

# LIFE WAS A MISERY TO HER

Says this Woman Until Relieved by Lydia E. Pinkham's Vegetable Compound.

Carrollton, Ky.—"I suffered almost two years with female weakness. I could not walk any distance, ride or take any exercise at all without resting. If I swept the floor or did any kind of work it would bring my sickness on. I was weak and languid, had no energy, and life was a misery to me. I was under the care of a physician for several months and tried other remedies. I had read of Lydia E. Pinkham's Vegetable Compound and decided to try it. After taking twelve bottles I found myself much improved and I took six more. I have never had any more trouble in that respect since. I have done all kinds of work and at present am an attendant at a State Hospital and am feeling fine. I have recommended your Vegetable Compound to dozens of my friends and shall always recommend it."—LILLIAN THARP, 824 S. 6th St., Carrollton, Ky.

**A Disarming Order.**  
The atmosphere of the smoking car lent itself to reminiscence.  
"Captain," asked the hardware salesman, "would you mind telling me how you lost your arm?"  
"Not at all, not at all," replied the bronzed officer with the empty sleeve. "It happened this way: We were due for another turn in the trenches the next day, so they were giving a dance for us that night back in the rest camp. A few welfare workers were there, and among them was the cutest little girl I ever met. I managed to dance with her most of the evening, and toward the end we wandered out in the moonlight."  
"Captain," she said, after a while, "please remove your arm."  
"And you know, she was such a little queen I just couldn't refuse her."—The Home Sector.

**Outdoor Life.**  
He is a big game hunter, and was talking of his happy experience in the out of doors. Then the talk drifted to old friends back in the old home town.  
"Whatever became of So-and-So?" one friend asked the hunter.  
"Oh, hadn't you heard? He's in jail."  
"You don't tell me?"

**His Advantage.**  
Sunday School Teacher—The man with five talents increased them to ten, but the man with one hid his. That was wrong, wasn't it?  
Willie Willis—Huh! Think of the laugh he had on the other guy when the income tax man came around and took away 95 per cent of the ten talents.—Judge.

# Frantic With Pain

A Physical Wreck From Kidney Trouble, But DOAN'S Made Her Well.

"Kidney trouble made a complete wreck of me," says Mrs. Wm. Harvey, 621 N. Eighth St., Grants Pass, Ore. "I was so despondent and miserable it seemed I had nothing left to live for. Death would have been a welcome relief. For six months I was in bed and never expected to leave it alive. I was too weak to move without the help of my nurse and so nervous I screamed when she touched me. My back and head hurt like a throbbing toothache. I had awful dizzy spells, my eyesight failed, my hands and feet felt dead. I was pain-racked all over. The kidney secretions looked like thick, black coffee and burned terribly. They almost stopped passing and then my feet bloated like bags of water. I was frantic with pain, and thought I would lose my reason. "I had lost all faith in medicine and tried Doan's Kidney Pills only because a dear friend asked me. Right from the start I began to feel better. Doan's cured me."

# ORCHARD TOPICS

## PRUNE PEACH TREE HEAVILY

Will Induce Correspondingly Large Amount of New Wood Growth. Knowledge Essential.

Peaches are always borne on wood that grew the previous season. Therefore, after a peach tree reaches bearing age it is essential so to manage it as to induce a fairly liberal growth each season.

As a general proposition, very heavy pruning will induce a correspondingly large amount of new wood growth. It follows that the weaker-growing varieties should be pruned more heavily, relatively, than the very strong-growing sorts.

The growing of an open-headed tree is not merely a matter of keeping the top well thinned out. The position of the branches can be controlled and directed to a marked extent by the manner in which the pruning is done.

Heading in a tree from year to year, and pruning with a view to producing an open, spreading, low-top results not only in the development of strong, stocky limbs well able to sustain heavy loads of fruit, but it brings a large proportion of the top near the ground where much of the fruit can be harvested without the use of step-ladders.

The man who prunes a fruit tree during its first years must have a pretty clear conception of what the tree is to look like when it reaches maturity, and he needs to know from the beginning what is necessary each time it is pruned in order to develop the tree which forms his mental vision. A well-formed plan, based on a knowledge of the underlying principles of pruning, is essential if the operation is to be anything more than a haphazard removal of branches that appear to be in the way.

## COILING MOTH IS CHECKED

Control of Injurious Insect More Effective Last Year Than for Several Seasons.

When the apple crop of the country was harvested last fall, it was apparent that control of the coiling moth had been more effective last year than for many seasons past, according to deciduous fruit specialists of the bu-

Codling Moth, the Cause of Wormy Apples.

reau of entomology, United States department of agriculture. Because of the unusually high value of the apple crop, the specialists expect that the results obtained will stimulate similar thorough work another year.

## SPRAYING FOR LEAF-HOPPER

Solution of Nicotine Sulphate With Little Soap Added Is Effective to Kill Pest.

A 40 per cent solution of nicotine sulphate used at the rate of one part of the sulphate to 1,500 parts of water, with a little soap added, forms an effective spray for the apple leaf-hopper. As this pest frequently stunts apple trees, it would be well to watch for it and kill it as soon as it makes its appearance.

## EGGS OF TENT CATERPILLAR

Deposited in Masses Around Small Branches of Apple Trees—Cut Them Out and Burn.

The eggs of the tent caterpillar are deposited in masses around the small branches of apple trees and the winter is passed in this stage. Watch for them while pruning your orchard and cut out these egg masses and burn them. This will prevent future loss and effect a complete control.

## RIGHT SPACE FOR PLANTING

About Twenty Feet Apart for Pears, Plums and Sour Cherries Is Quite Satisfactory.

Pears, plums and sour cherries should be planted about twenty feet apart each way, while sweet cherries should be planted not less than twenty-five feet apart each way. The tendency now is to plant peaches wider apart than formerly, 20 by 20 feet and more being the distance recommended.

**Girl Students Missing.**  
Wilmington.—Police in all North Carolina towns were asked to apprehend and hold Miss Alice Limer, aged 14, daughter of Mr. and Mrs. L. Limer, South Fifth avenue, and Miss Elisabeth Shepard, of Winter Park. The two girls were students at the Wilmington high school. Two "pretty girls" are reported to have left the train at Chabourn, according to a telegram from the police of Florence S. C.

**Want Election Authorized.**  
Burlington.—At a recent meeting of the board of Aldermen of this city the board of education appeared before the meeting and asked the board to take steps necessary for authorizing an election on the question of a school board issue of \$200,000 for the erection of additional school buildings. After an investigation of the present indebtedness of the city the board found that the borrowing limit of the city was \$160,000, and it was decided to table the matter until the next meeting of the board.

**Master Plumbers Adjourn.**  
Charlotte.—Mr. M. B. Hunter, of Charlotte, was elected president and Mr. L. L. Hackney of the same city secretary and treasurer of the North Carolina Association of Master Plumbers at the close of the session.

In North Carolina there are five districts and the nominating committee recommended that one district be added from South Carolina. The five vice presidents from North Carolina and one from South Carolina will be named later by the president of the state association.

## Don't Let Catarrh Drag You into Consumption

**Avoid Its Dangerous Stage.**

There is a more serious stage of Catarrh than the annoyance caused by the stopped-up air passages, and the hawking and spitting and other distasteful features.

The real danger comes from the tendency of the disease to continue its course downward until the lungs become affected, and then dreaded consumption is on your path. Your own experience has taught you that the disease cannot be cured by sprays, inhalers, jellies and other local applications.

S. S. S. has proven a most satisfactory remedy for Catarrh because it goes direct to its source, and tends to remove the germs of the disease from the blood. Get a bottle from your druggist today, and begin the only logical treatment that gives real results. For free medical advice write to Medical Director, 104 Swift Laboratory, Atlanta, Ga.
