JOB WORK OF ALL KINDS.

AS TO THREE COUNTY.

Writing four weeks ago about the unenviable manner in which the State income tax law is executed, we cited several counties, Gaston and Burke in the number, as instances illustrative of such inaccuracy.

In Burke county, where officers of great State institutions receive comparatively handsome salaries, not a dollar of taxable income was returned in 1904.

In a private letter we have been taken to task for this sentiment as a reflection upon the integrity of the officers of these institutions.

While soldiers, villagers, women and children, were crowding along, all hopelessly mixed up, the soldiers, notwithstanding their officers, dozens of horsemen and as many riderless horses appeared.

The cry went up: "The Turks are upon us!" and the stampede began. The frightened soldiers and villagers commenced to fire in every direction and the terror of the animals added to the confusion.

STAMPEDE OF THE GREEKS.

TERROR OF A PANIC IN WAR VIVIDLY DEPICTED.

Retreat from Matt to Larissa a Perfect Horror—Officers try in Vain to Rally their Men—Fleeing Women and Children Killed in the Fear-Induced Rush.

The scene of terror of a panic in war is vividly depicted in the Associated Press dispatches from Athens last week. The retreat of the Greeks to Larissa after their defeat at Matt was a pandemonium of terror. There are features about it which remind one of the stampede of Union soldiers at the first battle of Bull Run, but the presence in the Greek rout of fleeing women and children adds to it an element of heart-sickening horror that is not frequent, let us be thankful, in the disasters of modern warfare.

A dispatch from Athens, dated April 28, says the retreat of the Greeks developed into a rout before many miles had been covered. The Larissa correspondent of the Associated Press who retreated with the troops and reached Athens in safety, gave a story of the flight that is full of interest.

NEW IRON COUNTY BRIDGE.

Hoyle's Bridge Over the South Fork to be Replaced by an Iron Structure—Mr. Craft, of Atlanta, is Awarded the Contract for \$1,000,000—To be Finished by August 15.

The county commissioners decided last Monday to replace the old wooden structure known as Hoyle's bridge, between Dallas and Stanley, with a modern iron structure. The old bridge has been declared dangerous and was condemned several weeks ago.

Mr. G. H. Craft, of Atlanta, who has built two iron bridges already for the county, has filed a contract to build this new one over the South Fork for \$1,000,000. It is to be a single track bridge, 300 feet long, with four spans, and the two piers at this end are to be iron ones.

The work will begin as soon as the material is ready. The contractor is to tear away the old structure and put in the new. The job is to be completed by the 15th of August, and the terms of the contract make the money payable half on completion and half in twelve months. The contract appears to be a most reasonable one, and on terms which show that the board has been careful to guard the county's interests.
