SEWING ROOM SCRAPS

Red Cross sewing room activities are at present centering about the making of hospital slippers and service kits, according to Mrs. W. M. Willis, who reports the sending of 25 pairs of slippers to Greenville this week for shipment to headquarters.

Mrs. Willis, co-chairman of Production with Mrs. W. C. Holston, announced today that new materials were expected to arrive this week, and that while response to the recent call for workers had been encouraging, there is plenty of work to be done and that some service awaits every woman who will give a part of her time to this cause.

The Farmville Parent-Teacher Association met in the high school auditorium, Thursday, at 3:30 o'clock. The unusually large attendance added new enthusiasm to the meeting, which was presided over by Mrs. Ted L. Albritton.

A splendid program of patriotic and soul stirring selections was presented by the High School Band under the direction of John Tyson, Jr. The program opened with the rendition of "The Marine Hymn" and closed with "The Star Spangled Banner."

The attendance prize was won by the 10th grade, Mrs. Robert T. Monk, teacher.

Mrs. Morgan Entertains At Lovely Bridge Shower

Mrs. G. Alex Rouse Honored; Valentine Motif Noted at Affairs of Week

Among the loveliest of the mid-winter social affairs here was the bridge party and handkerchief shower given by Mrs. D. R. Morgan Friday afternoon, which honored Mrs. G. Alex Rouse, whose marriage occurred this month.

Arrangements of red carnations and narcissus added a note of gay color to the Morgan home, and together with table appointments, carried effectively the Valentine suggestion. The place of the honor guest was marked with a corsage.

After guests had arrived fruit and nut trays were served with coconut cake and salted nuts.

Mrs. L. E. Walston was awarded a red pottery vase as high score prize at the conclusion of four progressions. Mrs. Rouse was presented with a vase of red glass by the hostess and a shower of lovely handkerchiefs in the form of a bride's bouquet. Favors were nosegays of red carnations.

New Deal Club. Mrs. Frank Davis, Jr., was gracious hostess to the New Deal Club on Wednesday, entertaining at her home, in which gladioli and carnations were used with artistic effect. Tallies and other table appointments carried the Valentine motif and colors.

When scores were tallied Mrs. R. A. Parker, club member, and Mrs. H. Neal Howard, a guest, were presented with Defense Stamps as awards, and Mrs. W. Leslie Smith received a similar gift as consolation prize.

Mrs. G. Alex Rouse, a club member, whose marriage occurred this month, was remembered by the club at this time with a lovely gift of crystal, and her place was marked by a corsage as a courtesy extended by the hostess.

A delicious congealed salad course, olive sandwiches, crax and coffee were served after play.

Special guests were Mrs. W. Leslie Smith, Miss Nancy Lewis, Mrs. H. Neal Howard, Mrs. M. V. Jones, Mrs. R. O. Lang, Mrs. W. C. Holston, Mrs. J. W. Joyner, Mrs. Z. M. Whitehurst, Mrs. J. H. Paylor, Mrs. E. C. Beaman and Mrs. Lath Morris.

Wednesday Afternoon Club. Mrs. W. Alex Allen delightfully entertained the Wednesday Afternoon Club this week at her home in which sprays of hawthorne were used as decorations. Mrs. George Moore, Jr., and Mrs. Irvin Morgan, Jr., compiled high scores for members and guests and were awarded War Stamp corsages.

After the games a delicious sweet course was served, followed by coffee, cheese straws and salted nuts.

Garden Club. At the January meeting of the Garden Club, held Monday at the home of Mrs. J. I. Morgan with Mrs. T. E. Joyner as joint hostess, Mrs. R. W. Rader was welcomed as a new member of this group.

Mrs. E. F. Gaynor presided and presented Mrs. B. Streeter Sheppard, program leader, whose topic was Lilacs. Mrs. Sheppard said as lilacs leaf out so early in the Spring, they should be planted in the fall in a sunny, well drained location. They need lime and plenty of fertilizer and require heavy pruning. It is well to feed them monthly and liberally for an abundance of bloom. Mrs. Sheppard closed her talk by reading a number of New Year Resolutions for gardeners.

At the conclusion of the program, the hostesses served a delicious salad with sandwiches, coffee and salted nuts.

Quince, camelias, potted azaleas and begonias were used to enhance the loveliness of the Morgan home. Miss Edna Robinson was a special guest at this time.

Lamrad Club. Members of the Lamrad Club enjoyed an afternoon of bridge this week at the home of Mrs. George Moore, Jr. Hawthorne predominated in the floral setting of early Spring flowers.

Mrs. R. B. Fiser was awarded the prize offered for high score. Dainty sandwiches and a refreshing beverage were served after play.

Sharing with club members in the pleasures of the afternoon were Mrs. Frank Allen, Mrs. Walter B. Jones, and Mrs. R. T. Williams, and Miss Dorcas Knowles, who attended as a tea guest.

American Legion Auxiliary. The American Legion Auxiliary held its January meeting in the Red Cross sewing room with Mrs. D. G. Allen, Mrs. G. E. Ballew and Mrs. Nonie Barrett as joint hostesses.

During a short business session, presided over by Mrs. Alton W. Bobbitt, plans were laid for the collection of magazines for Fort Bragg. Contributors here are requested to leave magazines to be given for use of the soldiers at service centers and on troop trains, at Davis Supply Co. An estimate of 2700 magazines needed each month has been given by authorities at headquarters.

Following the period devoted to service for the Red Cross, the hostesses served wafers, hot tea and nuts.

Junior Women's Club. The Junior Women's Club, of which

Mrs. Mabrey E. Pollard is president, met this week to work as a unit in the Red Cross sewing room. The membership had a splendid representation and valuable service was rendered the Red Cross organization.

KNITTERS BRIGADE

Password: knit 1, purl 2.

The Farmville Knitters Brigade continues to march forward in their war effort, and busy fingers are winding wool and plying their needles while the completed garment list grows daily.

Heading the Brigade list this week is Miss Violet Meredith, aunt and house guest of Mrs. C. S. Hotchkiss, who completed a turtle neck sweater in 7 days, with Mrs. B. S. Smith as runner up in an 11 day job.

Mrs. Robert D. Rouse and Miss Margaret Lewis completed one, using the partnership system, which is highly recommended by Mrs. J. W. Joyner, Brigade Commander.

Turtle necks, now in progress of becoming wearable garments, are in the hands of Mrs. J. O. Pollard, who is knitting her second, Mrs. Bessie Skinner, Mrs. Irvin Morgan, Jr., Mrs. Harry Harper, Mrs. H. Neal Howard, Mrs. John D. Dixon, Mrs. Ed Nash Warren, Mrs. T. W. Lang and Mrs. J. H. Harris.

Misses Helen, Hulda and Christine Smith have a challenging record in the completion of 16 sweaters in 3 months.

Circular scarfs have been put under contract this week by Mrs. Frank M. Davis, Mrs. W. E. Joyner, Mrs. Leroy Parker, Mrs. El Ramey, Mrs. J. W. Joyner and Mrs. J. M. Hobgood. Mrs. Joyner states that 4 more volunteers are needed to make Farmville's present quota of 10 scarfs.

Knitters, who are not in the ranks at present, are urged to secure olive green wool from El Ramey's store and begin on the new quota of army sweaters, if they do not desire to undertake the turtle neck sweaters or the circular scarfs.

This column and other news relating to local civilian effort on the home front, as noted in The Enterprise, should prove interesting to the many boys in service, who are receiving this publication, which keeps them in touch with activities in the old home town while they are away.

BIRD NOTES

James Thorne delighted the other members of the Bird Club Saturday, with a selection regarding Bok's Tower, called "the most beautiful spot in America." This Bird Sanctuary and Singing Tower is the center of Mountain Lake Park in Florida. Far from the noises of automobiles and industries, it is a place of quiet repose enjoyed alike by people and birds. There are fifty bird baths used by the birds for drinking and bathing.

Some thirty varieties of birds are habitually there and some remain all winter. Nightingales were imported from England and the bells, seventy one in number, were cast there and sent direct from Liverpool to Jacksonville. A special train of flatcars carried the bells to Mountain Lake with an escort of police and railroad employees.

With its numerous lakes, sylvan setting, and the music of the carillons, and the singing of the birds, it is truly a place where as the motto of the Sanctuary describes it: "I come here to find myself; it is so easy to get lost in the world."

The Tower was erected by Edward W. Bok, simply to create symbols of pure beauty, and as a means to spread the influence and power of beauty, and as an expression of his appreciation and gratitude to the American people. President Coolidge went to Florida to dedicate the Sanctuary and the Singing Tower and to present them for visitation to the American people. It is the "Taj Mahal of America."

Jess Spencer and Otis Pate, Jr., were welcomed as new members.

STATE COLLEGE ANSWERS TIMELY FARM QUESTIONS

QUESTION: Where may edible soybean seed be sold?

ANSWER: J. A. Rigney, State College agronomist, says many farmers have written him asking where they might obtain edible soybean seed. To get such growers in contact with those having the seed for sale, he has agreed to let his office act as clearing house. Farmers with seed for sale and those wishing to buy seed should write to J. A. Rigney, State College Station, Raleigh.

QUESTION: What is North Carolina's egg production goal for 1945?

ANSWER: Under the Food Production Program, North Carolina has been asked to produce 78,204,000 dozen eggs this year. This compares with a total of around 70,000,000 dozen produced in 1942. Actually the 1942 goal was only 65,120,000 dozen. C. F. Parrish, poultry extension specialist, says farmers must give their poultry the very best of care in order to produce this year's requirements.

QUESTION: What is the best way to control the Japs with scrap?

ANSWER: The best way to control the Japs with scrap is to use the "Scrap" method. This involves the use of scrap metal to create a barrier that is difficult to pass. The scrap should be piled up in a way that it is difficult to move. The scrap should be piled up in a way that it is difficult to move. The scrap should be piled up in a way that it is difficult to move.

ANSWER: The best way to control the Japs with scrap is to use the "Scrap" method. This involves the use of scrap metal to create a barrier that is difficult to pass. The scrap should be piled up in a way that it is difficult to move. The scrap should be piled up in a way that it is difficult to move. The scrap should be piled up in a way that it is difficult to move.

ANSWER: The best way to control the Japs with scrap is to use the "Scrap" method. This involves the use of scrap metal to create a barrier that is difficult to pass. The scrap should be piled up in a way that it is difficult to move. The scrap should be piled up in a way that it is difficult to move. The scrap should be piled up in a way that it is difficult to move.

ANSWER: The best way to control the Japs with scrap is to use the "Scrap" method. This involves the use of scrap metal to create a barrier that is difficult to pass. The scrap should be piled up in a way that it is difficult to move. The scrap should be piled up in a way that it is difficult to move. The scrap should be piled up in a way that it is difficult to move.

ANSWER: The best way to control the Japs with scrap is to use the "Scrap" method. This involves the use of scrap metal to create a barrier that is difficult to pass. The scrap should be piled up in a way that it is difficult to move. The scrap should be piled up in a way that it is difficult to move. The scrap should be piled up in a way that it is difficult to move.

ANSWER: The best way to control the Japs with scrap is to use the "Scrap" method. This involves the use of scrap metal to create a barrier that is difficult to pass. The scrap should be piled up in a way that it is difficult to move. The scrap should be piled up in a way that it is difficult to move. The scrap should be piled up in a way that it is difficult to move.

ANSWER: The best way to control the Japs with scrap is to use the "Scrap" method. This involves the use of scrap metal to create a barrier that is difficult to pass. The scrap should be piled up in a way that it is difficult to move. The scrap should be piled up in a way that it is difficult to move. The scrap should be piled up in a way that it is difficult to move.

ANSWER: The best way to control the Japs with scrap is to use the "Scrap" method. This involves the use of scrap metal to create a barrier that is difficult to pass. The scrap should be piled up in a way that it is difficult to move. The scrap should be piled up in a way that it is difficult to move. The scrap should be piled up in a way that it is difficult to move.

ANSWER: The best way to control the Japs with scrap is to use the "Scrap" method. This involves the use of scrap metal to create a barrier that is difficult to pass. The scrap should be piled up in a way that it is difficult to move. The scrap should be piled up in a way that it is difficult to move. The scrap should be piled up in a way that it is difficult to move.

ANSWER: The best way to control the Japs with scrap is to use the "Scrap" method. This involves the use of scrap metal to create a barrier that is difficult to pass. The scrap should be piled up in a way that it is difficult to move. The scrap should be piled up in a way that it is difficult to move. The scrap should be piled up in a way that it is difficult to move.

ANSWER: The best way to control the Japs with scrap is to use the "Scrap" method. This involves the use of scrap metal to create a barrier that is difficult to pass. The scrap should be piled up in a way that it is difficult to move. The scrap should be piled up in a way that it is difficult to move. The scrap should be piled up in a way that it is difficult to move.

ANSWER: The best way to control the Japs with scrap is to use the "Scrap" method. This involves the use of scrap metal to create a barrier that is difficult to pass. The scrap should be piled up in a way that it is difficult to move. The scrap should be piled up in a way that it is difficult to move. The scrap should be piled up in a way that it is difficult to move.

ANSWER: The best way to control the Japs with scrap is to use the "Scrap" method. This involves the use of scrap metal to create a barrier that is difficult to pass. The scrap should be piled up in a way that it is difficult to move. The scrap should be piled up in a way that it is difficult to move. The scrap should be piled up in a way that it is difficult to move.

ANSWER: The best way to control the Japs with scrap is to use the "Scrap" method. This involves the use of scrap metal to create a barrier that is difficult to pass. The scrap should be piled up in a way that it is difficult to move. The scrap should be piled up in a way that it is difficult to move. The scrap should be piled up in a way that it is difficult to move.

ANSWER: The best way to control the Japs with scrap is to use the "Scrap" method. This involves the use of scrap metal to create a barrier that is difficult to pass. The scrap should be piled up in a way that it is difficult to move. The scrap should be piled up in a way that it is difficult to move. The scrap should be piled up in a way that it is difficult to move.

ANSWER: The best way to control the Japs with scrap is to use the "Scrap" method. This involves the use of scrap metal to create a barrier that is difficult to pass. The scrap should be piled up in a way that it is difficult to move. The scrap should be piled up in a way that it is difficult to move. The scrap should be piled up in a way that it is difficult to move.

ANSWER: The best way to control the Japs with scrap is to use the "Scrap" method. This involves the use of scrap metal to create a barrier that is difficult to pass. The scrap should be piled up in a way that it is difficult to move. The scrap should be piled up in a way that it is difficult to move. The scrap should be piled up in a way that it is difficult to move.

Attend Farm Bureau Meet In Raleigh 26-27

Pitt County was reported to have had a large and enthusiastic representation at the annual convention of the North Carolina Farm Bureau Federation held in Raleigh on Tuesday and Wednesday of this week.

Attending the meeting from Farmville were the following citizens, who are vitally interested in agriculture and in favorable legislation for the farmer in Washington: Mr. and Mrs. John T. Thorne, Mr. and Mrs. Robert D. Rouse, Dr. and Mrs. Paul E. Jones, J. V. Monk, Jr., Mrs. W. M. Willis, W. Alex Allen, Arch J. Flanagan, C. A. Tyson, B. S. Sheppard and L. E. Turnage.

J. E. Winslow, of Greenville, was elected president of the Farm Bureau and W. W. "Cap" Eagles, of Maclefield, was re-elected vice president, both without opposition.

Congressman Henry B. Steagall, the featured speaker of Wednesday's program, told the 700 delegates and visitors present that they must strengthen their organizations and keep an active lobby in Washington. He predicted an easier time for the farmer in 1945 since as he expressed it, "some of the foes of the farmer have departed."

Governor Broughton preceded Steagall on the morning program, Wednesday, and expressed his belief that Tar Heel farmers will be able to meet their war production goals without the need for importation of labor.

SECOND MIDWINTER THUNDERSTORM FOR RECORD THIS MONTH

Another thunderstorm this week may be added to the one occurring ten days ago for January recording in the weatherman's book for this section of the State, together with the intermittent and heavy showers which followed.

Sides are overcast today, Thursday, and scattered showers have been the rule throughout, with the temperature hovering around the low mark and with cold and disagreeable weather resulting from this condition.

Springlike weather, which prevailed last week, aided in stretching out the fuel oil rationing cards in homes and business places and in keeping the coal bin near the same level for several days.

TOO BIG YARN.

Denver.—Jack Harrington, 34-year-old bartender, yarned tremendously and had to be taken to a hospital where he was given an anesthetic while doctors replaced his dislocated jaw.
