Here's to Beauty!
by Doris Hale
Beauty Consultant

JUST a few days ago I had a long talk with a famous painter who has done the portraits of many beautiful women. And it was astonishing to learn how much his art had taught him about care of the skin.

I found, when he began to talk about feminine beauty, that nothing escaped his keen eyes. As he painted, he saw revealed the host of tiny blemishes and little sagging contours that the average person would overlook. Indeed, he knew quite as much about the texture of the skin as any beauty expert.

"Why is it," he declared, "that so many women are satisfied to have complexions like the pigments on oil paintings? When viewed from a distance, their skin seems lovely; but when one observes them more closely it is found to be unpleasantly coarse and rough looking. Only recently I met a charming woman whose friends thought she was beautiful. But when she sat for her portrait, I saw clearly that her skin actually was blotchy—like an oil painting that is viewed in a poor light."

He was right—some women's skins do look like oil paintings! Yet there is no need for any woman to let her skin grow coarse and weather-beaten—and old. If the skin is treated as it should be, its texture will change only a little through the years after twenty. And no one should try to cover up a neglected skin with a heavy layer of powder, when it is so easy to keep the skin lovely with just a few minutes attention daily.

Hints for the Home

Fig and Bread Pudding—One cup of salt pork, chopped very fine, one cup of bread crumbs, one cup of raisins, one cup of chopped dates, a few currants and bit of citron lemon peel, salt, cinnamon, cloves and allspice, one cup of sugar, two cups of milk, teaspoon of baking powder and flour to make quite stiff. Boil in pudding dish for three hours. Eat with hard sauce.

Fig Cake—Two cups of sugar (dark brown), one cup of butter, one of water, one teaspoon each of cloves, cinnamon, and nutmeg, four eggs, two cups of chopped raisins, one pound of figs chopped, two cups of currants, washed and dried, three cups of flour, and two teaspoons of baking powder. Bake in layers, which in putting together, alternate with layers made from the following: Two cups of sugar, three fourths of a cup of butter, one cup of sweet milk,

one of corn starch, two of flour, three teaspoons of baking powder, and the whites of six eggs beaten to a stiff froth.

CHICKEN PIE

Have the chicken prepared as for fricasse. Put in a kettle without liver, heart, etc.—and cover with boiling water and cook gently for about two hours. (The liver, etc., should be cooked separately and used for sandwich filling or some other dish calling for chicken giblets.) Have ready five or six potatoes pared and diced or cut into cubes with French potato cutter. Add to the chicken and cook for twenty minutes more, or until the potatoes are tender. Now add salt, pepper, a little chopped parsley and two table-spoons of flour mixed smooth with a little cold water, and boil three minutes more, stirring to keep smooth. Have ready a large baking dish lined with good pie dough. Pour chicken and potato mixture into it, cover with crust, brushing with a little milk to glaze. Bake for about twenty minutes, making sure that lower crust is done. If you like the lower crust may be lightly cooked before the chicken, is put in the dish. The dish is greatly improved if after the chicken has been cooked the bones and most of the skin are removed. The meat should be left in as large pieces as possible.

To make a slip dress of this sort you will need no special pattern. Simply measure off twice as much thin cotton material as the desired length of the dress. Cut a small circle in the center of the folded edge for the neck, and then cut out the material on either side to make the side seams of the skirt and the sleeves. The small diagram shows how this should be done, the meas-

Of course your baby probably has one or two "party" dresses made of linen with dainty hand work and a fine cotton mull or handkerchief bit of fine lace. But most of the time all he needs by way of a dress is a very simple thin white cotton slip, made with roomy sleeves and armholes, so that there will be no trouble getting it on and off.

The daytime slip may be done up at the back or the front, and for this you should make a four or five inch slash, from the neck down the center of the back or the front of the slip. To make a practical sort of night gown, you may use the same pattern, with a front opening. The gown should be cut long enough to allow for folding over and tucking in over baby's feet. A practical sort of dressing gown may be made from the same pattern, by simply cutting down the front from the neck to the bottom of the hem, and if you like, you may make a little house jacket by cutting the pattern off a little below the waistline.

Announce Corn Contest For 4-H Club Members

A state-wide corn growing contest open to all regularly enrolled 4-H club members of North Carolina will be conducted this year with cash prizes amounting to \$350 offered through the agricultural extension service of State College by the Chilean Nitrate Soda Educational Bureau.

The contest will be in charge of L. R. Harrill, state club leader, and will be conducted in each of the four extension districts. District prizes of \$35, \$20, \$15, \$10 and \$7.50 are offered for first, second, third, fourth and fifth places respectively. In addition, the Chilean Nitrate Bureau will award a gold medal for the highest yield produced in the State with a silver medal for second state prize and a bronze medal for third place.

Under the rules of the contest, each contestant will enter one acre of corn by June 15. The acre must be designated and approved by the county farm agent and will be grown according to his advice and suggestion. At least 50 contestants must be entered from the extension district before prizes for that district will be awarded says Mr. Harrill. If there are less than 50 contestants in a district, only the highest records will be eligible to compete in the state awards and no district prizes will be given in that district.

In addition to growing the corn according to recommendations of the county agent, a complete record must be kept on the acre and this filed with the county agent by December 15. The county agent will also certify as to the accuracy of the yield.

In selecting the prize winners, Mr. Harrill says consideration will be given to yield per acre, profit above cost of production, selecting and making an exhibit at some fair or corn show, field selection of planting seed and the final record as turned in to the county farm agent.
