Mrs. J. Leroy Parker, a member of the Junior Woman's Club, was guest speaker of the afternoon. Under the subject, "Men At Work On Detour," Mrs. Parker spoke of the responsibility placed on the shoulders of the home maker during these troublous days. "The home maker's part is not glamorous," she said, "we wear no uniforms, we do not march to martial music but our job is vital to the health and welfare of the home front." Mrs. Parker brought her talk to a conclusion with an interesting quiz relating to the conservation of electricity and electric appliances. The club members agreed at this time to sew as a group at the Red Cross work rooms every second Friday afternoon.

Mrs. Melton Allen assisted the hostesses in serving ambrosia, assorted cakes, nuts and coffee.

Favors were handkerchiefs. Guest were; Theodora Albritton, Anne Morgan, Anne Pollard, Blanche Satterwhite, Clara Bala, Jay, Harold and Gayle Chuck Flanagan.

BIRD NOTES
 The English Sparrow was discussed at length by Ray Prescott at the last meeting of the Bird Club. In searching for information regarding this bird, Ray found that ninety years ago there were no such birds in America. They were brought here from Europe about that time and set free in Brooklyn to eat caterpillars that were almost a plague in the cities at that time. People liked having them around and more and more were imported.

The Sparrows seem to like their new land and explored the country, even riding the box cars like tramp tourists. Before long they had reached the Pacific. Multiplying rapidly they are now to be found in every state in the Union.

After some people realized they had made a mistake in bringing the Sparrow to this country for they began eating grain and plants of the farm and garden instead of sticking to the insect menu. Then, they noticed that when the wrens, martins and bluebirds returned in the Spring they found these birds occupying their old haunts, thus making it difficult to have these varieties as nearby neighbors.

The English Sparrow does gobble up Japanese Beetles by the hundreds and some of the large cities would have no bird life except pigeons if they were to be destroyed.

There are many kinds of sparrows in America and it is said that all the native ones sing. The English variety does not, it only chirps and chatters.

State College Hints For Farm Homemakers
 By Ruth Current
 State Home Demonstration Agent
 N. C. State College.

Meats are becoming scarce, as any housewife who shops at the markets and grocery stores will testify. The better grades of meat are, in many cases, going to our armed forces, and that is as it should be. But tough meat is a good starter for stews.

Stews go well in cold weather. Even the toughest and cheapest meat is good for a stew.

When the amount of meat is limited, be more liberal with the vegetables.

For a good stew, brown the meat in a little fat before you add water. Remember not to add your vegetables until the meat is almost tender. Extend the meat flavor in a stew by using dumplings or serving it as a shortcake between rounds of biscuits or on a platter with border of mashed potatoes or fluffed rice.

Ground beef seasoned and broiled on toast catches every drop of the flavorful juices, making a good dish.

A rich meat and vegetable soup is almost a meal in itself. Start the pot boiling with a beef or ham bone, or bones trimmed out of the roast, and later add vegetables.

Sour cream poured over the meat ball and allowed to simmer a day for a few minutes sends a delicious tart flavor into the very center of each plump meat ball and eventually cooks down into a thick sauce, just right for serving as gravy.

The money spent for every hour of Nazi occupation to France would support 500 French families of three people for a year.
