Rubbing Eases Pain

Rubbing sends the liniment tingling through the flesh and quickly stops pain. Demand a liniment that you can rub with. The best rubbing liniment is

MUSTANG LINIMENT

Good for the Ailments of Horses, Mules, Cattle, Etc.
Good for your own Aches, Pains, Rheumatism, Sprains, Cuts, Burns, Etc.
25c. 50c. \$1. At all Dealers.

THE GAZETTE \$2.00.
On and after January 1, 1917, the subscription price of The Gazette will be \$2 the year instead of \$1.50 as at present. Until that date new subscriptions and renewals will be taken at the old price. All subscriptions are strictly cash in advance. This increase in the price of the paper is rendered imperative because of the unprecedented increase in the cost of print paper and all other materials which enter into the making of a newspaper.

SAYS HE DID NOT EAT ENOUGH FOR BIRD TO LIVE ON

W. L. DORSETT UNABLE TO EXPRESS APPRECIATION OF TANLAC'S GOOD WORK.

"I didn't eat enough to keep a bird alive," said W. L. Dorsett, of 714 East Russell street, High Point. "I never recovered from the effects of lagrippe and indigestion and catarrh, of the worst form, added to my ill and worries. I finally felt as if I had lost my stomach for I had no desire to eat for months. I was nervous, couldn't sleep and felt tired out all the time. Taking medicines prescribed for me was like taking so much water. Then I saw Tanlac advertised.

"I am on my second bottle now and it surprises all the folks to see how hungry I am. Why, any kind of food agrees with me; my sleep is sound; that tired out feeling has left; nervousness and catarrh is much relieved and, I just can't find words strong enough to recommend Tanlac for its work in my case."

Tanlac is sold in Gastonia by the Adams Drug Co.; Lowell, Robinson Pharmacy; Cherryville, H. H. Allen; Belmont, Stowe & Sanders; Dallas, P. D. Summey; Bessemer City, Thigpen Drug Co.; Huntersville, S. L. Mullins; Lenoir, Ballew's Cash Pharmacy; Grover, C. F. Hambricht; Worth, Harden Mfg. Co.; Mt. Holly, the Reep Company.—Adv.

A Civil War Record.
Lincoln County News, 2nd.
Rev. William R. Wetmore, D. D., rector of St. Luke's church at Lincolnton for over 40 years, was a Chaplain in the Confederate Army around Richmond.
He came from Lee's army to New Berne, N. C., where he had charge of the Episcopal church when New Berne was captured by the Federals. On a Saturday evening the Provost Marshal at New Berne ordered Mr. Wetmore to open the church the next day (Sunday) and have services. Mr. Wetmore replied, "if I open the church I will pray for the President of the Confederate States" to which the Provost marshal rejoined, "if you do I will have you put in jail." "Then I will not open the church," said the rector. And he did not and the next morning the doors of the church were broken open and the Federals put one of their own chaplains in charge to have services. From New Berne Mr. Wetmore came to Lincolnton and was living here in the house now owned and occupied by Sheriff J. K. Cline when the Federals came here in 1865. At that time he was a member of the Home Guard and this was his gun. Finding the Yankees too numerous Mr. Wetmore hid this gun under the old White church till they left town.

DAVIDSON COLLEGE NEWS.

Correspondence of The Gazette.
DAVIDSON, Oct. 5.—The Gaston County Club, organized for the first time last year, met last week and elected officers for the year. Officers as follows were elected: President, R. H. Ratchford; vice-president, H. W. Davenport; secretary-treasurer, J. A. Ormand. It is the purpose of the club to meet at intervals during the year for social and "homely" enjoyment. The total membership now numbers nine.
Mr. Walter Hall, of Belmont, has been elected manager of the Freshmen basketball team. That he should be named for this position from a class numbering 150 is quite an honor.

Perhaps one of the most unique clubs in its way is the Steele Creek Club, composed of nine students from the Steele Creek neighborhood in Mecklenburg county. All nine are members of the Steele Creek Presbyterian church, the largest country church in the Southern Assembly.
Dr. J. W. McConnell, the college physician, has not yet secured his release from the state militia company in order to take up his duties in connection with the college. He is the first lieutenant in the Medical Corps of the North Carolina Regiment.

SEVERE PUNISHMENT

Of Mrs. Chappell, of Five Years' Standing, Relieved by Cardui.

MY Atry, N. C.—Mrs. Sarah M. Chappell of this town, says: "I suffered for five years with womanly troubles, also stomach troubles, and my punishment was more than any one could tell. I tried most every kind of medicine, but none did me any good. I read one day about Cardui, the woman's tonic, and I decided to try it. I had not taken but about six bottles until I was almost cured. It did me more good than all the other medicines I had tried, put together. My friends began asking me why I looked so well, and I told them about Cardui. Several are now taking it."

Do you, lady reader, suffer from any of the ailments due to womanly trouble, such as headache, backache, sideache, sleeplessness, and that everlastingly tired feeling?
If so, let us urge you to give Cardui a trial. We feel confident it will help you, just as it has a million other women in the past half century.
Begin taking Cardui to-day. You won't regret it. All druggists.

LOST \$7,000.

Asheville Baseball Club Played in Tough Luck—Will Give Up Franchise.
The following dispatch sent out recently from Asheville will be of interest to Gaston fans:
Following the resignation of Jack Corbett as manager of the Asheville baseball team, there has developed a strong sentiment among the directors, supporters of the team and many of the leading fans, it is learned on good authority, that this city drop the franchise it holds in the North Carolina league of professional baseball clubs. All indications at present point to this action being taken by the board of directors and that the city will be without organized baseball next year, for the first time in many years. A director of the club told a representative of The Daily News bureau that \$7,000 would be a conservative estimate of the sum the club lost this year and that this amount would have to be paid out of the pockets of the directors. Almost every year since organized baseball was first played in this city there has been a deficit in the receipts of the club, but this year that record has been far exceeded and few of the directors will feel like shouldering the load for another year, once these debts are paid and they find out the amount of money they must dig up.

Crimson Clover Important in Soil Fertility Building.

(By C. B. Williams, Chief, Division of Agronomy of the Extension Service of the A. & M. College and Department of Agriculture.)
The Division of Agronomy of the Extension Service of the A. & M. College is devoting considerable attention to the matter of supplying information with reference to soil fertility and how to build it up. It has been recognized for some time that one of the greatest problems before any State is the building up and maintaining of the productive state, for if our soils do not produce remunerative crops then our people cannot be prosperous. North Carolina is an agricultural State and it therefore is incumbent upon the State to supply farmers with as much specific information as possible with reference to building up and maintaining their soils in a productive state. It matters not how well the other business pertaining to the farm is conducted, if that of the growing of the crops in the most economical way is not looked after the farm is not going to be the most profitable. In order to pay taxes and meet the necessary expense connected with the social life of the country it will be necessary for our people to have a reasonable net income from the production crops.
In order to maintain our soils in the most productive state it will be necessary to grow leguminous crops. These should be grown with the idea as nearly as possible to provide the required amount of nitrogen and humus in the soil for the non-leguminous crops like corn, cotton, wheat, rye, etc., that are most generally grown in the State. On every farm a certain amount of land each fall should be given over to the cultivation of the leguminous crops. In a general way in general farming usually from one-third to one-half of the total acreage will be about all that can be handled. There are many crops that are well adapted to most of the conditions existing in the State such as crimson clover, hairy vetch, bur clover, etc. Of these which are only suitable for fall seeding one that is probably better adapted to the conditions prevailing throughout the State as a whole is crimson clover. This clover when properly put in on fairly good land or on land properly manured or fertilized, does well usually from the mountains to the seashore. It should be remembered in putting in any of the leguminous crops that usually, if the land is poor, deficient in organic matter and available plant food constituents, the chances of success are very small. Crimson clover should be grown far more extensively than it is at the present time and every farmer should at least plan to save enough seed for planting the acreage that is to be devoted to this crop the following fall. Because of the high price of seed generally, and especially so this year, the acreage will be much smaller than it should be. Those who put out this clover should, by all means plan to save the seed in the rough next spring.
Crimson clover, although it will grow on most any type of soil, does its best usually on warm sandy loams containing a goodly amount of organic matter. If the soil has not been inoculated it will be well to inoculate the seed or soil with cultures or with soil taken from a field on which crimson clover has been previously grown successfully with the formation of nodules on the roots. A sufficient amount of fertilizer of manure, or both, should be added to provide the required amount of plant food for satisfactory growth. The seeding ordinarily should take place in most sections of the State from the first of September to the middle of October. The seed may be sown in corn, cotton, or tobacco as a catch crop and be lightly

SALE OF VALUABLE FARM LANDS.

By virtue of the power of sale contained in a certain Deed of Trust executed by J. Ben Lutz and wife to me, dated October 4th, 1912, and registered in the office of the Register of Deeds of Gaston county in Book No. 98, page 99, default having made in the payment of the indebtedness thereby secured, and the owner of the said indebtedness having requested me to do so, I will sell to the highest bidder for CASH at the Court house in Gastonia, North Carolina, on Monday, Nov. 6, 1916 all that certain tract of land situated in Dallas township, Gaston County, N. C., adjoining the lands of Lee Friday, O. D. Carpenter and others, and bounded as follows: Beginning at a Black Oak, Eph and Michael Friday's and Lineberger's corner, and runs S. 82 1-2 E. 57 poles to a White Oak; thence S. 45 1-2 E. 13 poles to a stone and the mouth of a branch; thence S. 85 1-2 E. 10 poles to a stone; thence S. 30 E. 52 poles to a large White Oak; thence N. 61 E. 20 poles to a stone in a field; thence N. 27 E. 90 poles to a Post Oak, Lee Friday's corner, near or on Pasour's line; thence N. 8 W. 4 poles to a Black Oak stump, corner of the Morris tract; thence with said tract S. 75 E. 70 poles to a stone on Pasour's line; thence N. 13 W. 53 poles to a Black Jack; thence N. 82 1-2 W. 40 poles to a stone; thence N. 10 3-4 W. 45 poles to a stone and White Oak pointers on the old line; thence a new line S. 61 crossing a branch and Hoyle's Creek 163 poles to a Walnut tree near the hill; thence N. 28 poles to a stone; thence N. 36 W. 21 poles to a stone below the ford of the creek; thence S. 52 1-2 W. 63 poles to a stone on the old line; thence with the old line S. 37 1-2 E. 74 poles to the beginning, containing 140 acres more or less.
This October 3rd, 1916.

NOTICE OF PUBLICATION OF SUMMONS.

North Carolina, Gaston County, in the Superior Court, October Term, 1916.
M. L. Brown vs. Isabelle Brown
Isabelle Brown, the defendant above-named will take notice that an action entitled as above has been commenced in the Superior Court of Gaston County, North Carolina, by her husband, M. L. Brown, against the said Isabelle Brown for absolute divorce from the bonds of matrimony; and the said defendant will take further notice that she is required to appear at the term of the Superior Court of Gaston County to be held on the seventh Monday after the first Monday in September, 1916, at the court house in said county and state, and answer or demur to the complaint of the plaintiff in said action, or the plaintiff will apply to the court for the relief demanded in said complaint.
This the 23rd day of Sept., 1916.
C. C. CORNWELL, Clerk of Superior Court.

Organization Meeting

THE GREATER

Gaston County Association

FRIDAY, OCTOBER 13 AT 8 O'CLOCK

The County Court House, Gastonia

All Citizens of Gaston County, whether Members of the Association or not, Are Cordially Invited

BUSINESS OF MEETING:

- Adoption of Constitution and By-Laws.
- Election of all Applicants for Membership.
- Discussion of Plans for the Association.
- Election of Directors from each Township.
- Election of County Officers.

Since proxies will not be allowed at this meeting it is particularly important that a full attendance be on hand.

For further particulars refer to F. P. Hall, Belmont, Acting President; J. Wirt Summey, Dallas, Acting Vice-President; Joe R. Nixon, Cherryville, Acting Vice-President; C. W. Roberts, Gastonia, Chamber of Commerce, Acting Secretary, or to any of the township divisions.

- CHERRYVILLE COMMITTEE: D. P. STOWE, Director; W. D. CRAWFORD, Director; BESSEMER CITY COMMITTEE: R. C. KENNEDY; J. T. OATES; E. L. FRONBERGER; C. E. WHITNEY; DALLAS CHAMBER OF COMMERCE: J. WIRT SUMMEY, Pres.; J. C. FLETT, Vice-Pres.; EVON L. HOUSER, Secretary and Treasurer; A. R. MARTIN, Director; R. S. LEWIS, Director.
- STANLEY COMMITTEE: J. M. REINHARDT, Chmn.; MT. HOLLY COMMITTEE: R. K. DAVENPORT, Com.; J. C. COSTNER, Com.; MCADENVILLE COMMITTEE: R. R. RAY, Chairman; GASTONIA DIVISION: THOS. L. CRAIG; C. B. ARMSTRONG; J. H. KENEDY; E. G. McLURD

ous crops like corn, cotton, wheat, rye, etc., that are most generally grown in the State. On every farm a certain amount of land each fall should be given over to the cultivation of the leguminous crops. In a general way in general farming usually from one-third to one-half of the total acreage will be about all that can be handled. There are many crops that are well adapted to most of the conditions existing in the State such as crimson clover, hairy vetch, bur clover, etc. Of these which are only suitable for fall seeding one that is probably better adapted to the conditions prevailing throughout the State as a whole is crimson clover. This clover when properly put in on fairly good land or on land properly manured or fertilized, does well usually from the mountains to the seashore. It should be remembered in putting in any of the leguminous crops that usually, if the land is poor, deficient in organic matter and available plant food constituents, the chances of success are very small. Crimson clover should be grown far more extensively than it is at the present time and every farmer should at least plan to save enough seed for planting the acreage that is to be devoted to this crop the following fall. Because of the high price of seed generally, and especially so this year, the acreage will be much smaller than it should be. Those who put out this clover should, by all means plan to save the seed in the rough next spring.
Crimson clover, although it will grow on most any type of soil, does its best usually on warm sandy loams containing a goodly amount of organic matter. If the soil has not been inoculated it will be well to inoculate the seed or soil with cultures or with soil taken from a field on which crimson clover has been previously grown successfully with the formation of nodules on the roots. A sufficient amount of fertilizer of manure, or both, should be added to provide the required amount of plant food for satisfactory growth. The seeding ordinarily should take place in most sections of the State from the first of September to the middle of October. The seed may be sown in corn, cotton, or tobacco as a catch crop and be lightly

harrowed in or covered with a weed-er. If the clover is to follow a crop like cowpeas, the land may be put in shape usually by double disking and harrowing. After the seed are sown, a harrow should be run over the land to lightly cover them. Although crimson clover seed generally are sown alone, it frequently is found advisable especially where clover is grown for hay, to sow with crop oats, using one of the early maturing varieties like the Burt. If later maturing varieties of oats like Red Rustproof or Apple are used, it will be necessary to use the white bloom gnetrison clover which matures at a later date and will reach the hay stage at about the same time as the later maturing oats. A good seeding will be 1 1-2 bushels of oats with 8 to 10 or 12 pounds of crimson clover seed per acre. The oats should be drilled while the crimson clover seed may be sown on the surface and harrowed in. Where the clover is grown for soil improving purposes purely, which is generally advised under most conditions, the growth produced should be plowed in at about the time it is in full bloom. Under conditions where the land is very poor and there may be some doubt about the clover producing a satisfactory growth, it frequently is advisable to mix rye with the crimson clover using 2 to 3 pecks of rye to 8 to 12 pounds of clover.
On every farm there should be established a definite rotation in which leguminous crops may enter at frequent intervals. Crimson clover will be one of these legumes that will generally be of value. It may follow a small grain crop, cotton or corn, or truck crop, by being lightly harrowed or cultivated in between the rows of the growing crops. Generally as nearly as possible farmers

try to sow the seed at the last cultivation in order to save labor. The clover the following spring may be plowed in for improvement of the soil or be cut for hay, if part is required for this purpose, and stubble turned in ample time for the land to go in corn or some other summer growing crop like cowpeas and soybeans but not usually in time safely for such crops as cotton and tobacco. When the crop is utilized in this way and much of it is plowed back into the soil then it will be found that the land so treated will gradually grow in productivity from year to year, especially so if a small amount of the necessary fertilizer is applied. When crimson clover is used largely to supply the nitrogen then the necessary amount of phosphoric acid and in some cases potash required to be bought will not be under normal conditions very expensive.

Germany Faces Shortage in Foods.

London, Oct. 5.—Great difficulty is being experienced in provisioning Berlin, according to a Socialist newspaper of that city as quoted by Reuter's correspondent at Amsterdam. The potato supply is said to have been stopped during the last few days, the difficulty being due to a lack of laborers.

The decrease in the milk supply is the subject of anxious discussion by the authorities. The newspapers say many of the large dealers have discontinued their supply of milk. According to this information there has been a great rush to the soup houses which have been distributing 34,000 portions daily.

CUT THIS OUT—IT IS WORTH MONEY.

DON'T MISS THIS. Cut out this slip, enclose with 5c to Foley & Co., Chicago, Ill., writing your name and address clearly. You will receive in return a trial package containing Foley's Honey and Tar Compound for bronchial coughs, colds and croup; Foley Kidney Pills, and Foley Cathartic Tablets. Specially comforting to stout persons. J. H. Kennedy & Co.—(Adv.)

WOMAN ALL RUN DOWN

Made Strong and Well By Vinol
Waynesboro, Pa.—"I was all run down after a hard spell of bronchitis so it was hard for me to keep about. I had pains in my chest and took cold easily. A friend asked me to try Vinol. I did, and it built me up so I am strong and well and I am able to do my housework which I had not done for three months before taking Vinol."—Mrs. Y. R. Houshous, Waynesboro, Pa.
Vinol creates an appetite, aids digestion, makes pure blood and creates strength. Your money back if it fails.
