A special message to truck drivers' wives
 from your Ford Dealer ...

This year, everybody is talking about *safety* in automobiles. And with good reason. The hazards of the road take more American lives every year than we lost in the whole Korean war.

So important things are being done to make cars safer. But— isn't safety even more important in trucks?

If safety is important to the man who drives a car a few hours a day, isn't it even more important to the man (and his family) who drives a truck for a living?

We think it is.

And we think you wives think it is. That's why we believe you'll be vitally interested in what Ford has done to make driving a truck safer for your husband.

Ford has taken the lead in safety with not just one, but a whole family of new safety features for America's trucks and cars.

What are these features that could be so important to you?

4. Tubeless Tires
 This year, tubeless tires are standard equipment on every Ford Truck. Tubeless tires do not prevent punctures. But they do help to prevent many blowouts. When a puncture occurs in a tubeless tire, the air is apt to escape very slowly. The driver has a greater chance to slow down and stop safely.

5. Power Brakes
 What we call vacuum-boosted power brakes make it possible for the driver to apply a lot more force to the brakes, faster and easier. This makes it possible to stop faster in emergencies. Power brakes are standard or available on every '56 Ford Truck.

6. High Visibility
 A better view of the road—in front, behind and to the sides—can help the driver to spot trouble before it happens. A full-wrap windshield is standard on the new Ford Trucks for '56. The standard rear window is the widest on any truck ... and a new full-wrap rear window is available at slight extra cost. All told, a new Ford Truck gives the driver one of the greatest all-around glass areas of any truck.

1. Lifeguard Steering Wheel

Ford's exclusive Lifeguard truck steering wheel is built in such a way that, in case of accident, it helps protect the driver from any contact with the steering post. This kind of "deep-center" steering wheel actually acts as a cushion in case of accidents.

2. Lifeguard Door Latches

Ford's Lifeguard door latches have a new "double grip" type construction. Their extra holding strength gives added protection against doors flying open in the event of an accident ... to help keep the driver in the truck where he's safest.

3. Seat Belts

You've read a lot about seat belts. You probably know that the Accident Research Center at Cornell University, the American College of

Surgeons and many other groups strongly urge that every owner equip his vehicle with seat belts. Studies prove that in about one-half of all accidents, injuries could be avoided or reduced by the use of seat belts.

Ford is the first truck manufacturer to make seat belts available (at low extra cost, for both new and used trucks).

In case of an accident, or sudden stop, a Ford Seat Belt holds the driver firmly in the seat. This greatly cuts down the chances of serious injury.

And remember—it isn't necessary to be driving fast to be seriously injured or thrown out of the truck in case of an accident. A sizable percentage of injuries of this kind occur at speeds of only 30 or even 25 miles per hour. (If your dealer happens to be out of seat belts temporarily, please be patient. He will have them shortly.)

7. Reserve Power

A "slowpoke" truck can be a threat to highway safety—it is a stumbling block in the path of other traffic. Trucks should have enough power to keep up with the traffic stream. And they should have enough reserve power to pull out of emergency situations. So you will be interested to know that the new Ford Trucks for '56 have power increases up to 26%, to make sure drivers have all the reserve power they are ever likely to need.

Why should any man who drives a truck for a living take chances, needless chances, by not taking advantage of every available safety device?

To repeat—if safety is important to a man who drives a car once in a while, isn't it far more important to the man who drives a truck all day, for a living?

When a man drives a '56 Ford Truck—from Pickup to tandem-axle Big Job—he and his family have this peace of mind. They know he's driving a truck that gives him the added protection of exclusive Lifeguard safety features.

STOP FREEZING!
 ARE YOUR FLOORS ICY COLD?
 • ARE YOU CONFINED TO ONE OR TWO ROOMS?
 • ARE YOUR CEILINGS OVERHEATED?
 • ARE YOU WASTING FUEL ON SOOT AND SMOKE?
 • IS YOUR HEAT GOING UP THE CHIMNEY?
 • IS YOUR FUEL BILL TOO HIGH?

SWITCH to Siegler WARM FLOOR HEATING NOW!

enjoy furnace heat over the floors in every room, without costly, dirt-collecting pipes and registers to install or clean!
