Fifty-Eight Names Added to Carnegie Hero List.

Fifty-eight names were added to the Carnegie hero list in the United States Monday by the Carnegie Hero Fund Commission at its fall meeting at Pittsburg. For acts of heroism 30 silver and 28 bronze medals were awarded the life-savers or their families in cases where death resulted. In addition, cash rewards aggregating \$40,250 were made in 33 of the cases, the cash to be used for educational or other worthy purposes at the discretion of the executive committee, while in 23 other cases of rescue or attempted rescue, where the heroes died as the result, pensions from \$20 to \$70 a month were made to the dependents with \$5 a month additional for each child left.

Of the rescues from death or the attempts, 7 were from railroad trains or street cars, 19 from drowning, one from a runaway horse, 8 from suffucation in gas producers, or wells, 10 from death in mine disasters, 2 from fire and one from shooting.

The mine disaster at Cherry, Ill., November, 1909, figured prominently in the hero list with the recognition of the heroism of 13 miners. Eleven of these died from injuries in rescuing an unknown number of miners, and besides, a silver medal, the monthly stipends were made to the families in these cases. Two that survived were awarded the silver medal and \$1,000 cash. Among the awards were a number to persons in Southern States, but none in North Carolina.

To Mr. and Mrs. Ed. Little, Tuesday, November 8th, 1910, a son.

Because he could not find employment that would enable him to support a wife, Lafayette Maddox, aged 25, committed suicide Sunday by shooting himself. The tragedy took place in a street car and his flancee was sitting beside him.

WILL TRY NEW METHOD.

Rutherford Man to Dynamite Acre of Land Christmas Week.

The Highlander.

Mr. James Withrow, of Hollis, is another convert to the new method of dynamiting land and expects to blew up an acre on his farm one day during Christmas week. Mr. Withrow was in Shelby a few days ago and told us that he intended to ti, the dynamite experiment next year and that he believed it would prove great boon to the farmer in the

Progress of the Union in North Car-

Carolina Union Farmer. Carolina's account was mentioned in the financial report, and President Barrett, in his address, referred especially to the splendid record the organization has made in North Carolina. Since the National meeting the organizing work is going forward by leaps and bounds and the State organizer now has calls to set up county organizations in three new counties. Co-operative enterprises are being established all along the line, the State business agent finds the volume of business through his department increasing rapidly, new methods are being received in many of the older organized counties and the calls for services of organizers in unoccupied counties continue to come in to State headquarters. The hundreds of picnics, barbecues and rallies held in different sections of the State during the summer season have been productive of splendid results in the way of inspiring the membership and in getting non-union men interested in the organization. All this should be an inspiration to the organization throughout the State and should nerve our membership to greater loyalty and devotion to the Farmers' Union. The direct and indirect benefit of this splendid organization has already been far-reaching in its effects and it is destined to evolve plans and put into practice ideas that will work a transformation in rural life conditions in this State.

Now, just a word to you as member of the Farmers' Union: Don't stay away from the meetings of your Local Union. Your presence is needed there and another member can not fill your place at the meeting. The Local Union is the unit of the organization and upon the life and activity of the Local Unions depends the life and usefulness of the organization as a whole. Besides, it is a credit to any neighborhood of farmers to maintain a strong local organization. It brings about a closer relationship between neighbors and is a good index to the pro-
