

Registration For Fuel Oil This Week

Application For Fuel Oil (and Kerosene) Ration For Heat And Domestic Hot Water for Private Dwellings

All people who fall in the above group and who live within the Farmville Township are required by law to register at the Agriculture Building of the Farmville High School, Thursday, Friday and Saturday, October 29, 30 and 31, between the hours of 9:00 A. M. and 5:00 P. M.

Fuel oil and kerosene used for cooking purposes do not come in this group; however, it will be necessary to register for this at a later date.

Before coming to register, please go to your dealer and get a certificate showing how much oil you bought last year. Also know the number of square feet to be heated in each room.

Attention Farmers!

According to E. Y. Floyd, State AAA Executive Assistant, the date has been extended for seeding winter legumes and spreading lime and superphosphate until November 15, 1942 under the 1942 Agricultural Conservation program due to the recent weather conditions.

Those who wish Austrian Winter peas, Crimson Clover, or Italian Ryegrass to use in connection with either the 1942 or 1943 program can obtain such seed as a grant-of-aid through the county AAA office.

STATE COLLEGE ANSWERS TIMELY FARM QUESTIONS

QUESTION: What is a good material to use as litter in the poultry laying house?

ANSWER: A good litter must keep the floors both warm and dry during the winter months. Materials found best for this purpose have been shavings, dry sawdust, chopped hay or straw, and shredded cane. In a limited number of cases, ground corn cobs have also been found a good material. Each mentioned will absorb moisture and warm the floor.

QUESTION: What are some of the best woods for smoking beef?

ANSWER: Hickory and oak, although practically all of the non-resinous woods are satisfactory, particularly the hardwoods. Dried beef should be smoked 70 to 100 hours at a temperature of 125 to 150 degrees Fahrenheit. After smoking, the dried beef may be wrapped in heavy paper and then slipped into a heavily starched flour sack and hung up in a well-ventilated room.

QUESTION: How should weather-damaged cotton be handled?

ANSWER: In the first place, growers should not attempt to harvest cotton that has been beaten out on the ground, sprouted, and begun to rot. The important thing, however, is to take cotton to the gin as dry as possible. Also, if possible, the cotton should have the cleaning effect of four beater rolls to remove sand and soil stain. Seed from storm-damaged cotton should be kept separate from the better grades.

PATROLS

A 4-H forest fire patrol is being organized in Greene County to report fires and assist in controlling blazes, says J. W. Grant, assistant farm agent.

LARGEST

Prospective supplies of feed grains, hay, and oil cake and meal for 1942-1943 are the largest on record, reports the U. S. Department of Agriculture.

WALSTONBURG NEWS

Mrs. Esther Craft and son, Donald, of Falkston, visited Mr. and Mrs. Jesse Gay during the week end.

Mr. and Mrs. W. Earl Lang and baby, Earline, spent Sunday with Mr. and Mrs. E. L. Baker in Greenville.

Miss Dorothy Gardner and Mrs. Cameron West of Snow Hill visited relatives here Sunday.

Captain Archie Eagles of Bermuda and Mrs. Eagles of Baltimore, were dinner guests of Mr. and Mrs. Ivy Smith Wednesday evening.

Mr. and Mrs. Sam Jenkins and sons, Sam Lewis and Bingo and Miss Clara Jenkins spent Sunday in Raleigh with Mr. and Mrs. H. R. Creech.

BAZAAR

The annual bazaar of the Christian Church will be held Tuesday, November 3rd.

Says Convenient Markets Promote Better Farming

A convenient market outlet for most of the products grown on Union County farms is the happy culmination of almost 35 years of constructive work as a farm agent in his native county by T. J. W. Broom, one of the great agricultural leaders of North Carolina.

Tom Broom began work as a county agent in Union County on December 1, 1907. On December 1, 1942, he will have served his people for 35 years and during that time he has brought about a great agricultural revolution in methods of soil building largely through the use of lespedeza. Mr. Broom decided first that the soils of the county, impoverished through years of cotton and corn farming, must be improved and, to this end, he sought for fool-proof methods and practices. He introduced lespedeza until now it is a cash crop through the sale of seeds. Two large firms buy or reclean the seed and offer a ready and dependable market.

Nearly every farmer grows purebred seed grain and the planting of cereal mixtures for hay and grazing also was introduced by Mr. Broom as a next step. A large mill now buys all the surplus grain that can be grown in the county and will mix, on order, any grain ration, for poultry, cow or hog according to formulas worked out by experts of the North Carolina State College.

Seven milk routes traverse the county to gather surplus milk from cows which have followed the sod, pasture and grazing crops now being grown on the improved soils. A recently established poultry killing and dressing plant connected with a freezer locker establishment will take care of all the surplus poultry and eggs produced in the county to complete the list of markets needed. There is, at Monroe, a large cotton warehouse to handle Union's basic crop and the town has become known as one of the best cotton markets in the State. All this just didn't hap-

A child's laxative your child should LIKE

When your child needs a laxative give him one he will probably enjoy taking—Black Draught. Gives as directed. It is usually sold in cotton, yet effective.

pen. Mr. Broom helped it to come about.

A WEEK OF THE WAR

(Continued from page 1)

book. Subsequent rations of coffee will be on coupons taken in sequence toward the center of the book.

Rubber Director Jeffers reported chemists would develop "within five or six months" a 100 per cent synthetic tire good for all but military and heavy truck duty, but such tires will be allotted for essential civilian driving only. "Sometime after mid-1943, we ought to have enough synthetic tires to make an appreciable difference in the situation regarding essential driving. Sometime in 1944, we ought to have enough to begin to furnish tires to civilians for family use," he said. Special gasoline rations will be available for motorists who are away from home when nationwide mileage rationing begins, and special allowances will be made for motorists who must move their cars "in the event of a bona fide change of residence," but not for moves from summer to winter homes.

Secretary of Agriculture Wickard said meat consumption of 2 1/2 pounds a week per person would mean considerably less meat for persons "who have always had comfortable incomes" and more meat "for people whose purchasing power has increased only recently."

Manpower and Production

State administrators are reclassifying workers on WPA rolls with a view to expediting the program of putting qualified workers into war industry and farm jobs. The order will apply also to all those waiting assignment to WPA. 4,000 experienced miners of copper and other vitally needed metals are receiving army furloughs to relieve a labor shortage in that category. The men, who are being furloughed to the mines as civilians and who leave the army on a voluntary basis, will be called back to active duty if they leave their jobs at the mines or if the need for them is eliminated, he said. War Secretary Stimson said the Army is studying a plan to return older soldiers to civilian life.

The current scrap drive has achieved "amazing results" and has raised steel production to 100 per cent, WPA Chairman Nelson reported. An order was issued by the WPA requiring more than 400 municipalities to use their regular trash collection equipment to collect and segregate scrap cans as part of a campaign to recover 1,000,000 tons of steel and 10,000 tons of pure tin from tin cans. The Board announced "hosiery that can be repaired or mended for further use is not being asked for by the government. Only after hosiery is discarded as being completely unusable should it be placed aside for salvage purposes."

POOR

The 1942 harvest of bread grains in Continental Europe probably will be considerably below average and below the sub-normal crop of last year, according to recent reliable reports.

HEMP

The WPA has approved a program for the planting of 300,000 acres of hemp for fiber and the construction of 71 mills for processing the hemp into line and tow fiber.

Operators Urged To File Applications For Certificates

Raleigh, Oct. 21.—Pointing out that November 15 is the deadline for owners of trucks and other commercial vehicles to obtain certificates of war necessity, State ODT officials urged today that operators file their applications immediately.

An operator cannot wait until November 14 to file his application and then expect to receive his certificate the next day, officials pointed out. Applications must be mailed to the District office where several days are required for processing, they pointed out.

Mailing of applications has been completed for all of North Carolina. If an owner of a commercial motor vehicle has not received his application blank or if he has lost it, he should apply at once to his nearest district ODT office. North Carolina offices are at Asheville, Charlotte, Wilmington, Winston-Salem and Raleigh.

"Commercial motor vehicles" mean trucks, buses and taxicabs, whether operated as public carriers or privately. In fact, most of them are operated privately — more than 1,000,000 of them by farmers.

If a farmer has any difficulty in filling out his application blank, said ODT officials, he should contact his local USDA War board at once.

Unless the owner of a commercial motor vehicle has a certificate of war necessity after November 15, he will be unable to buy tires, gasoline or parts.

Operators were urged to make full use of the instruction booklets which were mailed with the application blanks. A self-addressed envelope included with each application blank mailed.
