These agents of the devil may destroy the Bible, but if they do they will do more than the world has done heretofore

Raeford may never be a large city, but it may continue to be what it always has been: The best place to live in the world.

A man who fails to accumulate wealth is considered to be a failure in the eyes of the business world, still a poor man may be very essential to the welfare of a community even where very successful business men reside. It takes all degrees of success.

THE WAY OF IT.

It is stated that of the more than four million children that enter the public schools of this country each year, about half of them fail to reach second grade. These are called "repeaters," and cost extra from \$72 to \$80 a year, because of this failure to pass. So, this causes a great loss in time.

We are privileged to think why this is so. Teachers of the day charge it to defective children. We believe it due to books, teaching methods and crowded school rooms. The books here are too hard for beginners. Children are taught by word method, so they are trained to guess at the lesson, and to rely upon outside help. And, teachers have too many pupils to give each the personal attention they must have to make satisfactory progress.

If more simple texts are used by beginners, and if from the very first they are trained to rely upon their own efforts, and teachers are never assigned more than twenty five pupils, many of these apparent mental defects will disappear.

There is little difference in the capacities under like opportunities

It eally is foolish to expend so much in development of mere animals. If man is not immortal it's a waste to improve him. But he IS more. Increase his capacity for a higher existence!

Yes, evolution theories aren't new. They are nearly as old as sin.

A man is better than a hog, or worse. This depends upon whether he follows his natural inclinations, or seek higher plane

It's Easier to Sell in NORTH CAROLINA

The Sandhills—
We salute those men of vision who have transformed a desolate region of pine barrens into a garden land of fruits and berries. The Jefferson Standard is glad to be a heavy investor in the Sandhills Country.

Forty thousand North Carolinians are insured for 90 millions of dollars in the Jefferson Standard.

With Jefferson Standard's 14 millions of dollars of investments working in practically every village and hamlet in North Carolina, it is only natural that right-thinking Tar Heels should insist, more and more, that their insurance needs be covered with a Jefferson Standard policy.

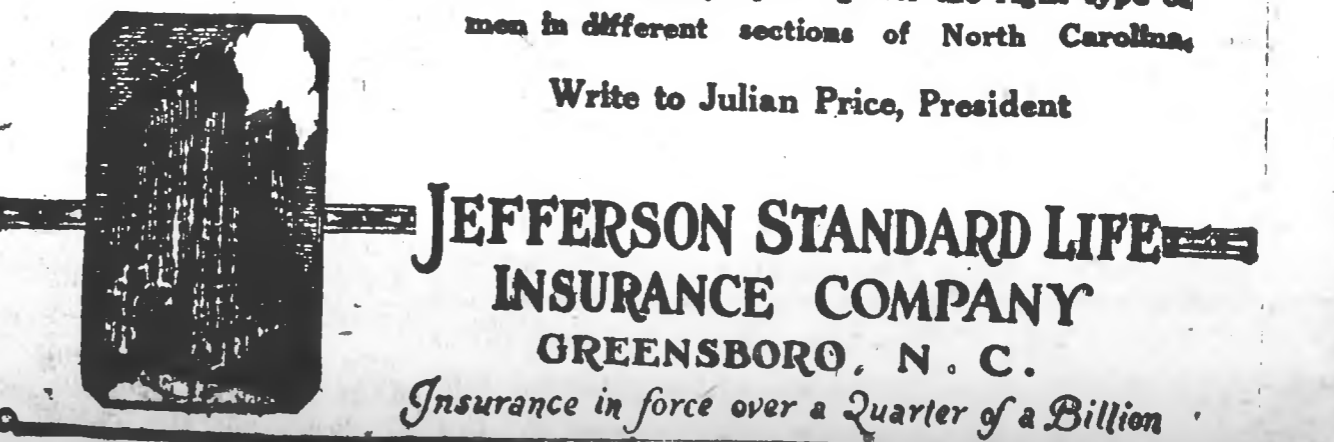

Doesn't it follow that the policies of this **BIG HOME COMPANY** are
