Alex Rouse presiding. Quantities of handsome daffodils were used with flowering shrubs in the floral arrangement of the home.

The meeting was opened with the singing of the national anthem, with accompaniment by Mrs. Smith. The salute to the flag was led by Miss Tabitha DeVivanti. The chaplain, Mrs. C. S. Eagles, conducted the devotional exercises, which were based on the 23rd Psalm.

During the business session, Miss DeVivanti reported on the Plasma Bank Fund and donations by this organization. Mrs. Eagles, of the historical committee, told of compiling a list of the sons of the chapter members, who are in service, and Mrs. A. C. Monk discussed the purchase of a service flag for the chapter house.

She suggested that every-one study the Atlantic Charter and have forums on the Four Freedoms and on World Peace. After her talk Mrs. Moore exhibited her interesting collection of buttons and coins.

State College Hints For Farm Homemakers

By Ruth Current, State Home Demonstration Agent, N. C. State College.

You have heard about packing thoughts into a nutshell. Well, two words that pack a good deal of meaning about our supply of food are: produce and conserve.

The food that a family grows in one garden may not look impressive, but add up food on 6,000,000 farms, and 12,000,000 to 15,000,000 Victory Gardens in backyards and on vacant lots. Do that, and you have a grand total of food for war needs and for home needs.

As for conserving, every homemaker can help make the food supply go farther and put the food she has to good use. A homemaker is conserving when she plans balanced meals. She is conserving when she shops with her eyes open and buys foods that give good value in nutrition. And, she is conserving when she sees that nothing goes to waste. She is conserving when she cooks meals well, so the family gets all the good from food. And she is conserving, of course, when she preserves food for the future.

Proper posture greatly improves the general appearance. You can make progress, if you think of your posture at all times and make a conscious effort to improve it. To stand straight and tall, keep your feet parallel, with toes pointing straight ahead. Keep your knees slightly bent and relaxed, with the abdomen flat (held up and in).

Keep your hips pulled down, in the position that you naturally take when you make yourself small to squeeze through a narrow space, with your buttocks muscles tucked under.

Keep the shoulders level, swinging free and relaxed. The chest and ribs should be held up in any easy position. Keep your head well up and perfectly balanced; your chin level with the ground; and your body parts balanced directly one over the other. Always watch the ear-to-ankle line—a straight line drawn through the lobe of the ear, the tip of the shoulder, the hip, and the ankle bone.
