

The Farm Question Box

QUESTION: How can I determine if a crop is deficient in nitrogen?

ANSWER: The plants are stunted and spindly with pale green color in early stages. Then bottom leaves begin to turn yellow at tips. Yellowing proceeds down the center or midrib of the leaf, leaving outside portion green.

Question: Why do marketing specialists say that the egg outlook is "bright" for this year?

Answer: Lower feed cost compared to past years and a laying flock about equal to 1955 indicate that prices of feed and eggs should remain favorable for six or seven months at least, according to the experts.

The swelling of a man's head can be estimated by the amount of advice he has to offer.

SNUG AND SECURE inside the Army Chemical Corp's model of the "Infant Protector" is six-month-old Chris Schimmel, son of Mr. and Mrs. Clyde B. Schimmel of Battle Creek, Mich. The "Protector," which takes only two minutes to set up or disassemble, folds into a flat package 38 x 24 x 6 inches. The heavy-duty experimental model shown here weighs 16 pounds, but the Chemical Corps, with FCDA funds, hopes to design a lighter moderately priced version. (FCDA Photo)

Army Group Develops New Portable Baby Bomb Shelter

The nation's bumper baby crop will have a much better chance of surviving some of the hazards of modern war when a new portable baby shelter developed by the Army Chemical Corps comes into general use.

The "Infant Protector," a plastic and metal crib resembling a baby-size pup tent, is being modified for civilian use with Federal Civil Defense Administration funds.

Heart of the device is a new, chemically-treated filter paper "ventilator." This self-contained unit allows air to pass in and out for breathing, but filters out poison gas, bacteria and radioactive particles.

The "Infant Protector" would be especially valuable in rural areas, where the principal menace in total war would be from radioactive fallout, biological warfare and drifting

poisonous gases.

The crib differs from a World War II model which required continual operation of a bellows to keep the baby supplied with air.

FCDA has just allocated \$20,000 for development of a less expensive and lighter version of the "Protector" than the experimental model now in existence. The aim is to build a crib capable of being produced and marketed in mass quantities for less than \$25.

FCDA officials emphasize that the "Protector" will not guard a baby from blast or the gamma ray radiation of fallout dust collecting on the outside skin of the plastic shelter. This still would have to be washed, dusted or blown off.

The new crib, however, would keep the baby from breathing radioactive dust, containing another type of radiation dangerous when inside the body.

Must Prepare Walls Before The Painting

About 95 per cent of all paint failures are caused by improper preparation of the surface to be painted.

According to Pauline Gordon, State college extension specialist in housing and house furnishings, the most important step in painting is preparing the walls so that the paint will have a solid foundation.

After you've thoroughly cleaned the walls and filled cracks, you'll need to prime and seal them. This insures you of an even penetration of the finish coat preventing light, dark or shiny spots.

Miss Gordon explains that primers and sealers may be clear or pigmented. To determine the proper undercoating for a wall finish, use the undercoat recommended by the manufacturer and follow the directions for applying it.

The undercoat cannot be touched up by applying a second coat to spots. The entire surface must be covered from one natural break to another (from corner to corner and from baseboard to ceiling).

Actually there are three types of wall primers: clear type varnish, a pigmented primer and shellac.

There are also three tools for applying paint: A spray gun, roller and brush. The spray gun is least used by home owners because it requires special skill to operate it. A roller puts on a uniform film of paint, does it rapidly and easily. As for brushes, the best are made of imported hog's hair. However, the nylon brushes have been improved and will do a good job.

STANFORD—

(Continued from Page 1, Sec. 2)

Sunday from Duke hospital where he had been a patient last week.

Mr. and Mrs. John Matthis and children of Moncure, Mr. and Mrs. Carl Britt and children of Albertson visited Mr. and Mrs. Carl Britt Sunday.

Mr. and Mrs. Donnell Whitfield spent the weekend with Mr. and Mrs. Owen Wilson in Mount Olive.

Miss Christine and Marie Joyner of ECC, Greenville, spent the weekend at their home here. Doris and Thelma Joyner, who had been visiting in Greenville, returned home with them.

Murray Roberts, Darlene and Melba Brock, Carol Kirby and Sylvia Quinn were Sunday dinner guests of Miss Doris Joyner.

Mr. and Mrs. Leon Joyner, Miss Janie Turner and Jerry Wells visited Mr. and Mrs. Gordon Joyner in Morehead City Friday.

America by 1975 will be a land in which consumption of many of our metals will increase tremendously.

The National Association of Manufacturers cites a report by the President's Materials Policy Commission of June, 1952, which indicates how great this increase probably will be.

It is projected that by 1975 consumption of copper will increase from 1,730 thousand short tons to 2,500 thousand short tons; fluor spar will jump from 369 thousand short tons to 1,060 thousand short tons, and manganese ore will increase from 1,800 thousand short tons to 2,700 thousand short tons.

CARS COLLIDE TWICE

Louisville, Ky. — Mrs. Alice Barber, 78, of Jackson, Mich., met Jack V. Cooper, 35, of Detroit, when their cars collided near here recently. Mrs. Barber was enroute to Florida. Deciding to return home, after the collision, Mrs. Barber planned to follow Cooper on his northward trip. She followed too closely and smacked into the rear of his car when he stopped at a traffic light. The second collision finished her car, so she accepted Cooper's invitation to ride with him. Officers said no charges were filed and that both took the collisions good-naturedly.

One reason the dollar buys less is that it has more to buy.

NOTICE OF DISSOLUTION OF PARTNERSHIP

The public is hereby notified that the co-partnership of C. B. Burnette and L. P. Wells, trading under the name and style of Mount Olive Products Company and dealing in building supplies in the Town of Mount Olive, North Carolina, has been dissolved, and that neither of said parties shall henceforth be responsible or liable for any claim, contract, account, indebtedness or obligation contracted or incurred by the other party. The assets of said partnership have been equally divided between said partners and said business shall no longer be operated by either party. Any person, firm or corporation now indebted to said partnership may pay the amount of such indebtedness to either C. D. Burnette or L. P. Wells and receive a good and valid receipt therefor.

This 20th day of January, 1956.

WHY THE CHRYSLER WINDSOR V-8

Everything about driving a Chrysler is new! You touch a button on the left (and safe!) side . . . and Push-button PowerFlite, the smoothest of all transmissions, goes into action.

From four lengths behind to four lengths ahead of a moving truck going 40 m.p.h. in 8 seconds flat. That's the kind of reserve power you get in Chrysler's great airplane-type V-8 engine.

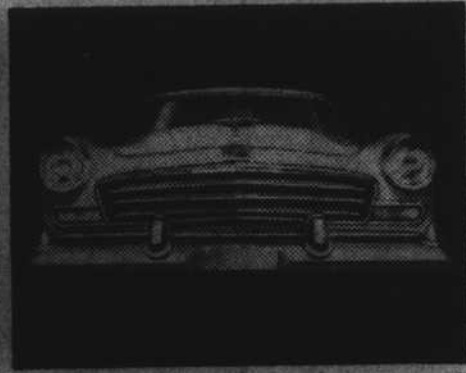

Full-time PowerPilot Steering does 80% of the work . . . gives you a cat-footed feel of the road every inch of the way . . . requires less pull . . . only 3 1/2 turns from full left to full right.

IS THE YEAR-AHEAD CAR

And talk about style! Here's the "PowerStyle" look that is showing its easy tail to contemporary car designs. Isn't it time you compared a Chrysler with the other cars in its price class?

Best of all, you can own a bigger, more powerful Chrysler Windsor for the cost of a medium-priced car. Here is year-ahead value that means better re-sale value for years to come.

"PowerStyle" CHRYSLER

Biggest buy in the fine car field!

Our "Sign of Quality" Used Cars—which include many late model Chryslers—are the greatest buys in town!

News of the Negro Population

(By Mrs. Maude Kornegay)

The usher board of Wynn Chapel will meet at the home of Mrs. Lottie Herring Wednesday night, February 22.

The first meeting of the year for the home demonstration club was held Tuesday afternoon in the home of Mr. and Mrs. C. F. Grady. After the business session, refreshments were served.

Mr. and Mrs. S. E. Durante spent Saturday in Raleigh.

Special services will be held at Wynn Chapel Sunday morning, January 29, with the pastor, the Rev. Louis Wright, delivering the message.

Mr. and Mrs. Robert Ezzell, Jr., and Amos Bell, accompanied Sprunt Bell, who was injured in an automobile wreck Sunday morning, to the Veterans' hospital at Fayetteville Sunday afternoon.

Henry Faison is confined to his home on highway 117 with a foot injury, suffered a few days ago.

INSTALLMENT THEFT

Miami Beach, Fla. — A recent vacationer from Colorado Springs, Colo., reported to police that someone had broken into his car, stolen

a pistol, a strongbox containing personal papers, and (he thought) a duplicate set of keys to the car. He was right. Four days later, he reported his car stolen from the same parking place.
