SERVICE
when Cable is able

Sometimes people get a telephone ahead of their friends who have been waiting a longer time. The reason for this is that cable facilities are open in some locations, while not in others. Lack of cable facilities is a major cause for the delay in expanding telephone service. For this reason we must make full use of existing cable capacity to meet as many demands for service as possible.

Carolina Telephone & Telegraph Co.

Stay On The Right Side Of Your Budget!

It will help to practice some of the lessons learned in the past few years. Buy only what you need, and get the best quality you can afford. In the long run, you'll SAVE ALL WAYS—and make your income go further.

Our friendly service in all financial matters will meet with your complete satisfaction.

Decontrol of Sugar Would Boost Price

San Francisco, Calif.—With estimated 1947 sugar supplies in this country at least 1,600,000 tons short of public requirements, it is imperative that government controls over sugar be extended through 1947, if we are to avoid a repetition of the severe shortages and skyrocketing prices which followed abrupt decontrol of sugar after World War I.

This warning has been issued by Earl B. Wilson, President of California and Hawaiian Sugar Refining Corporation, Ltd., and former director of the Sugar Branch of the U. S. Department of Agriculture, who states that certain uninformed interests are campaigning for precipitate action in decontrolling sugar. It is Mr. Wilson's belief that lifting of controls may lead to a repetition of occurrences following World War I, when uncontrolled sugar prices rose to 40c a pound retail, while shortages became increasingly acute working severe hardships on individual consumers, food manufacturers and the sugar industry in general.

BIRD CLUB

The article dealing with the Yellow-Crowned Night Heron, taken from the book, "Birds of North Carolina," was read by Charles Fitzgerald at the Bird Club, Saturday morning.

Plumage—grayish, darker on back and streaked with black. . . . Crown and patch on side of head—yellowish-white. . . . Rest of head including throat—black. . . . Underparts—whitish. . . . Head—crested with long whitish plumes.

This particular Heron ranges in summer from North Carolina to Brazil and Peru, spending winters from Florida southward. In North Carolina during summertime it usually stays in the coastal region but has been known to stray inland as far as Guilford county. The late Rev. Craig-hill often saw these birds in the Rocky Mount neighborhood where he found a nest which was a bulky structure of sticks and twigs placed on the limb of a sweet gum thirty-five feet from the ground. He located other nests in the swampy regions of Edgecombe and Halifax counties.

Walter Burgess was extended a cordial welcome as a new member and Carroll Wooten, as a visitor.

If the government got out of business altogether and at once, there would be some businesses out of business.

Working for the betterment of mankind is excellent if you are really working for the betterment of mankind.

Survivors of Veterans To File Claims By The 19th Day of February

Rocky Mount.—The 1946 Amendments to the Social Security Act provides for payments of old age and survivors insurance to dependents of many veterans of World War II. Monthly benefits are payable to survivors of veterans who die within three years after discharge from service in case they are not entitled to compensation from the Veterans' Administration. National Service Life Insurance is not considered as compensation or pension.

The revised Act provides for monthly benefits, retroactive to the date of the veteran's death, if the survivors file their benefit claims with the Social Security Administration before midnight February 10, 1947. Claims filed after that date will be retroactive for no more than the usual 8-month period.

Marshall Barney, manager of the Rocky Mount office of the Social Security Administration, today called attention to the fact that even though the veteran never worked on a job covered by the Social Security Act, his dependents may be eligible for survivors insurance payments—in case of his death.

He pointed out that the new amendment does not provide any payment to the veteran himself and that it does not provide benefits for the survivors of men who died before discharge or release from the armed forces.

Mr. Barney said that under these provisions, a widow with one child could receive monthly benefits of not less than \$39 until the child reaches age 18, while a widow with three children could receive \$63 a month or more. Lump-sum payments may be made to certain relatives, if the veteran left no one entitled to monthly benefits.

As in the case of all other persons qualified for social security benefits, families of deceased veterans, to whom this new law applies, should come to the office of the Social Security Administration to file their claims as soon as possible. The Rocky Mount office is located in the Post Office Building.

Fernate Effective Against Blue Mold

With tobacco plant beds for 1947 already set, the grower will be wise to buy fernate supplies immediately that he will need for spraying or dusting his plants against the dreaded blue mold disease.

Dr. J. H. Jensen, head of the plant pathology section with the N. C. Agricultural Experiment Station, in issuing this warning, reminds growers of the almost certain attack of last year which they were able to head off by following this procedure.

The blue mold disease begins its attack on the crop in Georgia, Dr. Jensen explains, and, if the weather remains right for it, follows the season up the coast. Last year, because growers in Georgia sent warnings ahead of the disease, and because the local growers went to work in their plant beds with the fernate, what would otherwise have been a serious outbreak was staved off.

This year this warning service has been put on a permanent, coordinated basis with H. E. Garris, the Extension plant pathologist, named reporter for the North Carolina district, to receive warnings from elsewhere and to assist local growers with meeting the attack.

Fernate has been found the most effective treatment against the disease, Dr. Jensen says, but he stresses that it is a preventative rather than a cure. Therefore, growers should make their first applications of fernate before the disease strikes. Begin applying fernate, either as a dust or spray, as soon as the plants are the size of a dime. From then on, treatments should be continued until all danger of an attack of blue mold is past. Dr. Jensen points out that the county agents are prepared to give advice on the treatment.

1947 TOBACCO QUOTAS

The 1947 national marketing quota for flue-cured tobacco has been set at 85,700,000 pounds, while the dark air-cured quota will be 29,100,000 pounds.

BUY "SAVINGS BONDS" NOW!

You can't make Apple Sauce from automobiles—

REMEMBER the old story? Where the teacher said: "Jimmy, how would you divide three apples among four people?" And Jimmy answered: "Make apple sauce!"

We wish Jimmy could solve our problem that easily. We've done our best to keep production up and prices down . . . delivering thousands of 1946 Fords. But we still have unfilled orders for over a million more.

You know the reason for the lag in filling those orders . . . the labor shortages, the material shortages, and all those other hitches in getting back to normal.

That doesn't leave us many apples to divide. And as fair and square as we try to be, we just can't make apple sauce from automobiles. But what we can do is tell you what a great Ford you've got coming up in your future.

And while you're waiting, one other thing we can do is urge you to let us keep an eye on your present Ford to protect your safety, comfort and investment.

Your Ford Dealer

WE REALIZE . . . that the present abnormal demand for automobiles will not last forever, that the day will come when WE SHALL BE KNOCKING AT YOUR DOOR asking for business. Therefore, as in the past, we are endeavoring to be constant and patient that we may always merit your confidence and respect.
