\$3,000,000 FOR NEW SITES.

Southern Fewer Company to Develop Two Fresh Powers, One at the Ninety-Nine Islands, Near Blacksburg, S. C., on the Broad River, and the Other at Great Falls on the Catawha— Development Will Give Ap-proximately 50,000 of Electrical Horse Power.

Official announcement has been made by the Southern Power Company of its plans shortly to commence work on two fresh power sites, one at the Ninety-Nine Islands on the Broad river, six miles south of Blacksburg, S. C., and the other at Rocky Creek, two miles below the Great Falls station, on the Catawba river. The development at the Ninety Nine produce 30,000 of electrical horse-power. The total cost of these two developments will approximate \$3,000,000. Both will be completed by January 1st,

Mention was made a few days ago of the addition of \$2,500,000 to the capital of the Southern Power Company. That corporation now has the largest capital of any having head-quarters in Charlotte. It owns the water rights for 110 miles along the Catawba river and controls the following named power tites: At the Catawba falls, near Rock Hill, S. C.; at Mountain Island, near Charlotte; at the Lookout Shoals, near Newton; at the Horseford Shoals, near Hickory; at Landsford, near Lancaster, S. C.; at the Ninety-Nine Islands, near Blacksburg, S. C.; at Great Falls, near Fort Lawn, S. C., and the Wateree power, near Camden, S. C. The 150,000 of electrical borse-power which will be generated at these different points will be transmitted to cover a territory 150 miles in length and 100 miles in width. This territory stretches from Taylorsville, on the north, to Columbia, S. C., on the south; and from Greenville, S. C., on the west, to Darlington, S. C. on the east. Cotton mills and manufacturing plants of all kinds dot this section, to all of which this power in time will be avail-

The Catawba falls development near Rock Hill, S. C., was the first finished. Its 10,000 of electrical horse-power was dis-posed of very shortly after it had been placed upon the market. The big development at Great Falls, 10 miles below Fort Lawn, S. C., was then begun. Its 40,-000 of electrical horse-power will be available early in January. Already between 15,000 and 20,-Already between 15,000 and 20,000 horse power, or about one-half of this supply, has been sold. Negotiations are pending for the remainder. The officials of the Southern Power Company believe that the entire output of the Great Falls station will be sold before a single wheel turns. After the first of the year, there will be little power available from the present development.

Realizing this, the officials of the company met some time ago and agreed to begin a development which would meet the demands of this territory for some time to come. They determined to open up as quickly as pos-

ment which would meet the de-mands of this territory for some time to come. They determined to open up as quickly as pos-sible, not one power station, but two, capable of producing be-tween 45,000 and 50,000 horsepower of electrical energy. With that already on the market, this would give the Southern Power Company the control of approximately 100,000 by January 1st.

year, a portion of the current generated there was intended to be transmitted to the mills about Gaffney, Blacksburg, Spartan-burg and Greenville, S. C. The demand of the mills about Rock Hill, S. C., Gastonia and Charlotte, however, were so insistent that practically all of the current was disposed of there. In order then to satisfy the demands of the mills about Spartanburg, Gaffney and Greenville, S. C., it was decided to begin the development of the power at the Ninety-Nine Islands, six miles from Blacksburg and about 32

miles from Spartanburg.
The plans and specifications for the work there have already been drawn. Some of the contracts for the machinery will be let within 30 days. The building of the tenant houses for the Islands will produce 16,000 workers and the clearing away of the land will be begun at produce 30,000 of clear, will once. The 16 Ground the clearing away of the land will be begun at produce 30,000 of clear will once. The 16 Ground the land will be begun at the clear of the land will be begun at the land will be begun at the clear of the land will be begun at the land will be be horse-power which will be generated at that plant will go to supply the needs of the mills in the adjacent cities.

The power which is to be developed on the Catawba, two miles below the Great Falls station house, which will be known as the Rocky Creek power, will produce 30,000 horse-power. Transmission lines will content this station with the one connect this station with the one just above it, and the current will be carried to the distributing center at the Catawba station, near Rock Hill, S. C. Power will be supplied the mills in Chester, Lancaster, Union, S. C., and elsewhere in the territory where needed.

The work on the Rocky Creek power has already commenced. A quantity of material has been moved from the Great Falls station and the erection of the store houses, tenant houses, etc., will commence at once. The clearing of the stream and the work of preparation for the actual development is already under way.

HAVE YOU CATARRH?

Breathe Hyomel and Get Relief and Cure. Sold Under Guarantes.

If you have catarrh, with offensive breath, burning pains in the throat, coughing, raising of mucous, difficulty in breathing, successing, huskiness, discharge from the nose, tickling and dropping at the back of the throat, especially at n i g h t, coughing spasms, etc., begin the use of Hyomei at once.

Its healing medication will give relief in a few days and its continued use will completely drive all catarrhal germs from the system.

Hyomei contains Nature's bealing oils and balsams, the germ-killing properties of the

An interesting rumor is affoat in sailroad circles to the effect that Mr. P. L. McManus, formerly of Charlotte, but now of Greenville, S. C., will be pro-moted to the position of district superintendent, recently imately 100,000 by January 1st, made vacant by the resignation of Mr. C. S. McManus, who when work was commenced goes into the coal mining busion the Great Falls station last mess in Tennesses. TEXTILE MEN ORGANIZE.

Hundred or More Owners and Managers of Cotton Mills Most at Charlotte and Form the North Carolina Cotton Manufacturers Association - More Than a Million and a Hall Spindles Represented. ill News, Nov. 1st.

About 100 prominent cotton mill men of North Carolina met at the court house on Oct. 30th and organized the North Carolina Cotton Manufacturers' Association, with Mr. R. M. Miller, Jr., of Charlotte, as president. This meeting was beld pursuant to a call made by the mill men of Charlotte two weeks ago, asking that an association be formed in order to promote closer relations with the manufacturers of the State and to get in line with organizations in other Southern States. At the meeting Tuesday more than 1,500,000 spindles and 26,000 looms were represented. The office of the association will be n Charlotte.

Other officers were elected as follows: S. B. Sargent, first vice president; Charles Iseman, of Monroe, second vice president, and S. F. Patterson, of Roanoke Rapids, third vice president. A secretary and treasurer will be named later. The following executive committee was appointed: Messrs. D. Y. Cooper, W. A. Brwin,
Caesar Cone, A. A. Thompson,
J. W. Cannon, E. A. Smith, S.
B. Tanner, B. S. Robertson, J.
P. McRea, W. C Ruffin, J. P.
Leak, B. F. Mebane, S. Bryant,
David Clark David Clark, R. R. Ray, J. S. Carr, Jr., A. S. Hanes, Frank Wood, D. B. Coltrane, C. W. Johnston, R. S. Reinhardt, F. J. Murdock, W. C. Heath, D. A. l'ompkins, Wm. Entwistle, Ed Williamson, T. H. Battle, Rugene Holt, T. E. Moore, R. L. Molt, George B. Hiss, J. M. Odell, H. F. Schenck, F. Diling and Allen Ruffin.

ONE WAY TO KEEP COOK.

Some Que Hunt Invent's Pet Sorubboo, Says Epenemist.

"The average schoolteacher is not as
well paid as the average servant girl,"
says Professor I. M. Rubinew in the
Journal of Pditical Economy issued
fifth till University of Chicago Press.
He explains, according to a Chicago
dispatch, that cervants are at a premium because women dislike to be
demastics.
Experienced assesses.

Experienced servants, the profess

Experienced servants, the professor finds, object more to the long house than to the social inequality, and he edgasets that domestic help be paid so that they may live at home.

The population has increased twice as fast as the number of servants. The total number of women employed in galatral occupations has increased 200 per cent, but the number of women servants and waiters has grown less than 50 per cent. than 50 per cent.

He thinks invention might solve the problem. "The genius who shall in-yent an automatic dishwasher and pot scrabber will be a true benefactor of mankind," lie asserts.

Calls Probleton Edicts.

"Infast prodigies are no better than idiots," declared Professor F. Rly of the chair of nervous diseases at Drake university before the lown Mothers' Congress the other day, says a Dec Moines dispatch. A chorus of "Oh's" and "Ah's!" from the lips of half a hundred doting mothers whose children were prodigies aind who didn't believe a word the doctor said greeded the spmarks. "It is better to be the believe a word the doctor said greeded the remarks. "It is better to be the aloggish, plodding man with the hose than the leng haired, sensueus man with the bow," continued the doctor. "Music and art are fine things when diluted with a little football and a little wholesome reading and sleep, but the man whose faculties are developed in one direction only connect with the in one direction only cannot Tall to be unetable and a crank."

Rev. R. Z. Johnston the well and favorably known pastor of the Presbyterian church at Lincolnton, has resigned after a pastorate of more than 35 years. His resignation has not yet been accepted. Mr. Johnston is 72 years of age.

A Columbia, S. C., dispatch of the 29th says: Friends throughout the State of Dr. Bpp Foster, of Union, will be profoundly shocked to learn that he attempted suicide at Union Monday afternoon just after returning from Columbia, where he had spent fair week. Dr. Poster walked into the Union Hardware Company's store and, immediately after purchasing a revolver, turned it on himself and fired. The bullet entered at a point over his heart but was deflicted by a rib. Dr. Foster is a tall, handsome young man and, having inherited large means, has spent money freely and was prominent socially. He attended the State and assembly balls in Columbia last week and seemed to be in the best of spirits. At times he drank heavily. YORK AND YORKVILLE.

What's Boing Among our Neighbors Just Acress the Line. Yorkville Rnouises, 2d.

Miss Jessie Baber has been visiting Miss Wilms Plexico at Sharon.—Miss Maggie Barnett is with J. L. Williams & Co., as a saleslady.—Mrs. H. H. Beard left Tuesday evening for a visit to her sister, Mrs. Neal Mc-Lean at Lumberton, N. C.

We will have to take it back about the treasurer being required to canvass the county for the collection of taxes. York county, it seems, is exempt from such a requirement, and Treasurer Neely makes the rounds voluntarily, purely as a matter of convenience to the taxpayers.

A number of prominent citibegun to talk up the idea of levying a special tax for road building purposes. Some are out-spoken in advocacy of the issuance of township bonds in sufficient amount to do the work in first-class style and at once. Bethel is not now paying any special tax of any kind, and she is in good shape to set an example to the balance of the county in road building.

There was an old time corn shucking at the home of Mr. T. J. Nichols about six miles northeast Yorkville last Wednesday night. Quite a large number of shuckers had been invited, including numerous ladies. The shucking commenced in the afternoon and although the corn pile included some seven or eight bundred bushels the work was finished in the early evening. Then there was a splen-did supper. There was pork, mutton, chicken, turnips, pota-toes, everything that was good. It was a great occasion to all the participants.

The King's Mountain Chapter of the Daughters of the American Revolution has done itself proud in the entertainment of the State conference of that order this week. Though not the most exclusive perhaps, the D. A. R. is easily the most representative and distinguished woman's organization in South Carolina. It includes among its membership a large per centage of distinguished members of distinguished families, and its average of wealth, culture and intellect is high. Its representatives also are women who are acquainted with and accustomed to all that is best and highest in the social development of the State. The creditable enter-tainment of people of this kind calls for thorough acquaintance and familiarity with requirements of good usage, and it is an open secret that all of the visitors are thoroughly de-lighted. They have said so and not a few of them are disposed to emphasize the fact that the present conference has been even more successful and enjoyable than any of the thoroughly successful and enjoyable conferences that have gone before. The King's Mountain chapter is getting a large share of the praise.

Travels Like Yellow Pever.

Charlotte Observer The successful rioting of Phila-delphia negroes, led by their preachers, against the pro-duction of "The Clausman" in that city, seems to have stirred up the Washington negroes to agitate against the whites in general, particularly in regard to hat they term their treatment in the public schools. This reminds us bow the Atlanta antinegro excitement spread to neighboring cities. Acute racial feeling is a moral infection which seems to travel like yellow fever

PRESIDENT'S VISIT TO PANAMA

First Time a Chief Magistrate Will Have Set Foot on Foreign

askington Dispatch in The Kew York

President Roosevelt's visit to the Isthmus of Panama will present several novel features. For the first time in history the President of the United States will set foot on foreign soil and be the guest of a foreign ruler at dinner. At the time of his visit to New Orleans President Roose-velt was technically outside the jurisdiction of the United States, as the vessel conveying him to the Queen City went outside the three-mile limit.

Many interesting incidents will

mark the visit, ranging from a reception in bonor of President Roosevelt at the palace of the President of Panama to a ride on the Chagres river on a caseo, the native water craft, and ploughing through the sticky mud fof Culebra Cut in rubber boots and a mackintosh. President Roosevelt has had many unusual experiences, but his trip to Panama will furnish him with reveral new theills. with several new thrills.

Mr. Roosevelt will spend only four days in Panama, but they will be busy ones. His only opportunity to rest will be on Sunday, November 18, the last day of his stay. The three preceding days are the base and single days are the base are the base are the base and single days are the base and single days are the base are the ing days are to be crowded with sight-seeing, excursions and social functions.

The President will make two speeches, one at the Piesta, then he will respond to an address of welcome by President Amador,

and later at a reception on Pier 11 at Cristobal.

The President will go to Pansma on the magnificent battleship Louisiana, which will be conveyed by its sister ships, the Tananaca and the Maghine. the Tennessee and the Washington. He will be accompanied by Mrs. Roosevelt, Ethel Roosevelt, Dr. Rixey, surgeon general of the navy, the President's physician, and a secretary.

President Roosevelt will return from Custer Peter the nave of the na

turn from Oyster Bay after elec-tion, and will fleave Washington tion, and will fleave Washington on November 8. He will board the Dolphin at the Washington navy yard, and will remain on board this ship until it reaches Wolf Trap Light, in the Chesapeake Bay, where he will transfer to the Louisiana, and start in madiataly for Colon The immediately for Colon. The distance from Wolf Trap Light to Colon is 1,788 miles, and the voyage will take six days. The Louisiana will reach Colon on Thursday morning, November 15

President and Mrs. Amador, Chairman Shonts, of the canal commission, and Mrs. Shonts, who will leave for Panama so as to be there when Mr. Ruosevelt arrives, and Chief Engineer and Mrs. Stevens will go aboard the attleship before President and Mrs. Roosevelt go ashore.

Immediately after landing the party will be taken aboard a train and run slowly across the isthmus to Lo Boca, giving the President a casual view of the towns, the canal and a parade of the native school children.

At La Boca there will be an inspection of the terminus of the old French canal and of the Panama Railroad. The entire plan of the canal will be explained to President Roosevelt, and he will be given information regarding sites and plans for the proposed dam, lock and lake at La Boca. There will be a trip in a launch to the islands of Perice, Naos and Flamenco, thus giving President Roosevelt a view of the actual deepwater southern end of the canal, the approaches. the old French canal and of the of the canal, the approaches, the harbors of La Boca and Panama and the surrounding country.

Luncheon will be served at Ancon, followed by a trip around Ancon Hill and a visit to around Ancon Hill and a visit to the hospital. The remainder of the day will be given by President Roosevelt to the government of Pausma, and while the programme has not been finally arranged, enough of it has been prepared to show that it will be a busy day for the President. It will be a gala day, and the dirt is not expected to fly on this occasion. The city of Ancon will be decorated elaborately and illuminated brilliantly in honor of President Roosevelt.

Some time during the afternoon the executive party will

Some time during the afternoon the executive party will
be met by officials of the Republic of Panama, and conducted by them and escorted
by a hundred young Panamanians mounted, the President will drive about the city.
The drive will end at a stand
to be erected in one of the
plasses, from which President
Amador will deliver an address

SANTA FE TRAIL SIGN

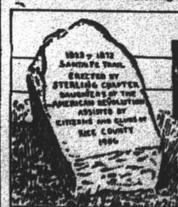

Piret Bowlder to Mark the Historic Highway.

IT WEIGHS ABOUT 5,000 POURDS

The Burn Stone Placed Bel Storling and Lyon, Kan, Was Brought Prom Western Stintown Brought Prop by the Santa Fo Rail-

The first bowlder to mark the Banta Fo trail has been placed in position on the main road between Sterling, Kan. and Lyons, Kan, a mile from Brons, says a Sterling correspondent of the Kansas City Ster. It is a bowlder Kansas City Star. It is a bewitter weighing about 5,000 pounds, it year found in western Oklahouse and was brought to Starling freight free by the flants Th rullway. While other murices are Being purchased with money contributed by the achoof children of the state of Kansas, this one is puid for by the puople of Rice county. The legislature has appropriated \$1,000 to mark the trait, but he application was made for a part of it.

The Dangisters of the Revention, governess weemen, started the movement, and Mrs. W. C. Staysor, secretary, was instrumental to secting the

placed on the real stants.

The work of merking the trail is being taken up with interest by the constitution through which the stances distincted readway paties, but counties removed from the course are indifferent. The legislative appropriation is far two manife to place markey that will not be moved or destroyed. In the county the location of the first matrice stilly besides the control of the first matrice stilly besides the control of amounty, the trail morne is dispetly through the patie of the principal laboratories. It is planted there is place a bowder in the measure, that it may be a lesson to the citiden on the placement history of the state.

For many years the trail was churry identified wherever it led through the neightwest, but with the coming of the staffs plever and the planting of the staffs plever and the planting of the prefries to grain this is Yest positing away, and the either flapstra, that are known in the easiest part of the state will inner the exact bontion indefinite soon. The nettlers have found noney combiders of the irall's patroy thys in relica and entro along its tends highway. Old wagon trons of wirings series to there a mound telling of the trappible of the everland telling of the trappible of the trail notation in local tradition. There are fast passing away.

STEAM PLOUGES IN EANSAS.

Farmers Able to That Horn Wheel Then They Can Gat Revendage,

The steam plough has become a familiar object is Western Kansas, Managers of the big implement houses here my that about 250 outfits have been sold in the past twelve months and that about 600 are in use on the Western and Central Kansas plains wherever fields are large enough and the ground level enough to permit their operation.

enough to permit their operation.

All through the western portions of the wheat belt big tracttion engines, with wheel tires
nearly a yard wide, are at work
pulling the gaug ploughs and
turning up the soil at the rate of
thirty acres a day, with two men
working each outfit. These two
men, working in the old way,
could plough only about six
scres a day, so that the steam
plough has ingreased the efficiency of labor five-fuld in this
one character of farm work.

These outfits cost about \$1.
900, but the expense of ploughing averages only about 40 cents
at acre, as compared with an
expense of 75 cents to \$1.50 an
acre when the work in done by
a man with a team. Therefore,
a larmer who owns 1,000 screes
of wheat land can save enough
though in a few years to pay for

of wheat land can save enough thothey in a few years to pay for a steam plough.

Kannas City dealers say that about half the steam ploughs in the West are owned by large farmers and the remainder belong to thrashing machine men who run the ploughs in the spring and the late fall, when they are not threshing grain.

The rush to get the fall ploughing finished while the ground is in good condition has prompted some farmers to run their steam ploughs at night, with a great glaring headlight gleaming across the fields, as well as in the day-time.

The only objection to the steam plough is that it enables farmers to plant more wheat than they can harvest. In portions of central and western Kannas, where the farms are large and the population is comparatively sparse, a favorable fall for ploughing and planting and a steam outlif at hand result in such large areas of wheat that when the harvest season comes the task of gathering the crop must wait on the incoming of hundreds of strangers to labor for a few weeks in the harvest fields.

Mr. W. S. Jones, a foreman, and Mr. A. A. Authony of J. H. Wearn & Co., cogaged in a fierce fight in the new Selwys Hotel at Churlotte Thursday afternoon. During a lag in the fight Jones struck Authony with a window weight, fracturing his skull. Jones was placed under a bond of \$500.

The News, of Columbus, Po The News, of Columbus, Pol county, says: A report is in circulation to the effect that To Davis and Bob Headerson, tw Polk county how who left the county a few years ago, has been lynched or sung in Minnistappi, but we are unable a verify the report and give it to what it is worth.
