PAUL DICKSON

1889 - 1938

MRS. PAUL DICKSON, Editor

Entered as second-class mail matter
at the post office at Raeford, N. C.,
under act of March 3, 1879.

FRANCES PAYS AND PAYS

Strangely a few mornings ago machine guns suddenly appeared on the principal streets of Vichy and important roads leading to the city. They had been mounted at strategic centers, especially thick around government buildings. Their presence was officially unexplained, and the uninformed public wondered and speculated.

All of France, however, knows now the significance of these deadly machineries that had been quietly planted in the capital of the Nazi-controlled France.

Official orders have gone out to all the men of France between the ages of 18 and 50, and all the women of France between the ages of 21 and 35 that **THEY MUST GO TO WORK FOR THE NAZIS.**

The manifesto comes from Marshal Petain. Of course, the order also bears the seal and imprimatur of Pierre Laval. Hitler could undertake to impose none of his perfidious tyrannies upon France unless the galloping traitor politician should have his subtle and sinister hand in such infamy against his fellow countrymen.

Hitler, running desperately short on civilian labor to supply his people and his armies with goods and commodities essential to the prosecution of the war, has made his demands upon his French quislings to conscript French labor for him in this emergency.

His gracious promise is that for every three workers he is furnished to go to Germany and work in his war industries, or in the fields or to do any form of slave labor that he may demand, he will release one French prisoner of war.

And no sooner ordered than obeyed. Petain and Laval rush all over themselves to make effective this enslaving decree from the Fuehrer.

More and more, they are "collaborating" with him. More and more are they determined to deliver the whole of France into his malicious hands. More and more they are carrying their betrayal of their people to whatever lengths Hitler may dictate.

And the guns! Yes, the guns had been stationed beforehand.

There they stood as a warning to the French people that some ominous fate was ahead for them. And they have not been long in ascertaining just what this fate is.

It is nothing less than wholesale delivery of the working French people into the service of the monster that they hate with an implacable fury.

And if they should happen to wince under this lash, the guns will bark and the blood of patriots will flow down the gutters of the streets of their cities.

This, or worse, is always Hitler's price. Bondage of the body, imprisonment of the mind, and crucifixion of the soul of all whom he conquers.

When in order to satisfy his beastly lusts, he does not ask for death to those who protest or disagree, he demands an even heavier toll—their total enslavement.

To its degradation and nameless shame, France is experiencing the bitterness of the fate of its fall into such brutal and atrocious hands.

And tasting, too, as time drags on with its increasing torments, more and more of the infamy of its arch traitors, Petain and Laval.

—The Charlotte Observer.

A NATIONAL SPEED LAW

It is to be assumed that when the President gets around to implementing the recommendations of his commission that studied the rubber situation with necessary rules and regulations, he will order the motorists of the nation to drop their gait down to 35 miles an hour, as the Baruch committee suggested.

And it will not be merely in an advisory manner that the President acts on this particular item. He will, or ought to, make it a war measure that supercedes all state speed laws, strictly and impartially enforceable under such terms as will make it go hard with all and any who dare violate such a nation-wide manifesto.

This is a proposed method of conservation of rubber that must not be trifled or played with or left for the people generally to adopt or disregard as the notion might strike them.

Either it ought to be a Federal law, in which ample punishment is provided, or it should not be promulgated at all.

—The Charlotte Observer.

Library News

Circulation figures for August, 1941, compared with those for August, 1942, reflect Hoke County Library's service to Army people. Average daily circulation in August, 1941, was 41. In August, 1942, it was 60. Now in September the daily circulation is around 100.

Recently Mrs. Jack Nance donated the library of her brother, Eugene Bill. This was a collection of about 200, largely fiction. These books have proved so popular that at the present only a very few are left on the shelves. Each of these books is marked, "Donated to Hoke County Library by Eugene Bill." Mr. Bill was an inveterate reader, and was extremely well-informed.

In addition to the collection donated by Mr. Bill, there are many other new titles in the library. The subjects range from fiction to books on furniture, parties for brides, entertaining, how to make slip covers, cooking, world affairs and American glass.

Among the most talked-of titles are:

"One Red Rose Forever," Jordan; "Mission to Moscow," Davies; "Above Suspicion," MacInnes; "Respectfully Yours," Brockway; "Moon Is Down," Steinbeck; "Shooting the Russian War," Bourke-White; "My Friend Flicka," O'Hara; "Islandia," Wright; and "They Called Me Cassandra," by Genevieve Tabouis, a French journalist who predicted the fall of France, and who, according to Hitler, knows what Hitler is going to do before Hitler knows it himself.

More Care Advised For Fall Pig Crop

This fall's bumper pig crop holds possibilities of increased trouble for North Carolina farmers unless they can give greater care and attention to each litter, says Dr. C. D. Grinnels, veterinarian of the Agricultural Experiment Station at N. C. State College.

More pigs generally mean less attention per pig, the veterinarian pointed out. Yet fall weather conditions are ideal for a great number of swine disease complications.

Every hog house should be disinfected thoroughly, well-bedded and ventilated properly. Precautions should be taken to prevent pigs from piling up at night, with consequent chilling in the morning.

Sunless days in the late fall increase the danger from rickets and vitamin deficiency diseases. Rations should be checked with this danger in view, the State College livestock authority advised. Wet weather also increases the threat of pneumonia and influenza. Proper housing and prompt control measures in case of sickness are the best steps against these two destructive killers.

Dr. Grinnels also observed that there has been an increase in fall outbreaks of hog cholera in the past few years. In view of this apparent upward trend in the cholera cycle, all fall pigs should be vaccinated by a veterinarian around weaning time.

"There is no object in having larger farrowings and ending up with fewer pigs saved from each litter," Dr. Grinnels said. "Yet this may happen easily on many farms unless the owners make up their minds to watch their fall pig crop more closely, and to take every precaution to overcome the various diseases and risks which always threaten."

Steel freighters whose keels were actually laid after the attack on Pearl Harbor, within three months were completed and carried the bombs across the Pacific which helped to win the Coral Sea Battle in May. The new steel used in those freighters or in those bomb was made partly from scrap collected in this country only a few weeks or months before the battle.

Your worn-out electric toaster or vacuum cleaner may contain the steel that will sink a German sub or stop a Japanese bullet aimed at an American aviator.

WANTED — Subscriptions to the News-Journal for College Boys and Girls. \$1.50 for the term.

ANTIOCH NEWS

Committees are at work preparing for the Antioch ingathering to be held Thursday, Oct. 8th. A bountiful barbecue, dinner will be served, or a chicken plate for those preferring it. Mr. Walter Gibson is general chairman; cotton, Mr. Angus Conoly; dinner, Mrs. Archie Howard; table, Mr. Willie Hodgin; barbecue, Mr. Flet McPhaul; program, Rev. H. R. Poole. Dinner will be served at twelve o'clock on. An attractive bazaar will be conducted by the ladies, featuring fine cakes, canned fruits and vegetables, and many useful novelties. Plans are being made to care for a large crowd.

There will be a united meeting of the Antioch Woman's Auxiliary and the Men of the Church at the church Wednesday, Oct. 23rd. The program will be centered around the Christian Education Advance as it concerns the Antioch church and community. The meeting will be at 8:30 o'clock. Refreshments will be served. All the men and women, including the older young people, are urged to attend. The program promises to be most interesting and educational and the theme for the meeting will be, "Making America Christian — beginning at Antioch."

PRICES

Retail prices of 58 farm food products rose less than 1 per cent from mid-June to mid-July, while payments to farmers for equivalent products rose more than 2 per cent.

FLAG

When families without telephones in a Nebraska community want anything in town, they hang a red flag on the gatepost or mailbox, and obliging neighbors driving by will stop to pick up the order.

In its great war production effort, the steel industry of America this year will consume about three times as much scrap iron and steel as it needed in 1938.

Within a few weeks after scrap steel is placed in a furnace, to be melted down into new steel, it may help to win a battle.

Please mention the News-Journal when shopping in Raeford and surrounding towns.

SNAPS

The 1942 production of snap beans for processing is indicated to be 180,700 tons, or 37 per cent larger than the 1941 crop, reports the U. S. Department of Agriculture.

BONDS

A recent survey conducted by the American Institute of Public Opinion revealed that 50 per cent of American farm families have been purchasing war bonds or stamps.
