Home Fires Burning.

There are about five million homes in this country without fire insurance. Last year 20,000 dwellings were built, when under the best conditions 70,000 would be needed to accommodate the population.

A serious shortage of fire insurance is being experienced. At present we preserve existing policies against loss by fire. But what are we doing about it?

When there were ten homes burned for every new one turned for every new one. And what is worse, many of these caught fire through strictly inexcusable human carelessness. "Oh, well," you say to yourself, "my house won't catch fire." You lead yet, but have you considered that you are going to be a fire victim?

Soldiers marched to the front singing, "Keep the Fires Burning," and the others of many of those who have a few weeks later something like this: "Dear Mother, our house caught fire from a chimney flue and was burned a week ago yesterday." A soldier's song had answered!!!

It is his brother's keeping a fire-loss precaution. It is his brother's keeping a fire-loss precaution. It is his brother's keeping a fire-loss precaution. It is his brother's keeping a fire-loss precaution. It is his brother's keeping a fire-loss precaution.
