The plant will be located about three-quarters of a mill north-east of the town on the the Murphy branch of the Southern Railway, and will be operated by electric current developed from the Pigeon river by the Haywood Electric Power Co. Retiessake at Linwood. The discovery of an immense rattler, 3 feet long, at Linwood Sunday morning, created somewhat of a panic for awhile among the young ladies. His snake-ship was enjoying the mellow autumn sunshine right in front of the Main building when first seen by some of the students. Mr. Spillman, of Charlotte, who was at the college, heard the cry of alarm and with a hatchet dispatched the intruder in short order. On the tail were six rattles and a button.

Beyond Him. A Columbia scientist was praising the other day the astronomical and literary work of Percival Lowell, says the New York Globe.

"One day just before an eclipse of the sun," said the scientist, "Mr. Lowell told his darkey, George, that if he would watch the chickens the following morning about 11 o'clock he would see them all go to roost."

"Hi, hi," laughed George. "Hi, hi; good joke."

"When on the following morning the sun darkened and the chickens went to their roosts, George was amazed and horrified. He found Mr. Lowell as soon as he could and said: "How long, sah, did you know 'bout these chickens?"

"Ob, a long time."

"Did you know it last year this time?"

"Yes; more than a year ago."

"Well, dat beats all," said the astounded darkey, eyeing Mr. Lowell with awe. "Dem chickens wuzn't hatched a year ago."
