

## WALSTONBURG NEWS

Mr. and Mrs. George Eason, of Snow Hill and Mr. and Mrs. J. J. House of Walstonburg were Wilson visitors Sunday.

The F. W. B. Missionary Society of Howell Swamp Church will have their annual bazaar Tuesday, Nov. 23. The public is cordially invited.

Miss Mamie Etheridge of Drvers Store was a week and guest of her sister, Mrs. George Beamon.

Pfc. Carter Smith had a 10 day delay enroute from Fort Benning to Camp Polk, and spent the time at his home near here last week.

Mr. and Mrs. John T. Thorne of Farmville visited relatives near town Sunday P. M.

Mrs. Neta Shackelford is visiting her daughter, Mrs. W. P. Ellis in Wilson.

Mr. and Mrs. Walter Speight and children spent last Sunday with his father and mother, Mr. and Mrs. M. Speight.

Mr. and Mrs. Ira Windham of Eureka spent last Sunday with Mr. and Mrs. William Windham.

Mrs. Bryant Wheeler and daughter, Fay, of Newport News, Va. spent last week end with Mr. and Mrs. E. L. Jones.

The Rev. W. L. Moretz was the dinner guest of Mr. Major Jones and Miss Fannie Mae Smith last Sunday.

Mrs. J. W. Griffin of Elm City is visiting her son, W. F. Griffin.

Mrs. David Windham and Mrs. Robert Hayes, Jr., went to Farmville Tuesday on business.

Mrs. J. P. Butts spent last week end in Farmville with her son, Joe Butts.

Mr. and Mrs. L. F. Eagles of Fountain, Mrs. W. E. Lang and son, Truett, and Dr. and Mrs. C. S. Eagles of Saratoga were dinner guests of Mr. and Mrs. L. F. Smith, Wednesday night.

Mrs. E. P. Brooks, Graham Smith and Mrs. Carter Smith went to Raleigh Thursday evening.

Eddie Jones of Farmville was a week end guest of Mr. and Mrs. E. L. Jones.

Pfc. and Mrs. Carter Smith, Mrs. Ivey Smith and Mrs. E. P. Brooks were dinner guests of Mr. and Mrs. F. L. Eagles in Fountain, Monday night.

Mrs. Emma D. Jenkins of Farmmont is visiting Mr. and Mrs. Sam Jenkins and Miss Clara Jenkins this week.

## REA Seeks Wise Electricity Users

The Federal Rural Electrification Administration is making plans to provide a plaque to be awarded to one farmer in each county who, through the use of electricity, has increased the quantity and quality of his food and feed, announces D. S. Weaver, head of agricultural engineering at State College.

Beginning immediately, farmers who know of people who have used electricity to help meet their food goals in war times are asked to report their names to the county farm agents.

Both cooperative customers and public utility users are eligible, Weaver says. He hopes that every county in North Carolina will have at least one award winner in this campaign.

By the terms of the announcement, although provision has been made for plaques for every county in the United States, it is expected that some areas will have more than one winner and some counties will have none.

Bases on which the awards are to be made are these: Increases in production; maintenance of production with less labor; use of time saved by farm women through electrical appliances in dairy and poultry production, garden, canning or field work; and self-sufficiency on the farm through the production of food and feed products.

Complete details of the contest may be obtained from the managers of the 28 cooperative REA organizations in North Carolina.

Weaver urges farmers to begin now looking through their neighborhoods for persons to be nominated to their county agents.

## STATE COLLEGE ANSWERS TIMELY FARM QUESTIONS

**QUESTION:** Will a storage battery in a farm tractor freeze during cold weather?

**ANSWER:** David S. Weaver, in charge of agricultural engineering at State College, says that a discharged battery will freeze when the temperature drops slightly under 32 degrees and that the plates may be damaged. If the battery is kept charged, it will withstand much lower temperatures without freezing. Weaver reports that a battery won't heat at 80 degrees temperature and that when the temperature reaches zero, its starting capacity is cut in half.

**QUESTION:** Are there any health advantages in eating enriched bread and enriched flour?

**ANSWER:** Enriched, white flour is near the level of whole wheat flour in niacin and iron, is equal to it in thiamin, and much higher in riboflavin, says Ruth Current, home demonstration leader of the State College Extension Service. Enriched, white flour is also valuable in preventing deficiency diseases such as pellagra and nutritional anemia. Most important, it helps to combat mild forms of these diseases which are believed to be the cause of so much ill health and inefficiency. When carrying wheat to the mill, it is recommended that you carry home just as much whole wheat flour as you can count on eating before it spoils.

**QUESTION:** Can I sell my extra turkeys, without breaking Government regulations?

**ANSWER:** Yes. The Government has restricted the sale of turkeys to civilians has been lifted, says C. F. Parrish, Extension poultry specialist at State College. Growers may now sell to anyone they wish so long as they do not sell above the ceiling prices. The ceiling price is higher on young turkeys than old turkeys of the same weight. There are three weight classes for turkeys: under 18 pounds; 18 to 22 pounds; and 22 pounds and over.

## Save Good Peanuts For Planting Seed

Growers who have peanuts suitable for planting purposes should by all means save a supply of seed for 1944, says Dr. E. R. Collins, in charge of Extension agronomy at N. C. State College.

For those growers who do not have good peanuts for planting, the Commodity Credit Corporation is setting aside through the crushers and the Growers Peanut Cooperative a sufficient amount of peanuts of all three types for planting purposes.

It has been announced that peanuts which have been determined to be good for planting purposes will be sold to dealers by the Commodity Credit Corporation for sale to farmers for planting purposes. Prices for seed peanuts have not as yet been determined.

Peanuts have been harvested under excellent conditions this season and the germination on the nuts should run comparatively high, especially where there was no rain to damage them while in the stack.

Last year there was a shortage of good peanuts for planting purposes and many growers were forced to plant run-of-the-mill nuts which were low in germination. Poor stands resulted and yields were correspondingly reduced. The present program has been inaugurated to that growers will have a good supply of peanuts for planting purposes in 1944.

## EXTRA FOOD

Extra food will help shorten the war, save American lives, and help write the peace. Food fights along with guns and tanks, with ships and planes.

## MILK

The natural color of milk is due to the refraction of light from the suspended material and to the carotene and vitamin G contained in it, say dairy specialists at State College.

## Remove Livestock From Pasture Now

Livestock should be taken off pastures just after the first frost so that the pasture grasses may store up food for the winter months and be in position to make a quick growth next spring, suggests Dr. R. L. Lovvorn, former crop agronomist of the Agricultural Experiment Station at State College.

He says that pastured are like bears in that they have to store up food for the winter months. Bears live through the long winter period of starvation on the fat which they stored up in their bodies through summer feeding.

Grasses must build up a strong root system to live through the winter in good condition and be prepared to make a maximum of early growth for spring grazing. "Growers will note that grasses which have been protected by brush in the pasture and plants around fence posts and like places not only make the earliest spring growth but also the largest amount of grass for early grazing," Lovvorn says.

He also points out where cattle are allowed to run on the pasture during the winter months after all grazing has passed, a large amount of physical damage is done the pasture and it takes quite some time in the spring for the pasture to recover from this bad treatment.

Removing cattle from pasture just after the first frost will give the grasses time to build up a winter reserve of food that will bring earlier grazing and more grazing next spring.

## FERTILIZER

WFA points out that farmers can save money and at the same time make a substantial contribution to the war effort by buying higher analysis fertilizers.

## CIDER VINEGAR

Producers of cider vinegar who are unable to get enough cider to keep their output at 1940-41 levels are eligible to use part of the industrial alcohol supply in the production of vinegar.

## POTATOES

To get the most from your potatoes, cook them in their jackets, says Mary E. Thomas, State College nutrition specialist. If you must peel them, keep the peeling thing.

## NOTICE TO CREDITORS

Having qualified as executor of the estate of R. E. Belcher, late of Pitt County, North Carolina, this is to notify all persons having claims against the estate of the deceased to exhibit them to the undersigned at Farmville, N. C., on or before the 23rd day of October, 1944, or this notice will be placed in bar of their recovery. All persons indebted to said estate will please make immediate settlement.

This the 19th day of October, 1943.  
W. A. POLLARD, Jr., Executor,  
R. E. Belcher Estate.  
John B. Lewis, Atty. 022-4wks

## NOTICE OF SUMMONS FOR PUBLICATION

North Carolina, Pitt County, In the Superior Court.

## Roy Daughtery

vs.  
Emma Louise Spell Daughtery

The defendant, Emma Louise Spell Daughtery, will take notice that an action entitled as above has been commenced in the Superior Court of Pitt County, North Carolina, to secure for the plaintiff an absolute divorce from the defendant; and the said defendant will further take notice that she is required to appear at the office of the Clerk of Superior Court of said County in the Courthouse in Greenville, North Carolina, within 30 days after the 15th day of December, 1943, and answer or demur to the complaint in said action, or the plaintiff will apply to the court for the relief demanded in said complaint.

J. F. HARRINGTON,  
Clerk of Superior Court.  
This the 18th day of November, 1943.  
N12-4wks

## TOWN AND FARM IN WARTIME

(Continued from page 1)

without danger to the future supply, according to the Department of Agriculture. If farmers would consider their woodlands and farm forests as crop lands, and every year carefully cut selected trees that are ripe for harvest, they would be surprised at their returns and "they would certainly aid the war effort," H. H. Benson, chief of the Soil Conservation Service, said.

**New Mending Bulletin Available.**  
A new edition of the wartime bulletin, "ABC's of Mending," has recently been issued by the Department of Agriculture. The booklet gives directions with illustrations for mending household fabrics and furnishings as well as clothing. Skillful and prompt mending is encouraged, because the longer any fabric can be made to last, just so much is the burden lightened on civilian goods production. A copy of the booklet may be had by writing to the Office of Information, U. S. Department of Agriculture, Washington 25, D. C.

**Canned Luncheon Meat.**  
Consumers will be able to buy more canned luncheon meat during the coming year, according to the War Food Administration. Canning of this product is encouraged because it prevents waste of good bits and trimmings of meat at packing plants.

**Temporary Food Rations.**  
Service men on leave can get temporary food rations without the forms usually furnished by the armed services, according to OPA. In an emergency, application may be made on forms available at local ration boards.

**Reduce Christmas Lighting.**  
The American people have been asked by the Office of War Utilities to confine Christmas lighting decorations to Christmas trees inside private homes. Saving of electricity will mean direct savings of fuel, manpower, transportation, and materials. Scrap Drive to Continue.

The "Victory Scrap Bank" Drive, scheduled to end November 15, has been continued indefinitely. H. M. Fault, director of the Salvage Division of WPA said: "As long as the war lasts, there will be a continuing need for iron and steel scrap to keep the mills well supplied. The collection of iron and steel scrap from all sources must be a continuing operation."

**Manpower Head Praises Farmers.**  
Assurance that farm men and women are occupying key positions in the war effort has been given by Paul V. McNutt, chairman, War Manpower Commission. "While the history of this war is written," he said, "I am certain that much of the credit for victory will go to the men and women of our rural districts. Certainly, no war has the production of food played so vital a part and certainly no group has rallied behind the war effort with more eagerness and devotion. We of the War Manpower Commission have done everything in our power to maintain the nation's agricultural labor force at top capacity. Every acre of land that can be planted brings victory as much nearer."

**New Use For Farm Waste.**  
Peanut shells, ground corn cobs, and similar waste agricultural materials have been found useful for cleaning engines, bearings, valves, pumps, and other machinery and metal parts, the Department of Agriculture has announced. The new use has been found by scientists at the Northern Regional Laboratory at Peoria, Ill. Several hundred tons of ground corn cobs now are being used each month for burnishing metals and cleaning war machinery.

**Start Consumer Survey.**  
Census enumerators expect to visit 7,000 households in a nation-wide survey to determine the availability of 115 types of goods. As a result of these studies, the Office of Civilian Requirements will have information from consumers to aid in carrying out its function of maintaining an adequate supply of necessary civilian goods within wartime limits of manpower, materials, and manufacturing facilities.

**Movies For American Troops.**  
The U. S. Army is well on its way to having motion picture equipment everywhere in the world that it is needed by its troops. Movies are shown 125 times daily for U. S. troops in Aleutian outposts, according to the War Department. There are 63 projectors on the island chain, one on each occupied island. A continual flow of films has been shown during the past five months.

**Army Saves On Food Bill.**  
A saving of 1 1/2 cents per person per meal might seem trivial to a housewife feeding a family of four, but in an industry division of 15,000 men it adds up to a striking total. In one division \$89,707.25 was saved over a five-month period by food conservation measures, the War Department declared recently.

**How To Address Merchant Seamen.**  
Because letters from home are a big factor in maintaining morale of merchant ship crews as they are with soldiers, bluejackets, and marines, the War Shipping Administration has relaxed regulations to speed movement of mail. A seaman in a foreign port may advise his family and friends how to address mail to him by including the name of his ship in the letters enclosed in envelopes, but not on outside envelopes. To address a seaman, this form should be used: first line, seaman's name; second, name of his ship; third, "Care of Postmaster"; and fourth, New York, New Orleans, or San Francisco, according to the coast from which the addressee sails. Return address should appear in upper left corner, and name of steamship line in lower left corner.

## FRUIT SPREADS

Consumers will use their processed food stamps to buy fruit spreads. These include the green stamps in Book Four.

## FOOD NEEDS

Under the present set up, our armed forces get 18 percent of 1940's food; civilians, 75 percent; Land Lease, 10 percent; and friendly neighbors two percent.

## REAL DISCOVERY FOR HIGH BLOOD PRESSURE

Dangerous High Blood Pressure (Essential Hypertension) is usually marked by distressing symptoms such as dizziness, throbbing headaches, sleeplessness and nervousness. If disregarded, it may lead to heart trouble, stroke, paralysis, hardening of the arteries or kidney trouble. Diamondex, discovery of a heart specialist, is designed to quickly aid in the relief of these distressing symptoms.

A Chicago resident says: "I suffered from High Blood Pressure for several years with increasingly severe throbbing headaches, dizziness and shortness of breath. I showed the Diamondex formula to my doctor and, on his advice, tried the treatment for two weeks under identical conditions as previous treatments. Within only three days my bad headaches and dizzy spells were gone. My high blood pressure was reduced and I sleep fine."

Diamondex goes directly to work in three different ways to aid in the relief of these dangerous symptoms. Results are speedy—within as short a time as two weeks sufferers often find that Diamondex has accomplished 75% of the total reduction possible with this formula. If you suffer from High Blood Pressure you may try DIAMONEX without risking a penny. To introduce this wonderful treatment to a million new sufferers this liberal trial offer is made for a limited time only.

Send only \$1.00 to the Diamondex Company, 316-A North Michigan Ave., Chicago, Illinois for a full TWO weeks supply of genuine DIAMONEX, prepaid. Use Diamondex according to the simple directions for only two weeks. If, at the end of that test period you are not delighted with results your money will be refunded immediately on request. There are no strings or conditions—just owe it to yourself to make this wonderful test at once. Write today as this offer is fully guaranteed.
