

Two Vacancie

Principal Sam D. Bundy of th Ile school announces that re ents have been secured for fou of the six faculty members who re-signed at the close of the recent term and that negotiations are under to fill the other two vacancies. The six, who resigned in order to accept work elsewhere or who are leaving the teaching field, are: Mrs. Lucille T. Mayo, who taught home economics; Mrs. Nins A. Roberts, public school music; Mrs. Naomi B. Edwards, librarian; Miss Miriam Johnson, sixth grade; Mrs. Margaret T. Latham, math and science in the eighth grade; John Dunn, mathema-

Miss Elsie Seago, who has taught in the West Edgecombe high school for 12 years, has been secured as rereplacement for Mrs. Mayo, who is leaving the teaching field. Mrs. Jean Beckman Williams of

Farmville has been appointed to teach public school music. Mrs Roberts has resigned to teach piano at the West Edgecombe high school ,Rocky Mount. Miss Nellie Grey Adkins of Frank lint, a recent graduate of WCUNC will take Mrs. Latham's place. Mrs. Latham is leaving the teaching field. Miss Elizabeth Parker of Williamston, a recent graduate of WCUNC. will fill the vacancy created by the resignation of Miss Johnson, who has accepted a position elsewhere.

Negotiation are underway for re placements for Mr. Dunn and Mrs. Edwards, both of whom have accepted work elsewhere.

In the recent allotments of teachers for the 1951-52 session, Farmville was awarded 16 elementary teachers, the same number the school had last year, and 10 high school teachers, one more than the school had in the term recently ended. Due to the fact that there is no room to place the additional teacher, Mrs. S. H. Aycock, Jr., will be placed on the state payrall rather than on the local district payroll. This change means that commercial subjects, taught by Mrs. Aycock, will be presented next year at reduced fees.

as stated above. It has been definitely proven that proper spacing of tobacco on ware-house floors is advantageous to the growers, warehousemen and every-body concerned. To insure this pro-

tection to the tobacco growers, a pro-vision has been included in the waretection to the toneco growers, a pro-vision has been included in the wave-house contract for 1951 regarding the specing and setting out of small bas-kets. All tobacco shall have a mini-mum space of 18 inches from butts to butts between the rows and at no point shall the butts fouch between the baskets in the rows. In many in-stances in 1950, the tobacco growers did not cooperate fully with wave-housemen regarding this. In some instances, after the wavehousemen had spaced the tobago property on the floor, gruwers would force an-other basket in the row causing the tobacce to be jammed. When tobac-ce is placed on the wavehouse floor in a congented condition, it means that considerable quantities will be knote-ed off on the floor, the leaves on
