Having Reached Tokyo, They Are Convinced That Would Be Suicide Attempt Hop Pacific

Woman Flier Reaches New York and Says She is Going On to Paris

WILL BE ALLOWED USE OF THE FIELD

Piloted Plane Three-Fourths of Distance in Flight From Virginia City

TOKYO, Sept. 15.—(AP)—The projected of the American monoplane Pride of Detroit across the Pacific on its globe circling tour was called off here today by its co-pilots, Edward Schlee and Walter Brock.

Smilingly confident that they would safely make the flight to Midway Island, despite warning of Jap. aviators and the cabled pleas of friends to give up the project, the pilots first announced that if they failed to find the islands they would continue on 1440 miles to Honolulu. Later they decided not to fly.

Brock and Schlee brought their airplane to land 45 miles northeast of here yesterday after a 500 mile flight from Omuta in Southwestern Japan. They had been held up at this point two days for and storm after their flight from Shanghai.

ROOSEVELT FIELD, N. Y.—Sept. 14.—(AP)—Miss Ruth Eider, who plans a trans-Atlantic flight landed here today after a 1000 mile flight from Wheeling, W. Va. She was accompanied by George Haldeman, her pilot.

Despite the long flight during which Miss Eider said she piloted the plane, American Girl, 34 of the way, the 23 year old aviatrix did not seem tired. She announced that weather permitted, she would take off for a non-stop flight to Paris shortly.

Miss Eider said that she had made no local plans for a take off. Earlier in the day, control of the field passed from Rodman Wannamaker to J. J. Lannin, owner of the property. Tonight, Mr. Lannin announced that while he was opposed to trans-Atlantic flights he would not prevent Miss Eider from using the field.

PERPLEXITIES BESET TARIFF

Argentine Refuses Allow American Committee Study Cost of Production

WASHINGTON, Sept. 14.—(AP)—Perplexities besetting American tariff affairs were increased today when, because of resentment in Argentine, the tariff commission ended plans to send a committee to that country to investigate the cost of producing raw wool and corn in the Southern American republic.

Decision was reached while the American government awaited the reply of France on the proposal to agree to a new commercial treaty between the two which would remove tariff discriminations formerly favored by new French duties.

While the Argentine and French situations are not along the same line, in as much as one affects American laws and the other deals with French regulations their sudden emergence into the lime light has served to stimulate tariff discussion here on the eve of a session of congress.

WINS EXECUTING CASE NOW OPPOSES HANGING

CHICAGO, Sept. 14.—(AP)—Edwin Hedrick a former assistant prosecuting attorney of Peoria County, has taken the stump against capital punishment. He says he became disillusioned about the death penalty after prosecuting successfully his first hanging case, for which he waited 12 year.

PUBLIC HEALTH IN PHILIPPINES IS BIG PROBLEM

Next Governor-General To Be Confronted With Education Scheme

WASHINGTON, Sept. 14.—One of the greatest problems with which the next governor-general of the Philippines will be confronted is that of public health education.

Unusual strides were made by the Wood administration in cutting down disease which can be controlled by proper sanitation and the improvement of the material aspects of life in the Philippines, but disease arising from unclean or unsound personal living habits remains as prevalent as ever.

The situation can be remedied in the opinion of insular officials, only by a public health education program reaching all the inhabitants of the archipelago. In his last annual report, Governor-General Wood said, "While the Philippine Health Service attempts to enforce adequate health regulations in all the provinces disease can not be controlled by regulations alone. The real solution of the problem, effective health education must begin in the earlier years of life; health habits must be acquired during school years.

Some steps have already been taken in this direction, the most notable being the establishment of a school of hygiene and public health at the University of the Philippines for the training of health service officers and physicians in the prevention of disease.

Plans for this school have been completed and funds provided by the legislature although the institution itself has not yet begun to function. It will be modeled after the most efficient schools of the United States. It is hoped by this means to increase the knowledge and efficiency of the health service. Only six of the 420 health service officers now have had any special training in public health.

Improper eating and ignorance as to proper diets are primarily responsible for the inability of the insular officials to check the most prevalent diseases. Intestinal infection is common among the Filipinos, and no progress toward checking this disorder can be hoped for until the people have been educated along dietary lines.

Two Hundred Moose From Five Cities To Meet Here

Two hundred members of the Enoca Branch of the Tar Heel Legion of the Loyal Order of Moose will meet in Goldsboro, September 22 for their quarterly business meeting and from 10 to 12 o'clock in the morning to arrange for last-minute details and plan the initiation of the large class of candidates.

The session expected to attract most interest during the business sessions in the one scheduled for 2 o'clock in the afternoon when officers will be elected. At four o'clock candidates for admission to the lodge will report to the Herder.

The public will be particularly interested in the feature arranged for 5 o'clock in the afternoon. The 300 or more here for the ceremonies will take part in a public parade. The Goldsboro Moose will do the honors at a barbecue and chicken fry to begin at 6:30 and at 8 o'clock will come the quarterly frolic.

The Moose hall at Mulberry and John street will be headquarters for

ALL MEMBERS URGED ENTER

Window Display Contest To Be One of Most Attractive of Opening Features

Three prizes will be offered in the window display contest which will inaugurate Fall Fashion opening, to be observed here by the Goldsboro Merchants' Association September 26-29. It was announced yesterday by A. A. Joseph, chairman of the committee directing this feature of the opening.

A 100 percent display from the membership of the Association is the goal which Mr. Joseph has set, and yesterday he mailed letters to the members asking that they notify the secretary of the Association, Mr. Grace Poindexter, at an early date of their intention to participate. These letters from Mr. Joseph will be followed up in a short time by a telephone call or a personal visit from him.

"As this feature will launch the fall opening," said Mr. Joseph yesterday, "we want to make it one of much attraction. Already a number of the merchants have informed me that they will enter their windows in the contest and I expect that a majority will take part."

The Merchants' Association will offer its every service to the merchants who plan to decorate their windows for the contest. Originality is one effect which Mr. Joseph urges as especially sought after in the competition.

Mr. Joseph will name one distinguished party who will in turn name three disinterested parties as a judging committee to select the winners in the event. The names of those comprising this committee will be known only to the party asked by Mr. Joseph to select them.

"This is a system we have followed previously," said Mr. Joseph "and it insures absolute fairness in the matter."

Supreme Court Makes First Batch Rulings

RALEIGH, Sept. 14.—(AP)—The Supreme court of North Carolina today handed down 14 decisions in its first day of the fall term.

The George Brown will case from Beaufort was not handed down.

Justice Clarkson in an insurance case from Nash, involving the estate of C. H. Boddie and the Metropolitan Insurance company wrote the decision remanding the decision for a new trial, with caution that a physician should not be subpoenaed to court and compelled to make disclosures and confidential information which protects doctors, physicians and surgeons from disclosing any information he may acquire attending a patient.

COUNTY SYSTEM IS THREATENED

Committeemen Today to Face Issue Concerning \$21,377 Cut in Finances

The called meeting of Wayne county school committeemen for 11 o'clock this morning in the courthouse may be the beginning of a fight between the County Board of Education and the County Board of Commissioners over differences of opinion relative to school finances for the current year to start with the opening of the rural school on October 3.

It is claimed by the board of education that the school system of the county is threatened by the cut in the school budget made by the committeemen. The committeemen this morning will consider the facts in hand and are expected to take some action on the matter. The first problem they will have to face in their meeting, it is said, is whether or not the schools can be operated at their standard efficiency for the constitutional six months term under a budget which has been made available in the adoption of the county budget filed yesterday in the office of register of deeds in accordance with the new county finance act.

The County Commissioners have made an appropriation to the schools for the coming year of \$331,578.30. Of this amount the sum of \$299,662.82 has been appropriated from taxes, and the remainder, which amounts to \$37,915.48 represents the amount due the schools from fines, poll taxes, dog taxes and the State equalization fund. The total budget submitted by the Board of Education, was \$352,315.98. The amount appropriated by the County Commissioners was \$331,578.30, which amount falls short of the necessary expenses by \$21,337.18.

The total budget submitted by the Board last year was \$340,800.00. From this total was deducted the other revenue, amounting to \$220,000.00, which left a balance of \$315,000.00. This was the amount appropriated by the County Commissioners from taxes. The reduction in the amount appropriated from taxes over last year's appropriations is \$21,337.18.

The question to be submitted to the school committeemen of the County this morning is whether the schools can be operated for the Constitutional six months term on the amount appropriated by the Commissioners for that purpose.

HEAT WAVE IS HOLDING ON

Snows in One Part of Canada and Not Many Miles Away Country Swelters

CHICAGO, Sept. 14.—(AP)—A heavy blanket of torrid air continued to envelop the middle west today driving the mercury to record heights and resulting in suffering, prostrations and death.

Chicago with a temperature of 95 degrees lead the list with seven heat casualties. St. Louis reported four. The total deaths throughout the country was estimated at more than a dozen.

Schools in Cincinnati were closed when the thermometer registered 92 degrees and in Chicago after classes importable school buildings were not held.

Western Canada experienced a spell of freak weather, Southern Manitoba smeltering in heat while snow fell in Alberta.

STUDENTS DISPLAY ORIGINALITY

AUBURN, Ala., Sept. 14.—(AP)—Credit the present day collegians with another originality. A Ford touring model of many years ago steamed into town with a cargo of students returning to college of the sides of the ancient vehicle was printed. "I do not choose to run in 1926."

MEXICO SENDS OFFICERS HERE

International Health Officer of Mexico One Present at Wayne Clinic

Health officers from Mexico met in conference with health officers of Goldsboro on Wednesday morning and were present at the baby clinic which was held from 10 to 11 o'clock at the Wayne County Health Department under Dr. L. W. Corbett. The officers are Dr. H. P. Carr, director of the International Health Board of Mexico and Dr. H. Mejia, health officer of Vera Cruz, Mexico. They are spending some time in North Carolina and are studying particularly rural sanitation, malarial and hook worm control work and baby conditions. They were accompanied to Goldsboro by Dr. H. A. Taylor, of Raleigh, State Department Epidemiologist.

Besides the above named physicians, Dr. T. B. Henderson of Goldsboro, eye, ear and nose and throat specialist was present at the clinic which was well attended. Twenty babies and pre-school children received thorough examinations. Miss Alice Ward and Marie Farley public health nurses assisted.

The entire corps of physicians, both local and visiting, and Miss Farley attended a pre-school clinic held at Fremont 4 o'clock Wednesday afternoon by Dr. Benton and Lassiter of this city.

While in Goldsboro the Mexican official, Dr. Mejia got his first sight of a tobacco warehouse in auction sale of the weed.

After a tour of the State hospital for the colored insane here, a tour of inspection with Superintendent Linville as the leader, the visitors declared that it was superior to anything they had previously seen of its kind. The visitors were entertained at dinner by Dr. and Mrs. L. W. Corbett.

Dempsey Refused To Grant Requests Made

CHICAGO, Sept. 14.—(AP)—News correspondents foiled in the attempt to crash the gate and watch Jack Dempsey in his moonlight maneuvers held an indignation meeting with promoter Tex Rickard, today protesting because Dempsey had refused to train in their presence and had elected to do his training at night instead of in the afternoon.

Rickard refused to intercede for the correspondents, declaring it was Dempsey's business to get himself in the best possible condition and he would not give him any advice as to the way this should be done.

To Honor Boy Soldiers At Bentonville Today

Goldsboro will play a conspicuous part today at the unveiling of a marker of the site of the Battle of Bentonville, just across the line in Johnston county and about 15 miles from this city.

In the ceremonies the state will for the first time take official note of the heroic bravery of the boys of the North Carolina Junior reserves who made such a gallant stand at the battle, one of the last of the Civil War.

All members of the Old Goldsboro Club will be guests of honor at the ceremonies today. The rites are indirectly responsible for the statewide interest which is being manifested in the battle now. Years ago they raised funds to erect a monument at the site of the encounter.

Through efforts of the local chapter of the United Daughters of Confederacy, the road from Goldsboro to the Bentonville site has been plainly

CHICAGO CRIME TO BE FOUGHT BY NEW SYSTEM

Expert Plans to Change Present Methods to Test Gangs And Gunmen

CHICAGO, Sept. 14.—Reducing Chicago crime by segregating the mentally unfit is to be carried on under the new system of tests, treatments and cures.

Fresh from a stay in Europe, Dr. William Hickson, chief of the city's psychopathic laboratory, has launched a plan, which he claims will almost entirely clear Chicago streets of its machine-gun gangsters, warring booze factions and gun-toting morons of high and low degree.

Possibly even the giant cure for mental ailments will be tried on the gunmen, Dr. Hickson declared.

He is enthusiastic over a glandular extract supplied by guinea pigs and said he has obtained extremely satisfactory results abroad.

It is Dr. Hickson's plan to surgically remove the brain glands now used in the psychopathic laboratory with a new system which he studied in Europe. The new style of testing persons believed mentally deficient, Dr. Hickson declared, was developed by Prof. Kraemer of Berlin, a former exchange professor at Harvard, and is a "gestalt-psychologic" or "mind pattern psychology" system.

"The new method is more direct, more positive and more objective," the Chicago expert said. "Its conclusions are more reliable. "At present we examine the mental reaction and now we plan to examine the physical reaction. We will diagnose the physical, rather than the mental."

Dr. Kraemer has discovered, Dr. Hickson reported, that persons have certain connections in their minds that are like railway yards, full of tracks and switches; people do not have individual minds but, minds work according to a pattern.

"It has been learned," Dr. Hickson continued, "that mental diseases are a physical science, instead of a science of observation. That means that the tests of gunmen should be more neurological."

The expert said under the system to be adopted here the alleged defective would be made to cross the arms loosely, whirl their bodies about, have their knees jerked, receive tappings around the body and given various other physical tests.

Sales Today Will Show Total Well Beyond 1,500,000 To Date

FIGURES REPRESENT WAREHOUSE REPORTS

Growers Had Been Paid Through Tuesday a Total of \$206,402.70.

A one-third increase in sales in the first six days of the season this year over last year was recorded by the Goldsboro tobacco market, statistics gathered yesterday by The News show.

Through Tuesday of this week, a total of 1,402,035 pounds had been sold on the floor here. Through the same period last year only 937,063 pounds had been sold, showing an increase of 464,972 in favor of this year.

Goldsboro's market will today pass well beyond the 1,500,000 pound total, a figure not reached until the third week of the 1926 season.

The full extent of the blocked sales of Tuesday and Wednesday of last week, the first two days of the market, were revealed yesterday when the issuance of official statistics showed that 543,463 pounds were sold for \$84,667.51.

Last Thursday big sales continued with 251,212 pounds sold for \$34,122.47.

Friday again ran up a large figure and ended the auctions for the first week of the season. On this day total sales were 250,000 pounds, for which growers received \$33,875.53.

On Monday of this week 262,453 pounds were auctioned for \$39,328.43. Last Tuesday 173,216 pounds brought growers \$26,465.77.

The average recorded has been below the average of last year, but the condition has been general in the belt.

Through Tuesday of this week, a total of \$206,402.70 had been paid for tobacco on the Goldsboro market.

Sales and averages for yesterday had not been completed in time for incorporation into this story, but it is estimated that upwards of 160,000 pounds were on the floors here.

MORE DETAILS OF HURRICANE

Terrible Storm Followed on Heels of Tidal Wave That Hit Mexican Coast

NOGALES, Ariz., Sept. 14.—(AP)—Thousands of miles of the storm swept Mexican western coast remain virtually isolated tonight while meager details of the great hurricane of last week added to the picture of destruction on land and sea. Over demoralized communication lines came reports that two steamers were lost and many thousands of persons homeless at seaport towns while.

Refugees crowded in superstitious horror at high points inland. Uncertainty prevailed as to the probable loss of life which reports yesterday placed at hundreds.

Reports say many of the sufferers feared the visitation of the combined hurricane and tidal wave was the wrath of Patron Saint. They had fled to sites further away from the sea when the storm struck on the coast last Wednesday, causing heavy damages in three ports.

A large number of vessels said to be the biggest parade on record from the Canal zone to San Pedro, Calif., was in danger, but little anxiety was felt for their safety. This border town remained practically the only channel through which reports of the disaster were available.
