**GMC TRUCKS**

**TOPS IN PAY LOAD!**

If you use gasoline-powered tractors in the 45,000 GCW class, here's a big news. This new GMC Series 470 will haul more pay load than any other vehicle of its rating with comparable standard equipment—up to more than a half-ton than some!

Come in. Compare them—in power, in pay load, in rugged long-life construction—against all the rest!

Then check the price and you'll agree: nowhere else will so little buy so much in a 3- to 4 1/2-ton truck.

That's because GMC has found new ways to take dead weight out of truck design by advanced engineering.

One example is GMC's sensational new "302" valve-in-head engine that delivers 145 h.p. at 3200 r.p.m. It weighs less than other engines of equal power by as much as 300 lbs. Yet it's the highest-compression gasoline truck engine ever built—gives you extra mileage from regular fuel!
