Mrs. Katie Collins, Mrs. Bertha Lofton, and Russell Powell accompanied Sallie Lee Lofton and Donald Powell to North Carolina college Monday. R. B. Kornegay is ill in Wayne Memorial hospital. Revival services began Monday night at the Gospel Light Holiness church and will continue through the week with the pastor, the Rev. A. C. Yarborough, conducting. The meeting of the Pastor's Aid Union has been postponed until Wednesday night, September 28, at the Gospel Light Holiness church. All churches are asked to be represented in the meeting. About half of any man's time is spent in doing the things he should have done yesterday.

Health for All

A DIET OF NETTLES "Cures" for tuberculosis have been reported for centuries. Anything from large doses of alcoholic beverages to horseback riding has been recommended. And, oddly enough, in spite of the most drastic types of treatment, patients have recovered. What the human frame, even weakened by tuberculosis, has been able to rise above is constantly amazing. Even more amazing, perhaps, is the persistence with which people have sought a "sure cure" for tuberculosis. A tremendous amount of research—both genuinely scientific and strictly amateur—has gone into this problem. And still it is unsolved. Recently, a farmer in Germany offered a new possibility for a TB cure. One of his pigs had what seemed to be TB. He fed her cooked nettles (the plant urtica). After three or four months of this diet the pig's cough disappeared. The farmer has offered his discovery to science for the benefit of humanity. It may not be as funny as it sounds. In recent years, science has stopped laughing at ancient remedies of herb doctors. Some have been found to be of real value. No doubt, the farmer's nettles, too, will be scientifically tested to find out whether they have any real effect on tuberculosis. In the last quarter of a century scientists have amassed quantities of knowledge about tuberculosis and the germ that causes it. They have tested for antituberculous effect every drug that has been developed for any disease. A few have been found of great value in treatment because they suppress the germs so that the body is given a chance to heal itself. Research goes on for better drugs to treat TB—and may come from something as unlikely as the diet of nettles.
