# There Must Be A Memorial, Leaders Weather-Beaten Pine Slab Is Only Memorial

The steering committee of the excutive committee for the coming campaign for the community memorial building met yesterday afternoon with the chairman of the executive committee Lionel Well to further outline plans for the coming drive for funds. Tentative proposals were made and will be decided upon early in the week and work has been started toward getting out preper forms of publicity in forms of folders and leaflets which will tell the whole atery of the movement and refresh the minds of the people as to the debt the city owes to those who served the city owes to those who served and those who died to "make the world safe for democracy."

The committee meeting was enthusiastic and it is felt that the drive will be put over with little difficulty. The need of such a build-ing aside from the feeling and sentiment attached to it as a living memorial, will make the campaign easy.
Statements have been made by all
the leading citizens of Goldsporo of
every faith and creed as to crying need for proper housing of the city's activities, especially those in connec-tion with the boys and girls. These some citizens state that they feel also a need for a real memorial to the boys who died,

At the present time the only form of memorial the city has is a pine board, with the names printed in black letters which stands in front of the court house. That is, it stands there part of the time. Every time a wind comes niong at blows stands there part of the time. Every
