

County School News

T. C. Jones, principal of Rockfish school, has returned from Duke hospital where he underwent two operations. Mr. Jones has not yet recovered enough to return to school. Mrs. Alex Ray is substituting for him.

The Rev. Z. G. Ray, former principal at Rockfish, is in Highsmith's hospital threatened with appendicitis.

Hoke High Honor Roll

Those whose names are listed on the honor roll are the following:
Miss Fisher's 8th grade: Milton Mann, Jimmy McGowan, Frances Bowling, Mildred Clark, Patricia McNeill and Mildred Lambert.

Mrs. Almema McKeithan's 8th grade: Archie Livingston, Anne Gore, Hilda Jordan, Janie Mae McNeill and Belle Smith.

Miss Mayme McKeithan's 8th grade: Duke Marshall, Betty Benner, Marian Lewis, Anne Walters, Alice Sutton Matheson and Mary Ann Smoak.

Mrs. Gore's 10th grade: Thema Cothran, Grady Covington, Eleanor Leach, Elizabeth Parker; Mrs. Dur-

ham's room: Sara Agnes Guin and Mildred Sinclair.

Miss Gill's 12th grade: Shirley Blue, Grace Jones, Harriet Jones, Vera King, Judy Klouse, Donnie Lytle, Myra Mott, Laura McDougald, Angelo Sorrentino and Elmira Whitley.

Mr. Phillip's room: Zeb Moss. Mrs. Wedemeyer's room: Mary Carter, Athleen Cothran, Lucile Townsend and Bessie Wright.

Mrs. Emily Cameron's room: Ina Mae Benner, Mary Raye Freeman, Doris Keith, Juanita Long, Edith Long, Betty McLean, Barbara Woodhouse, Bonnie Kate Blue, Nancy Lee Cole (all green A's), and Miralyn Johnson, (all green A's).

On Wednesday morning, March 15th the homeroom class of Mrs. V. R. White delighted the students with a Saint Patrick's Day play, "Mrs. O'Leary's Cow." Those playing parts were Jean McNeill, Marie Williamson, Ransom Baucom, Sarah Frances Currie, Martha Ben Gullede, Carolyn Black, and Thomas McFadyen.

Principal V. R. White, Miss Buena Baldwin, and Miss Lucy Glenn Gill attended the Audio-Visual Education Institute in Fayetteville March 15.

the experiment for the past two years, is impressed with the results, although he said yesterday that he would not go all out and advise adoption of the plan without a more widespread experimentation. Should it work satisfactorily under a variety of conditions—all kinds of seasons, on all kinds of land and with various varieties of tobacco—there could be no other conclusion but that it will be a definite advancement, he said.

Mitchiner said that burley tobacco growers use a modified form of this principle and get tremendous yields of tobacco of good quality. In most

instances, of course, they use stronger land and color is not nearly so important.

During the next three months the State College Extension Service will hold pressure canner clinics in all sections of North Carolina. Ask the county home agent about the schedule.

The farmer's share of the consumer's dollar spent for farm food products in 1944 was 33 cents, the highest of any year on record. What will happen after the war?

POULTRY WANTED
Our Truck Will Be Near Depot In Raeford, N. C.

SATURDAY, MARCH 24th. 4 'til 5 P. M.

Paying Following Cash Prices

ROOSTERS 17c lb.

ted \$81.00 to the Red Cross fund.

Mrs. Durham's home economics class enjoyed two motion pictures last week, "Threads of Fashion" and "Yesterday, Today, and Tomorrow." The latter picture was especially interesting showing the history of canning from the time Napoleon had food canned for his soldiers until the present date.

The physics class, under the direction of Mr. White, has had practical experience in the study of electricity. Members of the class were taught to discover defects and to mend iron cores and other equipment.

The 8th grade boys and girls who were members of the basketball teams enjoyed a wiener roast at Upchurch's pond Friday evening.

Thomas Cameron, chairman of the committee for Economic Development for Hoke county, explained to the student body the problems which will comfort the committee when our boys return. He solicited the assistance of the students in filling out questionnaires which will be important to the farmers of the county and

to the farm boys who will return.

Those attending a district meeting of the NCEA in Laurinburg Tuesday afternoon were K. A. MacDonald, Mrs. Jack Durham, Miss Mayme McKeithan, and Miss Blanche Fisher.

Commercial Department

A complete report of speed tests given in Mrs. Wedemeyer's typing class will be of interest to the business population of the county.

The following students have reached the speed of 30-39: Kathleen Cothran, Angus Currie, Ransom Baucom, John McGregor, Mary Carter, Maxine Walters, Thomas Ray, Eleanor Leach, Jimmy Plummer and William Clark.

The following have reached the speed of 40-49: Florence Sides, Juanita Long, Laura McDougald, Ina Mae Benner, Lucille Townsend, Lora Mae McKenzie, Barbara Woodhouse, Margaret Ray, Warren Childress, Leonard Ellis, Myra Mott, Alfred Cole, Herbert McKeithan, Mary Peale, Edith Monroe and Margie Haire.

The following have reached 50-59: Betty McLean, Donnie Lytle, Jack Campbell, Elmira Whitley, Mary Raye Freeman, Ann Niven, and Helen King.

Harriet Jones and Vera King have reached the speed of 60-69; Doris Keith has reached 79.

All of the above names have earned this rating on the basis of ten minute speed tests. For those in the 40, 50, 60, bracket, pins will be given for those making this record on three consecutive days.

No-Suckering Crop Of Tobacco Grown At Kernersville

Raleigh, N. C.—C. A. ("Cy") Fulp, Route 1, Kernersville, has introduced what appears likely to prove one of the most revolutionary work-saving principles ever applied to the culture of tobacco—a solution for the suckering problem. S. R. Mitchiner, assistant Forsyth County farm agent, said yesterday.

For the past two years, Fulp has been growing tobacco without suckers. In 1943 he tried the plan on a moderate scale. In 1944, he tried it again and kept accurate records. He found that it worked.

In his experimentation, Fulp allows his tobacco to button out and then breaks off all but three or four buttons. He then strips all leaves off the stalk from the level to which he normally would have topped the plant. The result has been that the tobacco matures a few seed pods, matures all of the leaves left on the stalk and makes little effort, if any to put out suckers.

By way of determining whether he was making or losing money, Fulp kept figures on a field of 2.2 acres in 1944 on which he conducted his experiment. He harvested 3,260 pounds of tobacco, or an average of 1,482 pounds of tobacco. This tobacco averaged 44 cents a pound, brought \$648.09 per acre.

On another field, 3.9 acres of identical soil, with identical fertilizer and identical treatment in every way except for the treatment of the top of the plant, he raised 4,784 pounds of tobacco, or an average of 1,226 pounds. He realized only \$536.02 per acre from this field. In other words, under the new process, with substantially less work, he realized \$117.07 more per acre.

Fulp plans to turn to this type of culture entirely in the future.
