

# TOWN and FARM in WARTIME

Prepared by OFFICE OF WAR INFORMATION

### CIVILIANS AT WAR

The government needs and asks its citizens in this 169th week of the war to:

1. Give all you can to the 1945 Red Cross drive. Voluntary contributions of \$200 million are needed to carry out its vast program of service.
2. Keep on saving urgently needed waste paper and kitchen fats—also tin cans, where they are locally collected.
3. Help save cargo space in transport planes by using V-mail when writing to soldiers overseas.

### DECLARATION OF ESTIMATED 1945 TAX

Farmers (persons receiving at least two-thirds of their income from farming) are permitted to delay filing 1945 declarations until January 15, 1946. At that time they may, if they desire, file their annual returns instead of their declarations. Declarations are re-

quired from farmers who expect to earn \$500 or more this year. If they postpone the filing of declarations until January 15, 1946, they must pay the full amount of estimated tax at that time. Special forms and instructions have been mailed out to all persons who filed declarations last year. Additional copies may be obtained from the office of any collector of internal revenue. Farmers who have not as yet filed their 1944 income tax returns must do so by March 15.

### TOTAL FOOD RATIONING IN JAPAN

All food and clothing in Japan is rationed, as well as matches, medicines, gasoline and fuel, the office of war information states in a comprehensive report on conditions within Japan. Food is distributed to Japanese consumers through neighborhood associations, which issue the rations.

Each association serves 10 families. A local chairman is appointed by the police. Local food corporations deliver food rations to the consumers at their doors.

### "SAFETY FIRST" FOR FARM INVESTMENTS

When the farmer invests his hard-earned money he should be careful to invest it where he is certain that his principal will be safe, is the advice of M. L. Predmore, chief of the agricultural section of the treasury's war finance division. He recalls how many farmers, lured by high interest, invested to their sorrow in speculative stocks and bonds during the last war period. "For this reason," he declares, "war bonds are a first choice for the investment of farm savings. They have all the resources of America back of them. In addition, the series E war bond pays the highest rate of interest of any government security now available."

### TIGHTENED HOME CANNING SUGAR PROGRAM

A tightened home canning sugar program for the 1945 season—a program designed to insure a fair distribution of the available sugar to those who actually need it for canning—has been announced by Administrator Chester Bowles of OPA. Highlights of the new program are as follows: The housewife will apply at her local rationing board and indicate the amount of canning she intends to do this year. Local boards will issue five-pound canning sugar coupons. No ration stamps in war ration book 4 will be good for canning sugar this year. For canning fruits and fruit juices, the allowance will be on the basis of one pound for each four quarts to be canned. The total allowance must not exceed 20 pounds per person, or 160 pounds to a single family, even though the family may contain more than eight persons.

### COTTON GOODS FOR SMALLER TOWNS

Distribution of the 10,000,000 yards of cotton goods that is being made available for the first quarter of 1945 to merchants in rural areas has been limited to merchants who, in 1944, received less than 20 per cent of their 1943 sales of cotton goods, the war production board reports. The allocation of the cotton goods was made specifically for over-the-counter sales to persons who live in small towns and rural areas, and who usually purchase such goods for use in making garments in the home. For the purpose of the distribution program, small towns and rural areas were defined as communities of less than 25,000, WPB explained. No priority assistance was granted to retailers with greater population.

### HOME REPAIRS A VAST PROGRAM

Nearly 390,000 American families financed urgently needed home repairs and maintenance last year with funds advanced by private financial institutions and insured by the federal housing administration. Abner H. Ferguson, commissioner of the national housing administration, says, "Property repairs and improve-

ments are expected to create a large number of jobs during the transition period from war to peace. As soon as wartime restrictions can be removed, FHA stands ready to extend its aid to property owners and financial institutions to help them undertake the vital task of property rehabilitation with a convenient plan of financing." It is estimated that property repairs and improvements, when restrictions are removed, will aggregate \$3,000,000,000 in the first 12-month period.

# What Does A Bank Do?

IT PROVIDES YOU WITH COMPLETE FINANCIAL SERVICE

You may never have had occasion to investigate more than one or two of the services a bank renders individuals. Perhaps your experience has gone no further than the savings department. If so, you would find in a discussion with the heads of the other departments many services which would benefit you. Know your bank better.

## I'm not losing face.

I guess you've seen pictures of those real ancient cars that are quite a fad with some prominent people. I'm no big shot, but folks envy me, even at that, for keeping this car like an heirloom. Oh, some say that any good motor oil would largely do the trick, and they're welcome to believe it. I simply say this: Keeping my engine OIL-PLATED ever since I switched to Conoco N<sup>th</sup> motor oil, has helped me beat the curse of engine acids. I got wise that acids from combustion always try to corrode an engine's inside finish, but OIL-PLATING furnishes special protection. A synthetic in Conoco N<sup>th</sup> oil, I've learned, behaves almost like magnetism. This makes the working parts attract OIL-PLATING, and hold on to it. It's fastened as closely as chrome plating to keep metal under cover from acids. That would certainly be a check on corrosion, from the minute you switch to an OIL-PLATED engine. So just get Conoco N<sup>th</sup> motor oil.

# Keep Advertising

PEOPLE DON'T STOP BUYING  
EVEN IF PRICES ARE ADVANCING  
EVEN IF MERCHANDISE IS HARD TO GET

They keep right on doing things day after day, week after week, month after month, just as they did last year and the year before . . . They're working, playing, buying, wearing out and replacing all kinds of merchandise this year the same as before . . . and with surprisingly little variation from month to month.

THEY MUST HAVE DRUGS  
THEY REPLACE CLOTHING  
HOME EQUIPMENT BUYING GOES ON  
THEY GET THEIR EARNINGS REGULARLY  
FOOD PURCHASES GO ON

The business is there, twelve months of the year. People are buying and will continue to buy. The only question is, Where? If the particular store cannot get the merchandise to sell, nor make substitution for the things that are not available, and will not advertise, other stores will do the business, not only now, but in a larger measure when Victory is won and business goes back to normal.

TO ADVERTISE NOW IS GOOD BUSINESS NOW  
IT'S BETTER BUSINESS FOR THE FUTURE  
IN AN ENLARGED FOLLOWING
