crowing brings the dawn. There's another kind of bird who attaches the same importance to his crowing.

1943 AAA Farm Program To Stress Legume Seeding

Seeding of winter legume crops this fall in the best way to bolster production of important war crops next year, and at the same time beat the threatened shortage of nitrogen, according to G. T. Scott, chairman of the State USDA War Board, with headquarters at State College.

Legume seedings are needed in North Carolina to replace application of nitrogen fertilizer which will be reduced because large quantities of commercial nitrates are going into manufacture of munitions, Scott said. Growing of winter legumes—mainly crimson clover and Austrian winter peas—is recognized as one of the best methods of restoring productive vigor to the soil. Many war crops, such as peanuts and soybeans, are soil depleting.

At present, North Carolina farmers already have received or have been shipped 4,822,500 pounds of Austrian winter peas, 350,000 pounds of ryegrass, and 1,356,500 pounds of crimson clover.

Under the 1943 AAA program, he said, greater interest is being placed on seeding of winter legumes as cover and green manure crops. The rate of payment for establishing and burning under a good stand of winter legumes has been increased from \$3 to \$4 per acre. Harvesting winter legume seed in a workmanlike manner or leaving all the legume forage on the soil as a "go-down" cover crop will earn \$3 per acre, as compared with \$1.50 per acre under the 1942 program. These credits are a part of the maximum production practice allowance which may be earned on an individual farm.

"We can't trust to luck with mismanaged land," he said. "We must run our farm plants at the greatest speed they can stand without burning out the soil."

These cover crop seed will be furnished farmers by the AAA and costs will be deducted from any payments due the farmer under the AAA program.

State College Hints For Farm Homemakers

By Ruth Current
State Home Demonstration Agent
N. C. State College.

Your gloves, handbag, your umbrella—and other accessories like these are not the most important items of your wardrobe but they deserve extra care these days. Clothing specialists suggest that the habit of losing gloves and umbrellas is a good one for American women to break. Buy a glove-holder to attach to your pocketbook if you are inclined to lose your gloves, or sew a name tape on the inside seam.

Take a tip from the sales person and put your gloves on just as she tries them on you: Ease fingers on first; then thumb and palm. Turn rings so the settings are toward palm of your hand. The best way to take most gloves off is to loosen each fingertip, turn the cuff back over the fingers and draw the gloves off. Suede gloves are an exception; try to work them off easily without turning back the cuff or pulling the fingertips.

After you take off a pair of gloves, pull them gently into shape, blow into the fingers, and lay them in tissue paper in a flat box.

Don't let your gloves get too dirty before you clean them.

Watch for rips in your gloves and mend them promptly. Always use cotton thread in sewing leather. Silk thread will cut the leather and pull out.

A silk umbrella that is not used for a long time needs a shower bath once in awhile. Clean a silk umbrella by brushing it with a soft cloth.

Clean and oil-silk umbrella by washing with mild soap and water. Rinse off and dry in the shade before closing. Handle oil-silk umbrellas very carefully in cold weather or the oil-silk will stiffen and crack.

When you carry an umbrella of any kind closed, keep strap buttoned to prevent ribs from catching and bending.

Hang your umbrella up in the closet to keep it from sliding around on the closet floor.

War Time Warning Given To Hunters

A warning to hunters was sent out from Raleigh today to be careful when shooting game in the vicinity of telephone or telegraph wires. The armed forces and war industries are depending heavily on telephone and telegraph communications for prompt service.

A breakdown on a line in remote sections may cause delay on war work or troop movements. Hunters may cause serious trouble to communications lines.

A warning was also issued about restrictions on hunting near war projects or army, navy, marine, coast guard and air corps bases.

Minute preparations have been made at all armed force centers for any war emergency or an air attack. The explosion of guns and rifles near the bases will be a source of trouble after the hunting season opens on October 1. It will be embarrassing for hunters to fall into the hands of army officers for violating the war time rules, it was pointed out.

FOOD

The Agricultural Marketing Administration reports that 600 million pounds of foodstuffs and other agricultural commodities were received in July for shipment to allied Nations.

Austrian Winter Peas Available

J. V. Taylor, chairman of the Pitt County AAA Committee announced today that Austrian Winter Peas and Crimson Clover are now available to the farmers of Pitt county as a grant of aid under the Soil Conservation program. He emphasized that farmers of the county should begin sowing Austrian peas and clover as early as possible this fall and seed as many acres as possible. Not only must 1943 soil building practices be carried out before October 30, but 1943 practices must be carried out by July 1, 1943. He stated further that nitrate fertilizer will be further reduced by approximately 20 per cent in 1943 and it is imperative that farmers plant more winter legumes than the minimum requirements of the Soil Conservation program. A good acre of Austrian Winter peas or clover turned under will more than equal a heavy application of nitrate of soda. Tests have shown that a good crop of winter legume turned under will increase corn yield on an average of 15 bushels per acre.

HERE'S HOW YOU CAN HELP
— BY —
BUYING U. S. DEFENSE BONDS

you help provide funds to finance America's preparedness program. You enlist in the vast growing army of men and women who are determined to defeat all who seek to destroy our way of life. The Bank of Farmville is cooperating with the government — without profit or remuneration—in making these bonds available. Stamps are available for accumulating smaller sums. See table at right for denominations of both stamps and bonds.

STAMPS	BONDS (SERIES E)	
	Denominations	Issue Price
\$.10	\$ 15.75	\$ 25.00

The Bank of Farmville
FARMVILLE, N. C.

Mr. Taylor stated that farmers wishing to secure Austrian peas or clover should come by the county office and execute their order and secure their seed on the same trip. The seed are being delivered by J. B. Kittrell and the Pitt F.C.K. Inoculation can be purchased at the same places. The deduction rate for Austrian peas is \$6.93 per 100 pounds and Crimson clover \$12.50 per hundred.

To meet the nitrate shortage every farmer should plant one acre out of every five he expects to have in corn to a good winter legume to be turned under.

The following are the recommendations for seeding winter legumes for successful results:

To get any benefit from a winter legume it must be sown in such a way that it will be inoculated, sown early enough and plowed in late enough to get some growth. Any other method is a waste of time, money and seed; and a crime against a war production program.

What You Buy With WAR BONDS

Aside from the sixty-mile an hour Mosquito Torpedo Boats, the Sub Chasers are the speedsters of our Navy. Light and fast, they are the eyes of the Fleet on the water. They displace approximately 1,500 tons and cost about \$2,400,000 each.

We need many of these powerful, fast little boats to cope with the treacherous submarine type of naval warfare fostered by our enemies. Everybody can help pay for more Sub Chasers by putting at least ten percent of his income into War Bonds. Buy Bonds or Stamps every pay day. Buy them from your bank, your post office, or from your office or factory through the Payroll Savings Plan.

MOUNTAINS OF SCRAP WILL SAVE THOUSANDS OF LIVES!

Staples like this are needed all over the country so that our Government can plan our armament program—and our mills and plants can deliver the fighting tools!

Get in on the drive that starts today. Get the unused metal out of your cellar, your attic, your garage, your place of business. Without this scrap the Nation's steel mills must shut down, for all new steel is 98% scrap, and the mills have not enough for even 30 days more.

And one more thing. Help to stop the story — spread by innocents and ill-wishers alike — that there is lots of scrap already on hand. They point to junk yards, auto graveyards, and salvage depots that have not been cleaned out, as proof that there is no shortage. Kill this talk before it kills our boys!

In spite of the terrible lack of scrap, here is why you may still find full junk yards and scrap depots — and why they must be kept that way!

- All scrap must be sorted, stripped, and broken up by scrap dealers before it can be used. Their yards are full because they are busy preparing your scrap for the mills as fast as they possibly can!
- Auto graveyards strip autos, keep the usable parts and junk the rest — turning out 400 tons of scrap in a typical month. Each must scrap within 60 days as many cars as he buys — that is the law!
- Scrap collections sometimes have to stay around because the dealers can't handle them all immediately. Even if they could, the mills could not store it all. The local salvage depot is a stockpile — where your scrap is available for instant use as soon as it's needed. And it will be needed!

Remember if these places become empty, the mills shut down — and we lose the war!

So get out your scrap and help your neighbors with theirs. It's the greatest single contribution you can make right now to win the war!

WHOSE BOY WILL DIE BECAUSE YOU FAILED?
