OVERLOOKS HIS OWN
It is much easier for the average man to point out the faults of others than to acknowledge.

LICKING A PROBLEM—Postmaster Henry G. Riecks of Mercer Island, Wash., tired of complaints about the taste of glue on postage stamps—so he did something about it. The inventive Riecks devised a sign with a sponge tongue for wetting stamps.

DISH TOWELING ADDS COLOR—Dish towels can be a delightful and colorful additions to the kitchen. Toweling can be used with striking effect for curtains, tablecloths, place mats, aprons, as well as for drying dishes. When you buy dish towels, look for quality in the material—it will give you maximum service and satisfaction. Read the label, examine the material before you buy—fiber content, colorfastness, and other washing instruction should be found on the label. Before investing in a large supply of one particular color of towel, purchase one of two and test them in your washer.

Choose a firm, rough textured fabric that is not too thin. Kitchen "crash" is the term used to describe toweling that has a hard texture to reduce linting. The hard texture of crash also makes towels more absorbent.
A "world" of fun can be had in decorating your kitchen and dining area with kitchen toweling. The only limit is that of your imagination!
CLEANING PIANO KEYS — Water and not enough sunlight will turn ivory piano keys yellow. To clean these yellowed keys, use a soft flannel dampened with wood or denatured alcohol. Then be sure that your piano keyboard is uncovered part of the time. On some new pianos, plastic keys are being used. These may be cleaned with a damp cloth.

You have to travel fast these days to stay where you are.

Following installation of the new officers, Miss Hager gave the club a test on "What Do You Know?" This was the highlight of the meeting. She then spent a few minutes explaining some things members should know in their New Year Book. She advised that members in their spare time study the book carefully.
