

WALSTONBURG NEWS

Miss Ruby Marlowe returned Sunday to resume her duties as teacher in the Rose Hill School. Miss Hazel Baker is ill at the home of her sister, Mrs. Ray West, Jr., and hasn't been able to return to her school in Farmville. Mrs. E. F. Brooks has returned home after spending the holidays with friends and relatives in and near Monroe. I. F. Smith, J. S. Whitley and Reddin Bailey were Snow Hill business visitors Monday. Mr. and Mrs. James Barnes, of Raleigh, and Mr. and Mrs. Wayne Boyette, of Wilson, were guests of Dr. and Mrs. W. A. Marlowe, Sunday. Pfc. William Jones is spending a furlough at his home here. Mrs. W. E. Lang spent Monday in Raleigh. William Whitley returned to school at Chapel Hill, Monday. Lt. Ed. S. Taylor is home on leave. He will go from here to Austin, Texas. The Woman's Club met with Mrs. Paul Craft last Wednesday. Mrs. G. E. Ethridge, of Buckingham, Va., spent the holidays with her sister, Mrs. L. H. Goin. Mrs. Melvin Perry and son, Lammie, have returned to Colerain, after spending sometime visiting Mr. and Mrs. Henry Burch. Mr. and Mrs. Dewey Johnson and family have moved to town. They are residing in the residence formerly occupied by Mrs. Sudie Bowden and family. S. L. C. L. Beaman is at home for 30 days. Misses Eleanor Shelton and Helen Beaman and Leonard Mann attended the Youth Fellowship meet at A. C. College, Wilson, last week.

LYERLY-DILLY

Announcement is made of the marriage of Miss Studie Lee Dilly, daughter of Mr. and Mrs. W. A. Dilly, of Walstonburg, to Mr. Woodrow Lyerly, of Mt. Ulla, on Tuesday, December 28, at four o'clock at the home of the bride.

Rust Preventives On The Market

New rust preventive compounds or greases to stop the rusting of farm machinery when it is left in the open or stored under a shed is now available, according to J. D. Blicke, Extension agricultural engineer at State College.

"Every user of farm machinery or other equipment owes it to himself, particularly under present machinery shortages, to protect his equipment against the damage caused by rust," Blicke says.

He points out that the liquid rust preventatives can be sprayed or brushed on metal parts and will prevent rusting for four to six months on machinery standing out-of-doors, and for a year or more on machinery stored under cover.

The soft grease type of rust preventive, when brushed on metal surfaces, will prevent their rusting for a year or more on machinery stored outside and for an indefinite period when stored under cover.

Blicke suggests that the rust preventive be applied to mold-boards, colters, discs, grain drill furrow and metal hoppers, bolts and nuts where adjustments are made, and sheet metal parts of elevators on combines, corn pickers and other machines.

Rusting is prevented by the new compounds because they adhere firmly to the metal surfaces and form a elastic non-porous film through which moisture and air cannot penetrate, the agricultural engineer says.

Cholera Downed By Vaccination

The story of how American farm front fighters have won a nationwide victory over the No. 1 threat to wartime pork production, hog cholera, was revealed in a recent report of the American Foundation for Animal Health, says Dr. C. D. Grinnell, veterinarian with the Agricultural Experiment Station at State College. "Every authority knew that a devastating wave of cholera this year could wreck our whole pork production effort," the Foundation's report says. "The bottleneck in hog cholera control was the nation's capacity to produce serum and virus, with which to immunize the tremendously increased pig crop, vaccination being the only known protection against cholera."

"Two factors saved us: First, the

First choice of thousands

BASKIN-ROBBINS

control program of the Department of Agriculture, under a marketing agreement and order by which producers of serum and virus are obligated to have a May 1 reserve totaling 40 percent of the previous year's sales—much like the "ever normal granary" plan. Second, an all-out production effort which sent this year's hog cholera serum and virus output 52 percent above the total of two years ago. It was just as serious a production battle as that of our shipyards and munitions plants, and we won it because they won theirs.

"Out on the farms, the nation's veterinarians had an equally hard task in immunizing tens of millions of pigs before cholera could strike. In many areas they worked literally day and night to get the job done. Reports show no communities where hogs died because serum and virus were not available—and the nation is millions of pounds richer in its pork reserves," Dr. Grinnell quotes the report as saying.

School Lunch Calls For Special Foods

Sponsors of school lunches can get help from the Food Distribution Administration in paying for special lunches if they will follow two approved school lunch patterns in preparing the food, say officials from Washington.

The Administration will pay, usually from 6 to 9 cents per meal, for certain specified foods purchased for and served in either of the two kinds of lunches. The menu may include a wide variety of foods, depending on local supplies of foods.

The "Type A" lunch provides from a third to a half of the five kinds of food that a growing child needs daily. The "Type B" lunch has the same kinds of food but the helpings are smaller and contain less protein, fat, minerals, and vitamins, except for milk, which remains the same.

The "Type A" lunch provides: (1) A half-pint of fresh whole milk as a beverage. (2) A 2-ounce serving of meat or fish, or 1 egg, or 2 ounces of cheese, or half a cup (cooked measure) of dry peas, beans or soybeans, or 4 tablespoons of peanut butter. (3) One cup of vegetables or fruit, or half a cup of each. (4) One or more slices of bread, or muffins, or other hot bread, made of whole-grain or enriched flour or cereal. (5) Two tablespoons of butter, or margarine with added vitamin A.

The officials pointed out that adults, who want a nutritious lunch, can follow the "Type A" lunch pattern to advantage in ordering food at a restaurant.

Home-Made Lime Spreader Built

A home-made lime spreader has been designed by the Agricultural Engineering Department at State College which utilizes materials which can be found in almost any junk yard, reports David S. Weaver, head of the department.

It consists of a hopper with a rotating plate directly under openings in the bottom of the hopper. The rotating plate is driven through the gearing, which is found in the rear axle of a discarded automobile. Old tires, too worn for any use on a car or truck, may be used on the machine.

The spreader, which costs on the average, about half the price of a commercial spreader may be used for hauling lime and certain fertilizer materials in fertilizing pastures, meadow strips, and in distributing lime for a wide variety of crops.

Growers wishing to build a home-made spreader should write the Agricultural Engineering Department, State College, Raleigh, for a free copy of Plan No. 254.

T. B. Slade of Hamilton in Martin County has been using one of these spreaders in fertilizing his lespedeza acreage and is pleased with it. Assistant County Agent L. L. McLenon and H. F. McKnight of the Soil Conservation Service assisted Slade in making the spreader and the necessary parts were obtained from a local junk dealer.

TOWN AND FARM IN WARTIME

(Continued from page 1) have available an average of about 5.9 pounds of beans and 1.6 pounds of peas during the coming year. This is slightly larger than the per capita consumption of dry beans in the 1942-43 crop year and is a much larger consumption of dry peas than for any previous calendar year.

To Get More Children's Wear. To insure sufficient production of infants' and children's wear, the industry has been included by the War Manpower Commission in its list of essential activities. Also, WPB has ordered approximately 15 million yards of cotton fabrics set aside for the manufacture of certain specified items of infants' and children's clothing. Waxed and cotton yarn will be allocated for manufacture of knitted outerwear and infants' ribbed long hose, half socks, and anklets. Such goods will not arrive on retail counters until February and March.

New Riding On Allow. An enemy alien who is a German, Hungarian, Bulgarian, or Bulgarian citizen or national may be inducted into the armed forces of the United States and assigned to a war theater in which he will not normally be required to fight against fellow citizens or blood relatives, under

recent revision of Selective Service and War Department policies. The change in regulations may cause some enemy aliens to withdraw their objections to all U. S. military service. Such cases will be reconsidered. Because of the recognition of Italy as a cobelligerent, local Selective Service boards have been directed to reconsider the classifications of Italian registrants previously not acceptable because they were enemy aliens. Neutral aliens may file a Selective Service form 301 and request relief from service in the armed forces of the U. S. However, if a neutral alien becomes a cobelligerent, the previously filed form becomes ineffective.

Changes In Stove Rationing

Eligibility requirements for rationed heating stoves have been widened. A consumer who has a heating or cooking stove that cannot be used satisfactorily is now eligible for a stove rationing certificate. Ration certificates also may be issued for stoves to heat premises where essential community activities, such as volunteer Red Cross work, are carried on. A ration certificate now may be issued to a landlord who wishes to buy a stove for the use of an eligible tenant.

Two Million Flatirons Coming

A program to make two million flatirons for civilian use in 1944 has been approved by WPB. This amount will not come up to normal produc-

tion but it will ease the hardships caused by two years of almost no production. It will probably be six months before many of these iron reach dealers' shelves.

Ration Tokens For Retailers

Retailers selling rationed foods should file their applications for ration tokens by Saturday, January 5, to be sure of having a supply when the token plan starts February 27, OPA says. The application form is being distributed to retailers by trade associations and also is available at local rationing boards.

Prices Up On Grape Products

Because of increased 1943 fruit costs, the retail price of Concord grape juice will increase approximately three cents a quart and of grape jams and preserves from two to three cents a pound jar under a new pricing formula set by OPA for processors.

Rubber Heel Prices Set

Retail ceiling prices of 10 cents and 15 cents a pair on rubber heels sold to consumers who desire to attach them to shoes in their own homes have been established by OPA.

Gas Ration For Servicemen

To aid servicemen in recuperating from illness or wounds received while on active duty, OPA has announced that they may be issued special gasoline rations for use in traveling to and from their homes or other places of convalescence. This special ration will be issued upon presentation of

leave papers to a local rationing board and a letter from the attending medical officer certifying that transportation by automobile, rather than by any other means, will materially assist in the recovery of the serviceman's health.

Chicken Dinners For Servicemen

Freezer stocks of chickens and fowl (hens) placed in storage up to December 30 have been set aside by WFA for purchase by the Armed Forces, the War Shipping Administration and other governmental agencies. The order, FDO 91, affects dealers, restaurant and hotel operators, producers, processors, wholesalers, retailers and all other owners of frozen chicken except owners of less than 3,000 pounds and owners of chickens held in individual "family" locker space. Holders are required to report their holdings to designated U. S. Army Quartermaster Market Centers within 10 days. Chicken is a part of the Army's mess menu for Sunday "chow" at least twice a month and a vital part of the diet in military hospitals.

To Sell Some Shoes Ration-Free

Some women's footwear, mostly novelty types, will be sold ration-free at \$2 or less a pair from January 17 through January 29. This does not mean that the shoe supply picture has improved. It is intended to help dealers dispose of limited quantities of wearable shoes which have been lying on the shelves.

"SHUCKS, SI, IT WAS SIMPLE SOLVING MY MANPOWER SHORTAGE. JUST CROSSED MY GORK WITH MEXICAN JUMPING BEAN AND POPCORN."
