

The Gastonia Gazette.

W. F. MARSHALL, Editor and Publisher. Published daily except on Sundays and public holidays.

Subscription Price: One Year \$3.00, Six Months \$1.75, Three Months \$1.00.

TUESDAY, OCT. 16, 1906.

County Democratic Ticket. For Sheriff, J. W. BARNES; For Treasurer, A. G. MORGAN; For Clerk of Superior Court, C. C. CONNELL; For District Attorney, J. H. BARNES; For Constable, C. H. BARNES; For Assessor, W. M. BARNES.

The Gaston boys at the University have formed there a Gaston County Club. Hurrah for the good old county and these sons of hers! Rev. Frank B. Rankin, now in charge of the Y. M. C. A. work at the University, is also a son of Gaston County.

An idea of the rapidity with which wealth is increasing in Gaston county may be gained from the story told by the books—that the increase in tax valuations is nearly \$1,000,000 a year! The increase is nearly a million this year and is expected to reach that amount next year.

The death of Rev. Sam P. Jones—it seems odd to write the title before this name which the woodstork personality of the owner had made so familiar without the Rev.—is an event which removes from active life one of the most remarkable and talented Americans of his generation.

Has Carried Bullet Since 1864. Mr. R. J. M. Steele, one of Lancaster's well known Confederate veterans, who has been carrying a bullet received in battle since the last day of March 1864, went over to Chester a few days ago to have Dr. Fryor locate the missile by means of the X-ray and to remove it if possible.

Pretty Home Wedding. One of the prettiest home weddings of the season was that last night at the home of Mrs. M. E. Monday, on Front street, when Miss Martha Monday was married to Mr. George A. Jenkins, of Gastonia.

The King's Mountain Herald says: W. J. Rowland, who has been at Charlotte for treatment of his hand which we mentioned in his home here last Sunday, and we are glad to say his condition is greatly improved.

TEACHERS' ASSOCIATION FORMED.

Rural and Graded Schools of Gaston Well Represented by Enthusiastic Attendance at Dallas Saturday. Prof. Joe S. Wray, superintendent of the Gastonia Graded Schools, was elected president of the County Teachers' Association held at Dallas Saturday.

The meeting was called to order shortly after 11 o'clock by Prof. Hall. He briefly addressed the teachers and citizens present on the object and purposes of the association about to be formed, and gave to all a hearty welcome.

Hon. S. J. Durham, of Bessemer City, who is chairman of the Board of Education, was called to be temporary chairman of the meeting. A constitution and by-laws were submitted and adopted as published a few days ago.

When elected as officers of the Association Professors Wray and Wilson made graceful speeches of acceptance. Prof. Wray felt deeply a sense of the honor and responsibility which came to him with this office.

Prof. Wilson made some complimentary references to the ladies present, who formed so large a part of the teaching forces of Gaston that the work would be seriously crippled without them. He said it was his purpose to attend the meetings as often as Providence would permit and would fill the position of vice president the best he could.

Mr. W. F. Marshall presented to the audience the chief speaker of the morning session, Prof. J. B. Carlyle, of the Chair of Latin in Wake Forest College. Prof. Carlyle's speech was well nigh unreportable. Wit, wisdom, philosophy, common sense, and sentiment, all followed each other in such ever-shifting and rapid succession that the reporter soon found himself a part of the audience, unwilling to do anything but listen.

In the afternoon Hon. O. F. Mason, Dr. J. C. Galloway, Hon. L. M. Hoffman, former county superintendent and Mr. Edgar Loug, of the Gastonia News were called upon by the chair and all responded with words of helpfulness and encouragement to the teachers.

The King's Mountain Herald says: W. J. Rowland, who has been at Charlotte for treatment of his hand which we mentioned in his home here last Sunday, and we are glad to say his condition is greatly improved.

power, "I can I can!"

It was gratifying to hear one who has traveled over North Carolina as much as Professor Carlyle has done speak in terms of high commendation of the interest in public education manifest on every hand in Gaston county. That members of the board of education should attend a meeting of the county teachers was an index of present interest and a happy augury of future good.

One feature at least of the Teacher's Association will prove a popular one. It is the arrangement made by superintendent Hall whereby the salaries of the teachers of the rural schools would be paid monthly to those who attended these meetings and would be paid on the day of the meeting. The announcement to the teachers that their salaries awaited them at the bank, where they were requested to call after adjournment, fell pleasantly upon the ear.

Only one criticism of the meeting of Saturday suggests itself. That is the failure to get a speech out of Mr. Stonewall Durham, chairman of the County Board of Education. This is an omission which may possibly be remedied at a future meeting. In Mr. Durham's home town of Bessemer City, where Prof. F. P. Rockett is the accomplished and energetic superintendent of schools, there was an educational rally Friday night.

The teachers and visitors enjoyed at dinner the hospitality of Mr. and Mrs. J. B. White at the "White House."

NEWS NOTES.

A telephone message from Mr. C. C. Tharpe of Net, Iredell county, to the Statesville Mascot says that there was a good sized fall of snow at that place Thursday morning. Mr. Tharpe said it came down thick and fast and lay at places where the frost had not all disappeared.

A Lumberton special says Andrew Oxendine, a Croatan, was killed Sunday afternoon by John Locklear, also a Croatan. The killing took place about 11 miles from Lumberton, near Buie, Robeson county. Locklear came to Lumberton in company with Will Baker, at times a deputy sheriff, surrendered to Sheriff McLeod and was lodged in jail.

Hazing is abolished, root and branch, is the announcement that comes from the A. and M. College, where every class in college has met and voted unanimously that the college shall have no more hazing in any manner, shape or form. This class action has been followed up by a written pledge which has been signed individually by every student in the college.

The Democrats had a grand rally and torch light procession in Hickory last Tuesday when Governor Aycock made one of his great speeches. There was an immense crowd and the Catawba County News says: "It looked like the whole of Catawba county was Democratic to witness the scene on the streets of Hickory."

A Wadesboro special says: C. G. Morgan vs. Dr. H. D. Stewart, case of malicious prosecution, was ended yesterday by plaintiff being awarded one hundred dollars. The case grew out of the compulsory vaccination in Union county. Mr. Morgan was teaching school in that county and Dr. Stewart undertook to vaccinate the students by force of law. This broke up the school, hence the suit.

NEW QUEEN OF RIVER

The Big Hendrick Hudson and Her Maiden Trip.

FUTED UP LIKE AN OCEAN LINER

Greatest of River Vessels Has 47 Stacks and Can Accommodate Five Thousand Passengers—Observation Rooms and an Emergency Hospital on Board—Dining Room Surrounded by Glass.

After a lapse of 300 years the valley of the great North river gave welcome recently to a second Hendrick Hudson; gave a different welcome to a far different Hendrick Hudson from that maritime adventurer who for Dutch gold dared the upper fastnesses of the stream in a rowboat. The new Hendrick Hudson, six stories tall and 400 feet long, is a giant of a river steamer—the biggest and finest of daylight steamers afloat—and the reception that was hers from a downtown pier in Manhattan to railroad wharf in Albany—the Day Line route—was properly that of a new queen of the river.

It was almost twenty years since such a triumphal progress had stirred the Hudson's banks; not since the New York made her first trip in 1887 had the folk of the river town had such opportunity to cheer a steamer whose christening role was still white, says the New York Press. Other fine new boats had sought the plaudits of the valley people, but all had unfortunately passed in the night. The coming of the Hendrick Hudson, a daylight steamer, was made a sort of holiday from Spuyten Duyvil to Albany. For eight hours the big boat passed banks lined with cheering folk. Yorkers had thousands of its folk waving welcome to the new liner. Haverstraw and Nyack were fringed by crowds that made a sort of Fourth of July affect. Non-bung turned out practically all of its populace, Fishkill did the same on the other side, Poughkeepsie dropped work to see the big boat land. Kingston crowded down to the Catskill railroad wharf, and Albany was stirred into building bonfires, waving torches and firing skyrockets.

New York's welcome was in the nature of a nautical celebration, for the tooting of steam never ceased from Desbrosses street to One Hundred and Twenty-ninth street. The Hendrick Hudson was ushered into the sisterhood of the river with a noise that began in the diapason of a liner's bellows off Greenwich village and came to a brief halt in a splutter of steam from a tiny tug tug far up the river. To each and all steamboat, locomotive, saw-mill and launch, the Hendrick Hudson answered courteously with three deep whistles.

The enthusiasm that lined over the vineyarded banks of the Hudson's Rhine and with cheering throngs was deserved. The Hendrick Hudson is an ocean liner river boat—that is, she is as much like an up-to-date ocean liner as a river boat can be. She is fitted inside with the good taste and the luxury of the newer Atlantic greyhounds, and she carries more passengers than any of these boats.

With accommodations for 5,000 passengers and carrying no freight all the space on the Hendrick Hudson is given over to the use of man and comfort. The vessel is 400 feet long, 82 feet broad over the guards and 14 feet 4 inches depth of hold. There are six decks, the hull is of steel and every part of the boat is stiffened and held rigid by steel framework.

There are observation rooms both at the bow and stern, a woman's lounge, a barber shop and smoking room for the men, a dark room for the use of amateur photographers, an emergency hospital with a surgeon in attendance and several other decided innovations in river steamboating.

In finish and in interior decoration the Hendrick Hudson stands alone in the artistic treatment of the various stowage. Mural paintings by well known artists are set in the walls and the Japanese bronze fountain in the main saloon brought to this country for the new boat is a beautiful specimen of eastern art.

For the instruction and edification of the passengers the engine room is enclosed in glass and the paddle wheel boxes have glass panes at the top from which on the inside the great wheels can be seen turning. The dining room is groundward almost entirely by plate glass, making the room appear like a glass enclosed veranda. There are sixty large windows, each of which can be raised or lowered to suit wind and weather. The views from every part of the dining room, which contains sixty tables and will seat 250 persons, are unobstructed on all sides.

EARTHQUAKE RECORD

The History of Seismic Shocks Shows Awful Loss of Life.

ARE OF SURPRISING FREQUENCY

Almost a Thousand Earthquakes Recorded Annually by Japanese Seismological Society—How They Vary in Character—Some Start Under Sea. The Great Lisbon Disaster.

The total number of earthquakes of which historic record has been kept reaches the enormous figure of 131,255, although the records were very incomplete until recent years. Data concerning all shocks, even the insignificant earth disturbances, are now being preserved, however, by scientific societies in all civilized countries of the world and accurate observations being taken for the use of future students of the earthquake subject.

Earthquakes have been one of the most terrible enemies of man in all times, and the number of persons killed by quakes reaches an appalling figure, says the Chicago Record-Herald. No human foresight, no human science or learning can guard against or forestall an earthquake, and by reason of the very powerlessness of man against this tremendous natural disturbance the earthquake takes rank with the most frightful forms of calamity.

By the use of the most delicate instruments the least tremor of the earth is now recorded, and the modern instruments now used show that quakes are of surprising frequency. The Japanese Seismological society, for instance, records almost a thousand earthquakes annually. Of course these quakes are for the most part so slight as to be unnoticeable except through the extremely delicate scientific instruments, but the fact remains that in the realms of the mikado alone the earth's surface is disturbed by quakes almost three times a day, year in and year out. In other portions of the world in the earthquake some minor tremors of the earth are proportionately frequent.

Duration and character. The number of shocks in a quake and the length of the time interval between them varies between wide limits. The cities of Caracas, in 1812, and Lisbon, in 1755, were destroyed in a few minutes apiece, while the Calabrian earthquake, beginning in 1783, continued for four years.

Earthquakes are by no means confined to continents, and many originate under the sea. The places in the sea bottoms where the water shows great variation in depth are particularly likely to experience earthquake shocks. When an earthquake occurs beneath the sea the vertical movements of the sea bed generate a great wave, which reaches the land after arrival of the earthquake itself. In the open sea this wave is so broad that it cannot be perceived.

When it reaches shallow water near the shore, however, it rushes forward as an immense breaker, sometimes sixty feet or more in height, and overwhelms everything in its course. The velocity of these great sea waves is much greater than the ordinary waves raised by the wind. A submarine earthquake near the coast of Japan in 1854 gave rise to sea waves which traveled the whole breadth of the Pacific at a rate of about 370 miles an hour. At Sitoua, Japan, the waves were thirty feet high, while on reaching San Diego, Cal., they still measured six inches.

The extent of country affected by an earthquake shock also varies greatly. Some earthquakes are but purely local affairs, while others are felt for hundreds of miles. The Lisbon earthquake, which threw down the greater part of the city in six minutes and killed 50,000 persons, disturbed an immense area, it being felt in the Alps, Great Britain, in the Baltic sea and in northern Germany. The Lisbon earthquake was felt also at Algiers and Fez as severely as in Spain and Portugal, while the effects of the sea waves caused by it were noticeable at enormous distances.

Perhaps no earthquake, outside of the Lisbon disaster, has been felt over a wider land area than the quake which partly destroyed Charleston, S. C., in August, 1888. That quake was observed from the Carolina coast, Georgia and Florida, northward to southern New England, across New York to Ontario, Canada, and westward to eastern Louisiana, Arkansas, Missouri and Iowa, altogether an area 800 miles wide by 1,000 from north to south.

Indians on the Menominee Indian reservation at Tesheno, Wis., will be allowed to do their own logging this season, and if they make a success of it they will have occupation for many years, as it is estimated that there are 200,000,000 feet of timber on the reservation. The Indians will be given \$50 thousand for cutting the lumber. Of this \$15 will be paid them and \$5 placed in the United States treasury to their credit at 4 per cent interest.

The Harrods Maid. Four society girls of Wallwallia, Wash., are helping their father harvest his wheat—Press Dispatch. You can talk about your bride what you like.

Oh, the girls who love pink lace. And the girls who drive their motor boats. Right through the swimming sea. They're out on the water's main. Put grit from head to feet. Who rally forth in summer time To help our harvest wheat.

Oh, the girls of Wallwallia! Who wouldn't follow, follow, When they see the jeans and bumpers And start out to work, y'know! The boys flock from the city To view these girls so pretty When they gather in the whirling wheat at Wallwallia, Wash.

Great Lines

October is here and with the month we open the greatest lines we have ever carried

OF Millinery Trimmings Dress Goods Furs and Cloaks Shoes for men and women Clothing for men and boys We say the greatest lines we have ever carried. That is putting it strong, but not too strong, for it is true.

Special attention is called to our wonderful line of latest style ready-made handsome men's suits for only

\$10

All our lines are fresh and full and at their best. The Peoples Store invites you to see its great lines of new autumn goods :
