SEVERE PUNISHMENT

Of Mrs. Chappell, of Five Years' Standing, Relieved by Cardui.

Mt. Airy, N. C.—Mrs. Sarah M. Chappell of this town, says: "I suffered for five years with womanly troubles, also stomach troubles, and my punishment was more than any one could tell.

I tried most every kind of medicine, but none did me any good.

I read one day about Cardui, the woman's tonic, and I decided to try it. I had not taken but about six bottles until was almost cured. It did me more ood than all the other medicines I had tried, put together.

My friends began asking me why I looked so well, and I told them about Cardui. Several are now taking it."

Do you, lady reader, suffer from any of the ailments due to womanly trouble, such as headache, backache, sideache, sleeplessness, and that everlastingly tired

If so, let us urge you to give Cardui a fal. We feel confident it will help you, just as it has a million other women in the past half century.

Begin taking Cardui to-day. You won't regret it. All druggists.

WHAT WAR WOULD COST.

Estimates of Necessary Expense of Conquering Mexico Stagger the Imagination.

The Side Table. Charlotte Observer: 3rd

Meantime they are figuring on what our Mexican trouble is going to rost the United States in money. and it is an interesting occupation. It calls for the dealing in large tigures. The Washington correspondent of the New York Journal of commerce says that whether the hostilities in Mexico be called war or not, at all events the Government is already cashing the cost of the war. There is the cost of transportation, for instance. Troops of various kinds have already been sent. It is estimated that the movement of troops to Mexico will cost \$5,000,000 for water transportation alone, that by rail will be much greater, and, it is said, it is so ninch greater than at present it cannot be even approximately estimated.

The Government has been keeping for some time four transport ships at Galveston awaiting a possible need. For more than a year they have been there. The need came. The maintenance of these four transports cost the Government, inclusive of subsistence, \$36,000 a month. They were not enough when the word to move the Fifth Brigade in Texas, under General Funston, consisting of four regiments, one cavatry and one of field artillery. So merhant ships had to be chartered ad ditionally. Transporting the field artillery was burdensome in addition, for the regiment was equipped with mountain guns which are carried on pack mules, which had to be taken along. It is estimated that it will require from 18 to 20 transports to move the entire second division to

The transfer by water of the first field army it is said will require 50 large transport ships. Negotiations have been in progress for some time to obtain that many, but at best It will take several weeks to assemble that number of vessels at Galveston.

The movement of troops is not all. They have not only to be fed. but need other things. As imperative as food is ammunitton rials have to be purchased for reserve stock and clothing. A force of 100,000 men requires a great deal; and the larger the force the larger the needs. All this will have to be transported a considerable distance, and, as shown, the supplies will have to be transported, and mostly by ships. These should derive a fairly profitable business from out the Mexican situation.

So much for the cost in transportation and subsistence supplies. It is learned that the army is quite well off there with the exception of field guns and the ammunition therefor. The reserve for small arms is large, including new Springfield rifles, but nevertheless the manufacture of small arms will have to go on with the greatest dispatch because the first thing to be done upon the organization of volunteer regiments and the mobilization of the militia is to keep the troops at the mobilization centers at target practice. The expenditures of ammunition will commence even before the troops reach the front.

While the Ordinance Department of the Government is prepared to carry forward the manufacture of ordnance materials, it will call upon Henry Spencer, Annie May Spencer, all private plants for such manufacture, and it may be expected that these will engage in overtime work. The Government arsenals are to be worked on a 21-hour basis. The 8hour law will be disregarded. That is an exception allowed by law in

Estimates have been made in detail what it will cost the first field army for one year. The items tabulated in the quartermaster corps alone foot up to \$250,000,000. cost of ammunition is not included in this estimate, but transportation is, and the cost of 50 transport ships s estimated at \$5,000 a day. It has been tabulated that a tonnage of 175,000 will be required to move the first field army. Furthermore, some 16,000 horses and mules will have to be bought at a cost of \$2. 000,000. A cold storage vessel will also have to be bought or chartered to furnish refrigerated meats for troops sent to Mexico. The Navy has some refrigerator ships, but the Navy will need these.

The figures grow even more impressive the more they are studied. If the war becomes serious it is believed in military quarters that a two-year war would require four field armies. Even should the campaign of conquest be short, it will take time to preserve order and Miss Hannah's room: Mabel Cur- maintain peace in Mexico, and the suppression of guerrilla warfare will be a most difficult task. The cost of two years of the war on this basis is estimated at \$2,400,000,000, or \$300,000,000 a year for each field army in the war. It is estimated that an army of from 350,000 to 400,000 will be required to occupy and pacify Mexico for two years.
