LEVIATHAN LAYING IN BOSTON HARBOR AWAITING GUESTS

In Caught Between Two Cars When One Backs Out From Curb

"JOY RIDE" STARTS EARLY TOMORROW

BOSTON, June 18.—The reconditioned liner Leviathan lay at anchor off the Flin's ledge in Boston harbor in readiness to sail tomorrow for southern waters on her trial trip.

The first detachment of guests were taken to the Leviathan tonight on a harbor steamer. The others are expected to board the ship tomorrow.

The work of undocking was accomplished with the same ease and precision that marked the mammoth liner's entrance into the dry dock a month ago to be painted and refurnished.

BOSTON, Mass., June 18.—The Leviathan, the world's largest liner, rebuilt and refurnished at a cost of \$3,000,000, is ready with steam up to sail on her trial trip to Cuba tomorrow.

On her return she will go into the regular trans-Atlantic trade, starting July 4 from New York to Cherbourg and Southampton. Six days will be taken for a crossing, and a round trip will be made every three weeks.

The liner, while lay rusting away for two years after its service as a transport, when it carried 200,000 doughboys across the Atlantic, is now furnished in a style surpassing that of the most sumptuous hotel.

There is a whole series of suites which surpass the single "royal apartments" of other large liners. Each one was designed and decorated separately.

A Ritz-Carlton restaurant will serve those who prefer not to enter the common dining saloon, which itself is far beyond that of the ordinary ship in splendor.

A tea room furnished din. Queen Anne, with old English color prints by Morland and others, will serve as a retreat during the hot part of the late afternoon when the guests have come up from the tiled swimming pool.

These who go to the Ritz-Carlton will find a restaurant furnished in the style of the Empire. All the woodwork is of carved mahogany, the ornaments of cut metal in a dull-old gold finish, the chair coverings of blue color and old gold.

Under all this magnificence, this quiet luxury, are the great turbines, oil burners of 80,000 normal horsepower and an emergency horsepower of 20,000.

In the galleys, there are seven, are the most up-to-date kinds of equipment. The linen, the china, the glassware and cooking utensils are counted by the thousands and tens of thousands.

With all these luxuries and all this service the lucky two hundred will sail for Cuba tomorrow surrounded by stewards and mechanical devices which will extract from life every need for effort.
