Published weekly and entered as Second Class Mail Matter at the Post Office at Farmville, N. C., under Act of March 3rd, 1879.

If there were windows to the soul many would need to keep the shades down.

There wouldn't be anything crooked with horse racing if it were left to the horses.

Sometimes when you think the world is laughing with you it is laughing at you.

There's usually no harm in a columnist unless he happens to be a fifth columnist.

If this year's berry crop turns out well as is expected, it will likely end in a jam.

Hog prices have reached an almost all time high. It seems to be the time for the consumer to squeal.

Uncle Mose: Preacher preached last Sunday about that Mr. Dan and Miss Bernsheba. He say dey lib a long way a part.

Women can sometimes be so tactful. For instance the patient who 'phoned her doctor she was eating an apple a day.

Bootleggers are like doctors. They prepare their concoctions for others to drink and not themselves.

Uncle Mose: When ole Georgis 'possum dawg gotta actin' funny dey shot him and sent he haid to de doctors ter 'zamine. Dey said he had rabbits. Dat's funny when he a 'possum dawg.

STATE COLLEGE ANSWERS TIMELY FARM QUESTIONS

QUESTION: At what distance in the row should sweet potato plants be set?

ANSWER: H. R. Niswonger, Extension Horticulturist, says that the plants should be spaced 12 inches apart in rows about 3 to 3 1/2 feet apart. He points out that this close spacing reduces the number of "Jumbo" potatoes and also lessens from stem rot. In areas where the crop is to be harvested for the early market, the distance should be at least 18 inches with the rows about 3 feet apart.

QUESTION: Are feed hoppers necessary for chickens on range?

ANSWER: Experience at the State College poultry plant indicates that an ample number of both feeders and waterers are necessary for birds on range, says C. J. Mauph, Extension Poultryman. When the weather is hot and the birds are restless, this equipment should be placed at convenient locations for the chickens. Two six-foot hoppers and water containers should be placed in each shelter, or two six-foot outdoor feeders and ample water containers near the shelter, preferably under trees.

QUESTION: How can I build an egg cooler at home?

ANSWER: Write the Agricultural Editor, N. C. State College, Raleigh, for a free copy of Extension Folder No. 48, entitled "The Egg Cooler". It gives a blue print and bill of materials for building the cooler. Thousands of dollars worth of eggs can be saved this summer if growers will be careful in handling them.

"It Takes Both"

It takes an Ibsell and a Hulson... a Samsy Rugh and a Dick Todd to form a forward pass combination. It takes both... War Bonds and Taxes to provide the necessary finances to win this war—a war for freedom and humanity. Are you doing your part? U. S. Treasury Department

First choice of thousands BLACK DRAUGHT when A LAXATIVE is needed. Ibsell and Hulson's Black Draught is the best laxative in the world. It is a natural, safe, and effective remedy for constipation, indigestion, and all ailments of the bowels. It is made from the finest natural ingredients and is completely non-habit forming. It is the only laxative that is both a cathartic and a purgative. It is the only laxative that is both a cathartic and a purgative. It is the only laxative that is both a cathartic and a purgative.

RESOLUTIONS OF RESPECT

Whereas God in His Infinite Wisdom has seen fit to remove from our midst the cheerful spirit of Mrs. Bettie Becker Ashlow, our Club friend and Co-worker, we the members of the Farmville Literary Club pause in reverence to pay tribute to her memory.

In appreciation of her devotion to her home, church, club and community, we bow in humble submission to the Divine Will, but mourn the loss of one who was to each member a friend. Although not able to attend the meetings of her club very often during the last few years, yet her interest in it and its accomplishments never failed. She was a charter member of the club and it was organized at her home thirty-nine years ago.

THEREFORE BE IT RESOLVED: First—That we extend to the bereaved husband and family our sincere sympathy, and commend them to the loving care of our Heavenly Father.

Second—That while we shall miss her friendly fellowship, helpful assistance, and wise counsel, yet we will always cherish the memory of her unselfish spirit, her Club loyalty, her kindly considerate manner and her cheerful, happy outlook on life, which will ever be a source of inspiration to us.

Third—That these resolutions be entered in the permanent records of our Club, a copy be sent to the bereaved family, and a copy to The Farmville Enterprise for publication. Mrs. J. W. Parker, Mrs. J. I. Morgan, Sr., Mrs. J. H. Darden, Committee.

State College Hints For Farm Homemakers

By Ruth Current, N. C. State College.

The turnip is a double-action vegetable. The roots make good winter fare—and the tops furnish greens that are rich in vitamins and minerals. Every daily menu should include at least one green leafy vegetable, as turnips, mustard greens, or collards.

Greens top all foods insofar as Vitamin A is concerned. One serving, or one-half cup of turnip greens will provide three times our daily requirement of this vitamin.

Turnip greens rate high as a source of calcium. One serving, or one-half cup (and this is two-thirds as much calcium as a glass of milk will furnish) will give us one-fourth of our daily requirement.

The greens are high in iron and, with most foods shy in iron, this is valuable information to know. One-half cup of turnip greens will give us one-fourth of our daily requirement of this mineral.

Greens also are high in vitamin C, and they are a good source of riboflavin, or vitamin G.

Greens are cheap, plentiful, and easily cooked. Pick them over and wash them in warm water to loosen the dirt; then, rinse them thoroughly in cold water, cut the larger leaves and cook rapidly in a small amount of water, for from 10 to 30 minutes. Season them anyway that you wish, but be sure to cook them with bacon fat or ham bone.

Minerals are present in the foods we eat. The amounts are so small that it is impossible to see them, but

they are absolutely necessary for good health. They may be classified as both protective and building substances.

SOLDIERS

Well-fed soldiers remain healthier and recover sooner from fatigue and wounds; they can fight offenser and throughout a longer period, reports the Army Medical Service.

If a man is sick he goes to his doctor. If in trouble he goes to a lawyer, everything is the matter with him he hunts his preacher.

Applications Are Made For 1942 AAA Farmers

More than 196,000 applications for payments for carrying out approved production practices and adjustment measures under the 1942 Agricultural Adjustment Agency farm program already have been received in the State AAA Office, according to H. A. Patten, State AAA executive assistant.

Final date for executing applications was March 31 and a small number of applications remain in county AAA offices for final preparation, he said.

He estimated that earnings under the 1942 AAA program will reach approximately \$12,000,000 for both production practices and adjustment measures. This figure is more than \$2,000,000 below the earnings during the 1941 program year because of automatic elimination of most parity payments because of higher prices and streamlining of the production practice phase of the program to meet wartime demands. Of the

FERTILIZING PEANUTS

We list below three successful ways to FERTILIZE PEANUTS

1. Apply 300 to 400 lbs. Fertilime (0-10-10) when planting. Apply 400 to 500 lbs. Land Plaster at Blossom time.

2. Apply 400 to 500 lbs. Dolomitic Lime at time of planting. Apply 75 to 100 lbs. Muriate of Potash as top dresser. Apply 400 to 500 lbs. Land Plaster at Blossom time.

3. Apply 400 to 500 lbs. Potash Lime at time of planting. Apply 400 to 500 lbs. Land Plaster at Blossom time.

total amount, more than \$7,127,000 already has been paid to farmers of this State. Practices for which payments are made under the AAA program represent fertility farmers store in their soil," Patten said. "When the war came farmers found themselves in a better position than any other single industry for immediate maximum production of food, an essential war material. The record crops of last year were due more to increased per acre yields as a result of improved soil fertility than to additional acres under the plow." He said farmers recently have completed signing 1943 farm plans indicating whether they will take part in the 1943 AAA program.

THE 2ND WAR LOAN DRIVE IS ON! It's Ten Minutes to Midnight! Wake Up, Americans... Your Country's Most Fateful Hour Is Near. THE hour when the final die is cast, when decisive victory hangs in the balance. The hour which will decide the future of you and your children... a future of joyous freedom or a future of endless serfdom. Yes, it is ten minutes to midnight. And when the first stroke of that fateful hour begins to sound, it will be too late to throw your weight into the fight. The time to do that is NOW. Now, when your dollars can keep the production lines humming. Now, when your dollars can buy the tanks and guns and planes and ships our soldiers need to fight a winning war... the only kind of a war we can afford to fight. Now, while there are still ten minutes before midnight. Your country is asking you to lend your dollars in greater amount than ever before. It is asking for 15 billions of dollars extra this month... 15 billions for the weapons of war to make sure that it is our side which dictates the peace. If we do not win, the money you fail to lend now will be worse than useless to you. If we win, as we must, the money you lend now will be returned with interest... for you to spend on the good things of life... for you to enjoy in a free and safe world. So dig down, Americans. Answer the Challenge by buying War Loan securities this month with every idle dollar you have except what you need for the barest necessities of life. Don't wait for the War Loan Volunteer. Beat the gun by going to your bank, investment dealer, broker, Post Office, or bond booth today. Have your money in your fist... the fist that can deliver the knockout blow to the Axis. But hurry... For it is ten minutes to midnight... The hour that can strike the knell of doom... or the blessed song of freedom. Your dollars can call the tune. There are Seven different types of U. S. Government Securities—choose the ones best suited for you: United States War Savings Bonds—Series E: The perfect investment for individual and family savings. Gives you back \$4 for every \$5 when the Bond matures. Designed especially for the smaller investor. Dated 1st day of month in which payments is received. Interest: 2.9% a year if held to maturity. Denominations: \$25, \$50, \$100, \$500, \$1000. Redemption: any time 60 days after issue date. Price: 75% of maturity value. 2 1/2% Treasury Bonds of 1944-1949: Readily marketable, acceptable as bank collateral, these Bonds are ideal investments for trust funds, estates and individuals. A special feature provides that they may be redeemed at par and accrued interest for the purpose of satisfying Federal estate taxes. Dated April 15, 1943; due June 15, 1949.
