

NEW TARIFF BILL IS PASSED IN HOUSE 264 TO 147

PROVIDES FOR INCREASES IN IMPORT DUTIES

Now Goes to Senate But is Not Expected to Be Acted on There Soon

BILL DRAWN BY G. O. P. MEMBERS ON COMMITTEE

Affects Every Man, Woman and Child in The United States in Changes

WASHINGTON, May 28.—(AP)—The tariff bill written by the ways and means committee republicans and designed to afford additional protection from foreign competition to thousands of products of the American farms and factories was passed by the house today by a vote of 264 to 147.

The measure carried substantial increases in import duties on articles embraced in every section of the seven-year-old Fordney-McCumber law and provides for a reorganization of the tariff commission and the granting of increased power to the president in the matter of increasing rates. It now goes to the senate where the finance committee plans to hold extensive hearings before reporting it.

With plans underway for an all-summer recess, it was the opinion of republican leaders tonight that the proposed legislation would not be taken up by the senate for several months.

Passed by a margin of 117 votes the bill was given the final house stamp of approval 4 months and 3 weeks from the day the subject was tackled in public hearings and after more than 100 amendments proposed by the ways and means committee had been given further approval.

Before the final vote a motion by Representative Garner, Texas, to return the bill to the ways and means committee was rejected by 254 to 157 votes.

The bill revises, mostly upward, rates in every dutiable section of the existing Fordney-McCumber law, which it is designed to supplant.

Every man, woman and child in the country and nearly every foreign nation in the world is affected by the economics changes proposed by the measure in the seven-year-old republican protective tariff structure.

Perhaps the most far-reaching change in the advance of sixty-four hundredths of a cent in the effective duty on sugar, raising the present duty of 1.76 cents a pound on Cuban raw sugar to 2.40 cents.

Other rate advances designed to aid the farmer and manufacturer, affect such commodities as wool, cattle, dairy products, meats, grains, textiles, glass, paper, furniture and clothing of all descriptions.

Important commodities long allowed free entry into the United States are made dutiable including hides, leather, boots and shoes, cement, common building brick, shingles, cedar, maple and birch lumber.

The measure also sets up an entirely new rate schedule to embrace manufacturers of artificial silk under the official name of "rayon." These goods are protected in existing law under the silk schedule.

BOY IS MISSING WITH BIG MONEY

Messenger Bank at Houston Disappears with \$24,000 in Cash and Drafts

HOUSTON, May 28.—(AP)—A fifteen-year-old messenger of the First National bank here was missing today with \$24,000 in bank drafts and cash. The boy had not been seen since he left on his regular run yesterday morning. Bank officials said he had complained of being ill and might have gone to some place for treatment. Most of the \$24,000 was in non-negotiable drafts.

COTTON MAN FOUND GUILTY

MEMPHIS, Tenn., May 28.—(AP)—William R. Pharr, cotton man was found guilty in Federal Court today on charges of aiding and abetting J. Ramsey Beauchamp, former vice-president of the old Union and Planters bank and Trust Company in the misapplication of nearly \$600,000 of the bank's funds in 1923 and 1924. Sentence was deferred until June 5.

Has Forgotten Tragedy

Carl Mahan, above, aged 6, of Paintsville, Ky., who killed his playmate, Cecil Van Hoose, aged 8, following a quarrel, has not mentioned the shooting since a half hour after the deed, according to his father, John Mahan. The child was given a fifteen-year reformatory sentence, but was granted a writ of prohibition.

ESCAPES DEATH BY TWO INCHES

W. H. Miles Struck by Falling Cross-Beam on Mulberry St. Yesterday

W. H. Miles, 22-year-old employee of the Carolina Power and Light company, escaped death by a matter of about two inches here yesterday morning about 10 o'clock when a descending beam cross-bar, being hauled to the top of a pole on Mulberry street near the post-office, struck him a glancing blow over the left eye, inflicting a bad gash and knocking him unconscious. The injured man was rushed to the Goldsboro hospital by Frank Creech, local man, and several stitches were required to sew up the cut. Miles' shoulder was also bruised when the end of the beam fell across it, but physicians do not think any bones were broken.

People, who happened to be near when the accident happened, were of the opinion that if the beam had fallen another two inches from the pole, it would probably have crushed the injured man's skull. As it was however, the edge of the beam merely scraped across his face, breaking the skin over the eyebrow, causing it to

Eastern Carolina Ought To Do Some Bragging, Declares

The time has come for Eastern North Carolina to quit comparing itself to Piedmont and Western North Carolina and imagining that the other sections have all the progress. Judge G. E. Midyette declared in the course of an informal talk before the Goldsboro Rotary club last evening. The talk by Judge Midyette and an excellent exhibition of tumbling acts by Ed Bland, Ed Evans, Rupert and Kirby Gurley occupied the club program.

"If you stop to think about it," declared Judge Midyette, "you will realize that Eastern North Carolina has just as many substantial cities as any part of the state and that these cities are growing just as rapidly. The truth about it is that our opportunities for development down here are greater than they are in any other part of the state and what is needed is for organizations like Rotary—and I know that Rotary is doing this—to lend itself more completely to the upbuilding of the section. "Start at Elizabeth City and just name over the Eastern North Carolina towns, Edenton, Tarboro, Washington, New Bern, Rocky Mount, Wil-

FIRST REPORT OF TB CLINIC IN SCHOOLS

Judge Midyette Passes Out 24 More Years Of Sentences on Tuesday

Willie Wood, White, Will Serve 5-7 Years in Pen For Crime Against Nature—William Joyner Gets 15 Years On Two Charges

Judge E. Y. Midyette in Wayne County Superior Court yesterday sentenced four defendants to terms totaling a minimum of 24 years in state prison or on the county roads and brought the total years of sentences days of court to 46 years.

Willie Wood, aged white man, and William Joyner, Negro, faced most heavily in the day's grind. Wood was found guilty of a crime against nature—too revolting for further newspaper detail—and sentenced to from 5 to 7 years in state prison.

Joyner is the Negro who tried to bring Chicago gunman tactics to Goldsboro but struck a stump when he tried to rob Jesse James, owner of the Standard Filling station at Ash and Hermon streets, James, it appeared, had something of the iron nerve of his namesake and refused to put em up when Joyner told him to. James continued to stand by nonchalantly while Joyner took three shots at him and his coolness as flabbergasted the Negro that he turned and ran.

Officers capture him: Jesse James

identified him; and later he was also identified as the Negro who had broken into a dwelling.

For the attempt at robbing James, Joyner received 10 years in State prison and for the breaking and entering another 5 years.

Willie Green, a Negro with a previous court record, received 2 years on the county roads for storebreaking and larceny.

"Have you ever been in trouble before?" Judge Midyette asked Willie, before passing sentence.

"Vassa, da son' pos na 8 mons' for breakin' in freight cars; but I ac didn't do it."

James Cogdell, negro, also received two years on the roads for larceny.

Incest Charge Dismissed

A charge of incest against Ernest Murphy resident of the Mt. Olive section, was reported as "not a true bill." Murphy had held been held when a "dishful" cause was found in a hearing before Hon. W. G. Boyd, Sr.

The grand jury yesterday made an inspection of the county home, the convict camps and will today visit other county departments.

Accident Stops Flight

A cracked propeller ended the week-long flight of the "Fort Worth" and her gallant crew, Reg Robbins, top, and James Kelly, below, after staying in the air for 172 hours and 34 minutes at Fort Worth, Texas. Their motor was still functioning perfectly, but the strain of fighting a storm had cracked their propeller. Each flyer receives about \$15,000 dollars.

BRINGS CHARGE NON SUPPORT

True Bill Found by Grand Jury in Charge Brought by Mrs. John Campen

John Campen was yesterday held in bond for the next term of Superior Court on a charge of non-support brought by Mrs. Campen, who came to Goldsboro from New York City this week.

The defendant was arraigned before Esq. Henry Toler yesterday morning, probable cause was found and he was held for the grand jury.

The facts were given to the jury shortly later and a true bill was found. It was decided that the case should be continued until the next term of Superior court. Bond had not been fixed yesterday afternoon but Solicitor Williams was said to be asking for surety to the amount of \$2,500.

Death Comes Close To Local Men in Accidents

Two Goldsboro men had narrow escapes from instant and horrible deaths in two automobile wrecks which occurred Monday night within three hours of each other. The News learned yesterday. Sim Ward, Webbtown merchant, who runs a grocery store on South Slocumb street, is in Spicer's Sanatorium with severe cuts and bruises and possibly several displaced ribs, injuries sustained when the Chevrolet coupe in which he was riding on the Wilson highway near Greenleaf, careened against a large oak tree on the left side of the highway, almost completely demolishing the car.

Mr. Ward was driving toward Wilson Monday night about 10:30 o'clock. The News was told, and at a point about halfway between Greenleaf and Scottsville, was passing another car going in the same direction when the lights of an approaching car blinded him so that he could not see. He slowed down slightly. It was said, and over to his left side of the highway and off the pavement rather than take a chance a collision with the

25.5 Percent Children Given Tuberculin Test Show Positive Reaction

May Quarantine All States Against Fly

WASHINGTON, May 28.—(AP)—Public hearings on June 1 to consider an extension of the quarantine on the Mediterranean fruit fly from Florida to every state in the union were called today by Secretary Hyde.

In issuing the call for the hearing which under the law is a prerequisite to any restrictions imposed the secretary appeared that the fly had been transported into other states in shipments of Florida fruit.

The fly was discovered recently in larvae form in Dallas, Texas, and several shipments of infested fruit were destroyed in other states.

NO TRACE OF BRIDAL COUPLE

Col. Lindbergh and Bride Successfully Elude Brigades of Reporters

NEW YORK, May 28.—(AP)—Col. and Mrs. Charles A. Lindbergh, who eloped from the press to be secretly married in the bride's Englewood, N. J., home yesterday were enjoying their hard won privacy today after eluding all efforts to trace their whereabouts.

Daylong investigation by brigades of reporters and photographers failed even to establish whether the Lindberghs were on the ground, on the water or in the air.

The flying Colonel and the daughter of Dwight W. Morrow, ambassador to Mexico, were married yesterday afternoon with no one but close relatives in attendance as reporters hung around the streets in front of the Morrow home in ignorance of what was going on. The Colonel and his bride had left the house before a secretary made public a brief announcement of the marriage. Where they went nobody who may know revealed and nobody else has been able to find out.

Shortly after the wedding a yellow amphibian plane circled over the Morrow home dipped in salute and flew away. The bridal couple on the start of their honeymoon? Nobody new.

Later a similar amphibian settled in the waters of Long Island Sound near the estate of Harry Guggenheim, close friend of Colonel Lindbergh. The bride couple seeking seclusion in the (Continued on page 7)

Positive Reactions Among White Children 4.3 Percent Higher Than for Colored

1565 CHILDREN GIVEN TESTS; 400 POSITIVE

Reports on Physical Examinations and X-Ray Studies Not Yet Received

Twenty-five and five-tenths of all the children given the tuberculin test for tuberculosis in the recent campaign in the schools of the county showed a positive reaction, according to statistics received yesterday by the Health department from Dr. F. A. Yoder, extension worker of the North Carolina Sanatorium who conducted the clinics.

A total of 1565 children were given the test and of this number 400 were found to react positively or one out of every four.

One result of the examinations, as reported by Dr. Yoder yesterday caused considerable comment. The percent of positive reactions among the white school children was 4.3 percent higher than among the colored children. A total of 1095 white children reacted the test and of this number 294 reacted positively. A total of 470 colored children reacted the test and of this number 196 reacted positively.

The positive reactions among the white children was 23.3 percent and among the colored 23.5 percent.

The average of positive reactions among the children of the state thus far examined is some thirty-five counties where similar tests have been given is about 25 per cent. This shows the Wayne total about .5 per cent above the average for the state but with the white children about 2 percent above the state average.

A total of 343 children who reacted positively were so underweight and generally run down physically that Dr. Yoder considered it necessary to follow up the tests with thorough physical examinations. About this number were given X-ray studies. The results of the X-ray studies, however, were not available in the preliminary report but are expected

SOIL EXPERTS VISIT COUNTY

Department of Agriculture Conducting Experiment Near Greenleaf

Dr. J. J. Skinner, senior chemist of the United States Department of Agriculture, Washington, D. C., and H. B. Mann, of the North Carolina Experiment Station, Raleigh, on the J. C. Burden farm near Belfast yesterday made counts to determine the effect on the stand of cotton of different fertilizers.

The experts observed the soils and fertilization experiment in growing cotton which Dr. Skinner sometime ago launched on the Greenleaf farm. Only one other similar test is being conducted by Dr. Skinner in the state.

The object is to compare ordinary home mixed and commercial fertilizers with the newer highly concentrated fertilizer now being manufactured for plant food. Counts were made to determine the effect upon the stand of cotton and of the different concentrated fertilizers. At a later date during the summer a public field meeting will be announced in order that Dr. Skinner may show the farmers at this section just what is being done and what results of this fertilizer test will determine.

Accompanying Dr. Skinner and Mr. Mann was R. A. Lindberry a Senior in chemistry at the University of North Carolina this season.

RAILROAD INCOMES

NEW YORK, May 28.—Railroads making their monthly statements to the Interstate Commerce Commission for April continued today to show gains in their net operating income over that for April 1928.

6 Cases Typhoid In Wayne County

There are now six cases of typhoid fever in the county, Dr. L. W. Corbett, health officer revealed yesterday. Four members of one Hood Swamp white family are ill with the disease, he reported; there is another case in a Negro family at Dudley and the sixth case is in a Negro family on Elm street. It was in the latter family that a child died of the disease several weeks ago. Parents had refused to take the typhoid vaccination or to allow their other children to take it after the illness and death of the other child.

"With six cases of typhoid in the county," said Dr. Corbett, "I cannot urge to strongly that every one protect himself by vaccination in the campaign now being conducted."
